Our C-S4CPB-2508 study materials will be your best choice for our professional experts compiled them based on changes in the C-S4CPB-2508 examination outlines over the years and industry trends. Our C-S4CPB-2508 test torrent not only help you to improve the efficiency of learning, but also help you to shorten the review time of up to even two or three days, so that you use the least time and effort to get the maximum improvement to achieve your C-S4CPB-2508 Certification.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which technologies should you use to integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution? Note: There are 2 correct answers to this question

- A. **Pre-delivered APIs**
- B. SAP Process Orchestration
- C. **SAP Integration Suite**
- D. SAP Cloud Connector

Answer: A,C

Explanation:

To integrate SAP S/4HANA Cloud Public Edition with another SAP public cloud solution, you should use SAP Integration Suite and pre-delivered APIs. SAP Integration Suite is a cloud-based integration platform that provides a comprehensive set of capabilities to connect applications, data, and processes across different environments. Pre-delivered APIs are predefined interfaces that enable communication and data exchange between SAP S/4HANA Cloud Public Edition and other SAP public cloud solutions, such as SAP SuccessFactors, SAP Ariba, SAP Fieldglass, and SAP Concur. SAP Process Orchestration and SAP Cloud Connector are not the correct technologies for this scenario, as they are mainly used for integrating SAP S/4HANA Cloud Public Edition with on-premise or hybrid systems. References = SAP S/4HANA Cloud Public Edition - Integration, SAP Integration Suite, SAP S/4HANA Cloud Public Edition - API Hub

NEW QUESTION # 47

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Define the organizational structure and chart of accounts.
- B. **Use the Test system to demonstrate SAP Best Practice processes.**
- C. **Conduct the Fit-to-Standard analysis to gather configuration values.**

- D. Conduct the Digital Discovery Assessment to identify extension requirements.

Answer: B,C

Explanation:

Based on the SAP Activate methodology, the Explore phase is where consultants configure business processes based on the information gathered in the Fit-to-Standard workshops. The Fit-to-Standard analysis is conducted in a series of workshops and allows for validation of predefined scenarios agreed upon and to make room for enhancements or additional configuration required. To prepare for this workshop, it is recommended that teams get familiar with the SAP Best Practices content, including the process flows, test scripts with sample data, and other documentation available in SAP Best Practices Explorer. Consultants should also use the Test system to demonstrate SAP Best Practice processes and enable business users to run the end-to-end processes and identify any gaps. The other two activities, conducting the Digital Discovery Assessment and defining the organizational structure and chart of accounts, are part of the Prepare phase, not the Explore phase. References = SAP Activate - Explore Phase: Use Fit-to-Standard to confirm business process fit and identify gaps in your SAP S/4HANA Cloud Implementation, SAP Explore Phase Activities: Define Target BP and Architecture, SAP Activate Elements and Phases, Explaining the Explore Phase

NEW QUESTION # 48

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Partner lead configuration expert
- B. Partner project manager
- C. Customer project manager
- **D. Customer system admin**

Answer: D

Explanation:

The IT Contact is the person who is responsible for setting up the initial system access, provisioning users, and managing authentication for the SAP S/4HANA Cloud Public Edition project. The IT Contact should be identified and assigned immediately when the implementation begins, as they will receive all the SAP communications and notifications related to the system setup and configuration. The IT Contact should also be available and accessible throughout the project, and collaborate with the project team and the business stakeholders¹.

The IT Contact should be someone who is a hands-on system administrator, not an executive. They should have the skills and experience to perform the system administration tasks, such as creating users, assigning roles, configuring identity providers, and troubleshooting issues. They should also be committed and engaged with the project, and provide feedback and participate in testing and training activities¹.

Therefore, the correct answer is C, as the customer system admin is the most suitable person to be the IT Contact for the SAP S/4HANA Cloud Public Edition project. References = 1 How to Choose the Right IT Contact for Your SAP S/4HANA Cloud Public Edition Project - SAP Community

NEW QUESTION # 49

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Runtime Authoring mode
- B. In the Maintain SAP Business Technology Platform Extensions app
- **C. In the Custom Fields app**
- D. In the Extensibility Cockpit app

Answer: C

Explanation:

You enable a customer-specific field to be available for UIs and reports relevant for the same business context in the Custom Fields app. The Custom Fields app allows you to create and manage custom fields for business objects in SAP S/4HANA Cloud, public edition. You can define the properties of the custom fields, such as the label, data type, length, and default value. You can also specify the UIs and reports where you want the custom fields to appear, and the business context that determines the visibility and authorization of the custom fields. The Custom Fields app also enables you to activate the custom fields and generate the corresponding CDS views and OData services for consumption by other applications.
