

C-BCBTP-2502 Instant Discount | New C-BCBTP-2502 Test Papers

If you want to know our C-BCBTP-2502 exam questions before your coming exam, you can just visit our website. And it is easy and convenient to free download the demos of our C-BCBTP-2502 study guide, you just need to click on it. Then you will find that all points of the C-BCBTP-2502 Learning Materials are predominantly related with the exam ahead of you. Every page is full of well-turned words for your reference related wholly with the C-BCBTP-2502 training prep.

SAP C-BCBTP-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.
Topic 2	<ul style="list-style-type: none">Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

New C-BCBTP-2502 Test Papers, Current C-BCBTP-2502 Exam Content

As the authoritative provider of C-BCBTP-2502 actual exam, we always pursue high pass rate compared with our peers to gain

more attention from those potential customers. We guarantee that if you follow the guidance of our C-BCBTP-2502 learning materials, you will pass the exam without a doubt and get a certificate. Our C-BCBTP-2502 Exam Practice is carefully compiled after many years of practical effort and is adaptable to the needs of the C-BCBTP-2502 exam.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q35-Q40):

NEW QUESTION # 35

Which SAP BTP service enables businesses to orchestrate and monitor enterprise-wide workflows?

- A. SAP Workflow Management
- B. SAP Business Network
- C. SAP Ariba
- D. SAP Conversational AI

Answer: A

Explanation:

In the context of the Intelligent Enterprise, business processes often span multiple departments and different software systems. SAP Workflow Management (now largely integrated into the SAP Build Process Automation suite) is the specific BTP service designed to bridge these gaps. It allows organizations to digitize, manage, and operate business processes with high levels of transparency. The service provides a centralized platform to define process flows, set approval limits, and ensure that tasks are routed to the correct stakeholders in a timely manner.

The importance of this service lies in its ability to provide "live process visibility." Unlike traditional siloed workflows, SAP Workflow Management on BTP can pull data from various SAP Business Suite components-like Finance, Procurement, or HR-to create an end-to-end view of a business operation. This orchestration is critical for identifying bottlenecks and improving operational efficiency. While SAP Business Network and SAP Ariba facilitate external collaboration and procurement respectively, they do not provide the underlying technical framework for custom workflow orchestration across the entire enterprise landscape.

By utilizing BTP's workflow capabilities, companies can achieve a higher level of automation and governance, ensuring that business rules are consistently applied across all digital touchpoints, whether the underlying systems are cloud-based or on-premise.

NEW QUESTION # 36

Which SAP BTP tool helps organizations manage sustainability risks and compliance?

- A. SAP BusinessObjects
- B. SAP Integration Suite
- C. SAP Workflow Management
- D. SAP Sustainability Control Tower

Answer: D

Explanation:

As global regulations regarding Environmental, Social, and Governance (ESG) standards become more stringent, organizations must move beyond manual reporting to automated sustainability management. SAP Sustainability Control Tower, which runs on SAP BTP, is designed specifically for this purpose. It helps organizations manage sustainability risks and compliance by providing a centralized "control center" that collects and processes ESG data from across the enterprise and its supply chain.

The tool leverages the data management and analytics capabilities of BTP (specifically SAP Datasphere and SAP Analytics Cloud) to provide a transparent view of a company's sustainability performance against its targets. It allows for the integration of non-financial data-such as carbon emissions, water usage, and labor statistics-with traditional financial data from the SAP Business Suite. This positioning is vital because it enables "holistic steering," where sustainability is treated with the same rigor as financial profitability. By using SAP Sustainability Control Tower on BTP, businesses can ensure they are meeting legal compliance requirements while also building trust with investors and customers through verified, data-driven sustainability disclosures.

NEW QUESTION # 37

Which SAP BTP service allows businesses to create low-code/no-code applications?

- A. SAP BusinessObjects
- B. SAP Concur

- C. SAP Build Apps
- D. SAP Business Network

Answer: C

Explanation:

To accelerate digital transformation, SAP has introduced the SAP Build portfolio on BTP, which is specifically designed to democratize application development. SAP Build Apps (formerly AppGyver) is the primary service within this portfolio that enables the creation of enterprise-grade applications using a no-code visual environment. This service allows users to build sophisticated user interfaces for mobile and web applications by simply dragging and dropping components. It also includes a visual logic editor, which eliminates the need to write traditional code for defining how the application behaves.

The strategic importance of SAP Build Apps within the SAP Business Technology Platform is its ability to reduce the backlog of IT departments. By allowing business experts—who understand the process but may not know how to code—to build their own solutions, SAP ensures that innovation can happen at the "front lines" of the business. These apps can easily be connected to SAP S/4HANA or other backend systems through secure APIs, ensuring that data integrity is maintained. This contrasts with tools like SAP BusinessObjects, which is focused on business intelligence and reporting, or SAP Concur, which is a specific SaaS application for travel and expense management. SAP Build Apps is a foundational service for positioning BTP as an agile platform for rapid extension and innovation.

NEW QUESTION # 38

Which SAP BTP service helps businesses automate workflows and approval processes?

- A. SAP SuccessFactors
- B. SAP Workflow Management
- C. SAP Business Network
- D. SAP Ariba

Answer: B

Explanation:

Automation is a key pillar of the Intelligent Enterprise, and SAP Workflow Management (now part of the broader SAP Build Process Automation suite) is the engine that drives this. This service enables businesses to digitize and automate business processes that require human intervention, such as multi-level approvals for purchase requisitions, travel requests, or HR onboarding. By moving these processes onto BTP, organizations can eliminate the "paper trail" and ensure that tasks are routed to the right people at the right time, with full auditability.

Positioning Workflow Management as a service on BTP allows for "cross-application" orchestration. For instance, a workflow could start in SAP S/4HANA with a new sales order, trigger an approval in a custom mobile app, and finally update a record in an external CRM system. This level of flexibility is difficult to achieve within a single application silo. Furthermore, the service provides visual "Low-Code" tools that allow business process owners to modify workflows as business rules change, without needing deep technical coding skills. This agility ensures that the SAP Business Suite remains responsive to organizational shifts, making SAP Workflow Management a critical tool for improving operational efficiency and reducing process cycle times across the entire enterprise.

NEW QUESTION # 39

How does SAP LeanIX enhance business IT governance when integrated with SAP BTP?

- A. By preventing cloud-based integrations.
- B. By providing IT landscape analysis and risk management.
- C. By restricting governance frameworks to manual tracking.
- D. By eliminating enterprise architecture visualization.

Answer: B

Explanation:

IT governance is often a challenge during rapid digital expansion. As more services are deployed on SAP BTP, maintaining a clear overview of the "who, what, and where" becomes critical. SAP LeanIX enhances business IT governance by providing a structured framework for IT landscape analysis and risk management. It acts as a "single source of truth" for the enterprise architecture, documenting all applications, their dependencies, and the business capabilities they support.

When integrated with SAP BTP, LeanIX helps organizations avoid "SaaS sprawl" (the unmanaged growth of cloud applications). It

provides visibility into which BTP services are being used and identifies potential security risks, such as applications running on outdated versions or services that lack proper data privacy controls. This level of transparency is essential for compliance and cost management. By analyzing the "Technical Fit" and "Business Fit" of the IT landscape, LeanIX allows executives to make informed decisions about decommissioning legacy systems and investing in new BTP-driven innovations. This strategic positioning ensures that the evolution of the SAP Business Suite is governed by data rather than guesswork, reducing operational risk and ensuring that the IT infrastructure is robust, secure, and fully aligned with the organization's long-term goals.

NEW QUESTION # 40

.....

Our C-BCBTP-2502 study materials can provide you with multiple modes of experience, there are three main modes to choose from: PDF, Software and Online. Firstly, the PDF version is printable. Secondly, the Software version of C-BCBTP-2502 exam questions can simulate the real exam environment to give you exam experience more vividly. Thirdly, the online version supports all web browsers so that it can be worked on all the operating systems. And our C-BCBTP-2502 Study Materials will help you in a more relaxed learning atmosphere to pass the C-BCBTP-2502 exam.
