Salesforce Health-Cloud-Accredited-Professional (Health Cloud) exam is a certification program designed for individuals who wish to demonstrate their expertise in the Salesforce Health Cloud platform. Salesforce Health Cloud Accredited Professional certification is ideal for healthcare providers, medical professionals, and IT experts who want to expand their knowledge and skills in managing healthcare data and patient information. The Health Cloud Accredited Professional certification is recognized globally as a reliable benchmark for healthcare professionals.

Salesforce Health Cloud Accredited Professional Sample Questions (Q76-Q81):

NEW QUESTION # 76

Which solution includes pre-built APIs, connectors, implementation templates, and a prescriptive end-to-end reference architecture to enable EHR connectivity and power a patient 360 from any HER into HC using HL7 V2 or FHIR standards?

- A. Tableau CRM for HealthCare
- B. Specialty vendors
- C. Mulesoft Accelerator for HealthCare
- D. Shield

Answer: C

Explanation:

Mulesoft Accelerator for Healthcare (A) is the solution that includes pre-built APIs, connectors, implementation templates, and a prescriptive end-to-end reference architecture to enable EHR connectivity and power a patient 360 from any EHR into Health Cloud using HL7 V2 or FHIR standards. Shield (B) is a solution that provides encryption and auditing capabilities for data security. Specialty vendors are not a solution, but a type of external partners that can provide integration services. Tableau CRM for Healthcare (D) is a solution that provides analytics and insights for healthcare data.

NEW QUESTION # 77

Which credentials are available to track against providers with standard Health Cloud? (Choose two.)

- A. Board Certification
- B. Facility Relationship
- C. Specialties
- D. Business License

Answer: A,C

Explanation:

Reference and details below.

□

NEW QUESTION # 78

Which three of the following features are included with a Health Cloud License?

- A. Intelligent Form Reader with Amazon Textract
- B. EHR Mulesoft Templates

- C. Surveys
- D. Intelligent Document Automation
- E. Care Coordination(Patient Services)

Answer: C,D,E

Explanation:

According to the Health Cloud Data Model Developer Guide, Surveys, Intelligent Document Automation, and Care Coordination (Patient Services) are three features that are included with a Health Cloud License. Surveys allow you to create and send surveys to patients and providers to collect feedback and data. Intelligent Document Automation allows you to digitize your document management processes and extract data from documents using artificial intelligence. Care Coordination (Patient Services) allows you to manage patient care across multiple care plans and teams. EHR Mulesoft Templates and Intelligent Form Reader with Amazon Textract are not features that are included with a Health Cloud License.

NEW QUESTION # 79

Within Health Cloud Console, there are two apps available for use depending on work preferences, which console is available within Lightning Experience?

- A. Health Cloud - Console
- B. Health Cloud - Individual
- C. Health Cloud - Worklist
- D. Health Cloud - Personal

Answer: A,C

NEW QUESTION # 80

A Salesforce administrator is migrating a Service Cloud org to Health Cloud and is considering using the Health Cloud Provider data model. Which approach should the administrator take if the Custom Provider Search Lightning component is to be used?

- A. The Provider data model is required for all Service Cloud to Health Cloud migrations, but either the standard or custom search components may be used.
- B. The current data model with the existing component can be used as well as the Provider data model with either custom search component or the Health Cloud Provider Search component.
- C. If the Provider data model is used, the standard Health Cloud Provider Search component must be used or extended. Custom search components are not supported.
- D. The Standard Health Cloud Provider Search component can be used to search either the Health Cloud Provider data model or a custom Provider data model.

Answer: C
