

# Dump Fire-Inspector-II Check & Reliable Fire-Inspector-II Exam Brainsdumps

The image shows a 'STATE FIRE TRAINING Fire Inspector II Certification Checklist' form. It includes fields for 'Name:' and 'SFT ID Number:'. The form is divided into sections: 'Section 1: To Receive Task Book' (Prerequisite, Education, Forms & Payment) and 'Section 2: To Receive Certification' (Certification Task Book). Each section contains a list of requirements with checkboxes for completion. The 'COMPLETE' status is indicated for several items.

**STATE FIRE TRAINING**  
**Fire Inspector II Certification Checklist**

Name: \_\_\_\_\_  
SFT ID Number: \_\_\_\_\_

**Section 1: To Receive Task Book**

**PREREQUISITE**  
Submit verification of completion

1. CFSM Certified Fire Inspector I OR Fire Prevention Officer ☒ COMPLETE  
2. Fire Code Inspector ☐

**EDUCATION**  
Submit a copy of your current completion certificate

1. Fire Inspector 2A: Fire Prevention Administration ☐  
2. Fire Inspector 2B: Fire and Life Safety Requirements ☐  
3. Fire Inspector 2C: Inspecting New & Existing Fire and Life Safety Systems/Equipment ☐  
4. Fire Inspector 2D: Hazardous Materials, Operations, and Processes ☐

**FORMS & PAYMENT**  
Download from the SFT website

1. Submit & complete Task Book application form ☒ COMPLETE  
2. Fee & Fee Schedule ☐

**Section 2: To Receive Certification**

**CERTIFICATION TASK BOOK**  
Submit original response and book to SFT (do not make a copy for your records)

1. Complete all job performance requirements (JPAs) ☒ COMPLETE  
Additionally the response verification page from all of the evaluators that signed off on the task book  
2. Experience ☐  
State a minimum of two (2) year's full-time paid experience in a California fire agency as a fire inspector or fire prevention officer  
3. Position - In the position of Fire Inspector or Fire Protection Specialist ☐  
4. Signed by the Fire Chief or higher authorized signatory ☐  
Signatures must be original - not stamped

## International Code Council Fire-Inspector-II Exam Dumps - Preparation Material For Best Result [2026]

Many candidates may take the price into consideration while buying Fire-Inspector-II exam materials. The price of Fire-Inspector-II exam materials is quite reasonable, you can afford it no matter you are students or the employees in the company. Furthermore the Fire-Inspector-II Exam Materials is high-quality, so that it can help you to pass the exam just one time, we will never let your money gets nothing returns. If you indeed fail the exam, money back will be guaranteed.

## International Code Council 67 - Fire Inspector II Exam Sample Questions (Q38-Q43):

### NEW QUESTION # 38

Given: A local college student inquires about the use of candles in their dorm room. Candles:

- A. may be used in a sprinklered dormitory.
- **B. may not be used.**
- C. must be kept a minimum 12 in. from combustibles.
- D. must be kept a minimum 36 in. from combustibles.

**Answer: B**

Explanation:

Reference to ICC Fire Code Regulations:

According to the International Fire Code (IFC) Section 308.1.5 (2021 Edition), the use of open-flame devices, including candles, is prohibited in dormitories, sleeping rooms, and similar occupancies unless specifically approved by the fire code official.

The regulation exists to prevent fire hazards in areas with high occupant density and potentially limited egress routes.

Fire Safety Concerns in Dormitories:

Dormitories typically contain highly combustible materials such as bedding, curtains, and furniture, making them susceptible to rapid fire spread.

The presence of multiple residents in a shared living space increases the risk of fire-related casualties.

Even in sprinklered buildings, candles pose an unnecessary ignition risk that could endanger occupants before the activation of fire suppression systems.

Clarification of Incorrect Answer Choices:

B: may be used in a sprinklered dormitory # Incorrect

While fire sprinklers help control fires, they do not prevent ignition, and the prohibition still applies regardless of sprinkler systems.

C: must be kept a minimum of 12 inches from combustibles # Incorrect

This rule applies to general open-flame devices in some circumstances but does not override the outright ban on candles in dormitories.

D: must be kept a minimum of 36 inches from combustibles # Incorrect

Similar to option C, maintaining a distance from combustibles does not exempt candles from being prohibited in dormitory settings.

Conclusion:

The correct and verified answer is A (Candles may not be used) based on the International Fire Code (IFC) Section 308.1.5, ensuring fire safety compliance in dormitory settings.

### NEW QUESTION # 39

In a motion picture theatre, an audible announcement shall be made to notify the occupants of the location of exits to be used in the event of a fire or other emergency not more than how many minutes prior to the start of each program?

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

Exit Announcements in Motion Picture Theaters

According to the International Fire Code (IFC) 2021, Section 403.9.1.2, motion picture theaters must provide an audible announcement informing occupants of exit locations no more than 5 minutes prior to the start of each program.

This requirement ensures that audience members are aware of exit locations in case of an emergency, enhancing fire safety in crowded venues.

2. Verification of Other Options

Option B (10 minutes) - Exceeds the IFC maximum timeframe. Incorrect.

Option C (20 minutes) - Not specified in the IFC as a valid timeframe. Incorrect.

Option D (30 minutes) - Far beyond the required timeframe and would likely be ineffective. Incorrect.

Reference Sources:

International Fire Code (IFC) 2021 - Section 403.9.1.2 (Theater Exit Announcements) NFPA 101: Life Safety Code (Theater Occupancy Requirements) ICC Fire Inspector II Study Guide (2021)

#### NEW QUESTION # 40

One or more approved fire extinguishers must be located within \_\_\_ ft. of hot work locations.

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

Fire Extinguisher Requirements for Hot Work Locations

According to the International Fire Code (IFC) 2021, Section 3504.2.6, one or more approved fire extinguishers must be located within 30 feet of hot work locations.

Hot work includes welding, cutting, grinding, brazing, or any operation that generates heat, sparks, or flames.

2. Why 30 Feet is the Correct Answer

Hot work presents a high fire risk, and quick access to fire extinguishers is crucial for immediate response.

The 30-foot requirement ensures that extinguishers are readily accessible without obstructing the work area.

3. Verification of Other Options

Option A (20 feet) - Incorrect, as the IFC mandates a 30-foot minimum distance.

Option C (40 feet) - Incorrect, as this exceeds the maximum distance allowed under the fire code.

Option D (50 feet) - Incorrect, as fire extinguishers must be closer to provide effective fire suppression.

Reference Sources:

International Fire Code (IFC) 2021 - Section 3504.2.6 (Fire Extinguishers for Hot Work) NFPA 51B: Standard for Fire

Prevention During Welding, Cutting, and Other Hot Work ICC Fire Inspector II Study Guide (2021) Thus, the correct and verified answer is: B. 30 feet. #

#### NEW QUESTION # 41

Foamed plastics or materials containing foamed plastics used for stage scenery must be approved when tested in accordance with

- A. NFPA 11A
- **B. UL 1975**
- C. ASTM D 1784
- D. CPSC 16CFR

**Answer: B**

Explanation:

Foamed plastics or materials containing foamed plastics used for stage scenery must meet strict fire performance requirements to prevent rapid flame spread and fire hazards in assembly occupancies.

The correct fire test standard for these materials is UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 807.4.2 (Foamed Plastics for Stage Scenery) IFC 807.4.2 states that foamed plastics used in scenery must be tested and approved per UL 1975 to ensure fire safety.

2. UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes This standard evaluates the flammability and smoke production of foamed plastics used in decorative applications, including stage scenery.

Detailed Explanation of Answer Choices:

Option A (Correct): UL 1975 is the required test standard for foamed plastics used in stage scenery, ensuring compliance with IFC 807.4.2.

Option B (Incorrect): NFPA 11A deals with foam-water fire suppression systems, not foamed plastics for decorative use.

Option C (Incorrect): CPSC 16CFR relates to consumer product safety regulations but does not address fire safety for foamed plastics on stage scenery.

Option D (Incorrect): ASTM D 1784 is a test for rigid PVC plastics and does not apply to foamed plastics used for stage scenery. Thus, the correct and verified answer is: A. UL 1975.

#### NEW QUESTION # 42

A Type I handrail that is not circular shall have a minimum perimeter dimension of \_\_\_\_ inches.

- A. 0
- B. 1.25
- C. 1
- **D. 6.25**

**Answer: D**

Explanation:

According to the 2021 International Fire Code (IFC) and the International Building Code (IBC) Section 1014.3, handrails are categorized into Type I and Type II based on their shape and size requirements.

Type I handrails refer to those that are not circular in shape but still comply with graspability requirements.

IBC Section 1014.3.1 states that:

If a handrail is not circular, it must have a perimeter dimension between 4 inches (minimum) and 6.25 inches (maximum).

The cross-section of such a handrail should provide an adequate grasping surface.

# Correct answer: D. 6.25 inches

## NEW QUESTION # 43

.....

A 67 - Fire Inspector II Exam will not only expand your knowledge but it will polish your abilities as well to advance successfully in the world of International Code Council. Real International Code Council Fire-Inspector-II Exam QUESTIONS certification increases your commitment and professionalism by giving you all the knowledge necessary to work in a professional setting. We have heard from thousands of people who say that using the authentic and Reliable Fire-Inspector-II Exam Dumps was the only way they were able to pass the Fire-Inspector-II.
