## Mule-Arch-202 Valid Test Practice, Practice Mule-Arch-202 Mock

We provide our candidates with valid Mule-Arch-202 vce dumps and the most reliable pass guide for the certification exam. Our IT professionals written the latest Mule-Arch-202 test questions based on the requirement of the certification center, as well as the study materials and test content. By using our online training, you may rest assured that you grasp the key points of Mule-Arch-202 Dumps Torrent for the practice test.

## Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q114-Q119):

### NEW QUESTION # 114

How can developers ensure that streaming operations do not impact the stability of Mule applications?

- A. By employing aggressive data pruning strategies.
- B. By using flow control mechanisms like throttling.
- C. By limiting the number of concurrent streams.
- D. By testing with maximum possible load scenarios.

**Answer: B**

### NEW QUESTION # 115

An organization is implementing a Quote of the Day API that caches today's quote.

Which scenario can use the CloudHub Object Store v2 via the Object Store Connector to persist the cache's state?

- A. When there is one CloudHub deployment of the API implementation to three CloudHub workers/replicas, where all three CloudHub workers/replicas must share the cache state
- B. When there is one deployment of the API implementation to CloudHub and another deployment to a customer-hosted Mule runtime, where both deployments must share the cache state
- C. When there are two CloudHub deployments of the API implementation that must share the cache state, where the API implementations are deployed to two different CloudHub VPNs within the same business group
- D. When there are two CloudHub deployments of the API implementation that must share the cache state, where each API implementation is deployed from a different Anypoint Platform business group to the same CloudHub region

**Answer: A**

#### NEW QUESTION # 116

When designing automated tests for Mule applications, what should be considered to create effective performance tests (Choose Two)

- A. Focusing solely on the security aspects of the application.
- B. Testing only the application's UI responsiveness.
- C. Measuring the throughput and response times of APIs.
- D. Simulating peak load conditions.

**Answer: C,D**

#### NEW QUESTION # 117

A company that is a leading provider of courses and training delivers courses using third party trainers. The trainer for the company has to be verified from 10 different training accreditation verification agencies before providing training for the company. Each training accreditation agency has its own response time, which could take days to confirm a trainer.

The company decided to automate the trainer accreditation verification process by integrating to the agencies' web services.

What is the recommended approach to automate this process?

- A. Make an apex callout using @future annotation to make the call out to all different agencies. The response should update the trainer status to "verified".
- B. Use salesforce external service to make the call out, Salesforce external service should check the verification agencies until the result is verified, then update the trainer status to "verified".
- C. Use middleware to handle the call out to the 10 different verification services, the middleware will handle the business logic of consolidating the verification result from t 10 services, then make a call-in to salesforce and update the verification status to "verified".
- D. Create a trigger on the trainer record to make a Callout to each verification agencies, write business logic to consolidate the verification then update the trainer status to verified".

**Answer: C**

#### NEW QUESTION # 118

Refer to the exhibit.

A telecommunications company receives orders (bill payments) from customers who submit a simple HTML form (no JavaScript or Web Assembly). Currently the process is synchronous and the customer is notified after everything is complete. The requirement is that the customer is notified of payment (charging the customer's credit card) through the response to the browser, but the customer can also be notified when the order is applied to the customer's account at a later time. Due to an increase in customers, the system has been unable to handle the load and the solution has been experiencing performance and reliability issues. Which request point could be replaced with an event-driven API using a JMS queue to help mitigate the performance issues, increase the fault tolerance, and meet the requirements?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

## NEW QUESTION # 119

.....

We declare that we can ensure you 100% pass, because we have the real exam questions for the Mule-Arch-202 actual test. All the questions of Salesforce Mule-Arch-202 test pdf are taken from current pool of actual test, then after refined and checked, compiled into the complete dumps. Furthermore, the answers are correct and verified by our IT experts with decades of hands-on experience. So the high quality and accuracy of Mule-Arch-202 Cert Guide are without any doubt. With our 100 % pass rate history & money back guarantee, you can rest assured to choose our Mule-Arch-202 vce files.
