SAP C-S4CPR-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of a SAP Data Migration Analyst and covers the tools and processes used to migrate legacy data into SAP S • 4HANA Cloud. It includes preparation, validation, execution of data loads, and conducting business process testing to ensure data accuracy and system readiness.
Topic 2	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of a SAP Implementation Specialist and covers how to configure and personalize the SAP Fiori Launchpad. It includes understanding app management, tile groups, catalogs, and business roles to ensure a user-friendly and efficient experience for end users.

Topic 3	• System Landscapes and Identity Access Management: This section of the exam measures skills of a SAP System Administrator and covers basic understanding of the SAP S • 4HANA Cloud system architecture, including identity and access management concepts. It focuses on setting up user roles, managing authorizations, and maintaining secure system access within the SAP landscape.
Topic 4	• Extensibility and Integration: This section of the exam measures skills of a SAP Integration Consultant and covers the basic principles of system extensibility and integration in SAP S • 4HANA Cloud. It touches upon in-app and side-by-side extensions as well as integrating with external systems through APIs and standard tools.
Topic 5	• Implementation and Configuration for Sourcing and Procurement: This section of the exam measures skills of a SAP Sourcing and Procurement Consultant and covers the core configuration tasks required to set up sourcing and procurement processes in SAP S • 4HANA Cloud. It includes implementing purchase requisitions, purchase orders, approvals, sourcing, and invoice management while ensuring alignment with organizational procurement needs.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q21-Q26):

NEW QUESTION # 21
What can you monitor from the Procurement Overview Page? Note: There are 3 correct answers to this question.

- A. Supplier down payments
- B. Request for quotation items
- C. Purchase order items
- D. Supplier EDI messages
- E. Supplier confirmations

Answer: B,C,E

Explanation:
TheProcurement Overview Pagein SAP S/4HANA Cloud Public Edition provides a centralized dashboard to monitor key procurement activities. Below is an explanation of the correct answers:
* Request for quotation items (A):The overview page allows users to track request for quotation (RFQ) items, ensuring timely responses from suppliers and efficient sourcing processes.
* Supplier confirmations (C):Supplier confirmations, such as order acknowledgments or shipping notifications, can be monitored to ensure alignment between purchase orders and supplier actions.
* Purchase order items (D):Purchase order items are displayed on the overview page to track their status, including delivery schedules, confirmations, and invoices.
* Supplier EDI messages (B):While EDI messages are part of procurement integration, they are not directly monitored on the Procurement Overview Page.
* Supplier down payments (E):Down payments are managed in financial processes and are not typically monitored on the Procurement Overview Page.

SAP Best Practices Explorer:Procurement Monitoring

NEW QUESTION # 22
What is the purpose of the Redistribute Workload SAP Fiori app?

- A. Reassign purchasing group in the purchasing documents
- B. Reassign purchase requisitions to the purchasers
- C. Reassign approval work items to relevant approvers
- D. Reassign purchase orders to the purchasers

Answer: B

Explanation:

TheRedistribute WorkloadSAP Fiori app is specifically designed to help balance the workload among purchasers by reassigning purchase requisitions. Below is an explanation of the correct answer:
* Reassign purchase requisitions to the purchasers (D):This app allows you to redistribute purchase requisitions from one purchaser to another, ensuring an equitable distribution of tasks and preventing bottlenecks in the procurement process.
* Reassign purchase orders to the purchasers (A):The app does not handle purchase orders but focuses on purchase requisitions.
* Reassign approval work items to relevant approvers (B):Approval workflows are managed through separate apps or tools, not the Redistribute Workload app.
* Reassign purchasing group in the purchasing documents (C):Changing the purchasing group is done during document creation or modification, not through this app.
References:SAP Help Portal:Redistribute Workload App
SAP Best Practices Explorer:Procurement Workload Management

NEW QUESTION # 23
In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Add new sales organizations.
- B. Change approval thresholds.
- C. Create new scope items.
- D. Modify building blocks.
- E. Add blocking reasons for billing.

Answer: A,B,E

Explanation:
In theProduct-Specific Configuration PhaseofSAP Central Business Configuration, you can perform activities that are specific to configuring the system for your business needs. These activities include setting up organizational structures, defining business processes, and customizing configurations. Below are the three correct answers:
* Add blocking reasons for billing (Option A):Blocking reasons for billing can be configured during the Product-Specific Configuration Phase. This allows organizations to define conditions under which billing documents are blocked for processing. TheSAP S/4HANA Cloud Billing Guideconfirms this capability.
* Change approval thresholds (Option C):Approval thresholds for workflows, such as purchase requisitions or invoices, can be adjusted during this phase. This ensures that the system aligns with the organization's governance and compliance requirements. TheSAP Workflow Configuration Guide documents this functionality.
* Add new sales organizations (Option D):Sales organizations can be added during the Product- Specific Configuration Phase to support the organizational structure required for sales and distribution processes. TheSAP Organizational Structure Guideconfirms this activity.
* B. Create new scope items:Scope items are predefined by SAP and cannot be created during the Product-Specific Configuration Phase. Instead, they are selected during the scoping phase.
* E. Modify building blocks:Building blocks are part of the SAP Best Practices content and cannot be modified directly. Customizations are achieved through configuration settings.
* SAP S/4HANA Cloud Billing Guide:Explains how to configure blocking reasons for billing.
https://help.sap.com
* SAP Workflow Configuration Guide:Provides details on configuring approval thresholds.
* SAP Organizational Structure Guide:Describes how to add sales organizations during the configuration phase.
Why the Other Options Are Incorrect:Key References:

NEW QUESTION # 24
Which embedded support offerings can you make use of in the SAP Fiori Launchpad?Note: There are 3 correct answers to this question.\

- A. Digital assistance from generative Al (SAP Joule)
- B. Assessment questions from the SAP Learning Hub
- C. Recorded webinars from the SAP Learning Website
- D. Video tutorials from the SAP Help Portal
- E. Recorded system simulations from the Learning Center

Answer: A,D,E

NEW QUESTION # 25

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. Permission to migrate the data has been assigned
- B. You select the same migration method previously used for other objects
- C. All previous migration projects are in the "Finished" status
- D. Predecessor objects have been migrated

Answer: A,D

Explanation:
Before migrating data for a specific object inSAP S/4HANA Cloud Public Edition, certain prerequisites must be fulfilled to ensure the migration process is successful and consistent. Based on SAP's official documentation, the following two tasks are mandatory:
* Predecessor objects have been migrated (Option B):In SAP S/4HANA Cloud Public Edition, many objects have dependencies on other objects. For example, before migrating purchase orders, you must ensure that the related vendor master data and material master data have already been migrated. This ensures referential integrity and avoids errors during the migration process. TheSAP Help Portaland SAP Data Migration Guideexplicitly state that predecessor objects must be migrated first to maintain data consistency.
* Permission to migrate the data has been assigned (Option C):To perform data migration, users must have the necessary permissions and roles assigned in the system. These permissions are required to access the migration tools, upload data files, and execute migration projects. Without the appropriate permissions, users will not be able to initiate or complete the migration process. This requirement is documented in theSAP S/4HANA Cloud Security Guideand theSAP Data Migration Best Practices.
* A. You select the same migration method previously used for other objects:While consistency in migration methods can simplify the process, it is not a mandatory requirement. Different objects may require different migration methods based on their complexity and dependencies. SAP allows flexibility in choosing migration methods for each object.
* D. All previous migration projects are in the "Finished" status:It is not mandatory for all previous migration projects to be in the "Finished" status before starting a new migration. However, ensuring that predecessor objects are migrated (as stated in Option B) is critical. Some migration projects can run in parallel, provided there are no dependencies between them.
* SAP Help Portal - Data Migration Overview:Provides an overview of the data migration process, including prerequisites and dependencies.https://help.sap.com
* SAP Data Migration Guide for SAP S/4HANA Cloud Public Edition:Details the steps and prerequisites for migrating data, including the importance of migrating predecessor objects.
* SAP S/4HANA Cloud Security Guide:Explains the role-based permissions required for performing data migration tasks.
* SAP Data Migration Best Practices:Outlines best practices for ensuring a smooth and error-free migration process, including permission assignments and dependency management.
Why the other options are incorrect:Key References:By adhering to these verified guidelines, organizations can ensure a seamless and compliant data migration process in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 26
