It covers implementing resource allocation, communication, sponsorship, stakeholder engagement, learning, measurement, benefits realization, sustainability, and adjusting the plan as needed to achieve desired outcomes.

ACMP Global Certified Change Management Professional Sample Questions (Q61-Q66):

NEW QUESTION # 61

What are three key inputs for developing a sponsorship plan?

- A. Stakeholder analysis, charter and sponsor assessment
- **B. Sponsorship strategy, stakeholder analysis and sponsor assessment**
- C. Sponsor assessment, charter and stakeholder analysis
- D. Sponsorship strategy, stakeholder analysis and charter

Answer: B

Explanation:

ACMP states that asponsorship planis developed using:

* The sponsorship strategy(how sponsors will be engaged overall).

* Stakeholder analysis(to identify where sponsorship is required and what influence sponsors must exercise).

* Sponsor assessment(to understand current sponsor effectiveness and gaps).The charter and business case inform higher-level strategy but are not direct inputs to the sponsorship plan. Therefore, option A accurately lists the three critical inputs.(Reference: ACMP Standard, Process Group 2 - Sponsorship Strategy and Plan; Inputs: Stakeholder analysis and sponsor assessment; Output: Detailed sponsorship plan.)

NEW QUESTION # 62

What are the two inputs in a change impact and readiness strategy that are critically important?

- **A. Stakeholder engagement strategy and change impact assessment**
- B. Stakeholder engagement strategy and sponsor's budget
- C. Stakeholder engagement and resource plan
- D. Stakeholder engagement strategy and impact results

Answer: A

Explanation:

ACMP identifieschange impact assessmentand the stakeholder engagement strategyas the two key inputs for readiness strategy.

Impact assessment determines the depth and scope of change; engagement strategy ensures stakeholders are identified and prepared. Together, these inputs guide readiness activities and tailor interventions. Budget, resource plans, or impact "results" are supportive but not the primary critical inputs.

(Reference: ACMP Standard, Process Group 2 - Change Impact and Readiness Strategy; Inputs: Stakeholder engagement strategy and impact analysis.)

NEW QUESTION # 63

Which plan is used to document continuous improvement steps such as implementing tasks based on feedback and observations?

- A. Stakeholder engagement plan
- B. Learning and development plan
- C. Measurement and benefits realization plan
- **D. Sustainability plan**

Answer: D

Explanation:

Continuous improvement is embedded within the sustainability plan. ACMP emphasizes that sustainability requires monitoring adoption, capturing feedback, and making iterative improvements to ensure the change endures. Learning and development (B) addresses skills, measurement (C) focuses on outcomes, and engagement (D) fosters involvement. Only the sustainability plan (A) formally captures continuous improvement activities.

(Reference: ACMP Standard, Process Group 4 - Sustainability Plan; Activity: Implement feedback-driven continuous improvement to sustain change.)

NEW QUESTION # 64

As a mature company in a heavily regulated industry, what is one of the factors that could limit the organizational capacity to change IT systems?

- A. Extent to which the organization has experience with change management tools
- B. Historical experience with change
- C. External environmental stability
- **D. Operational ability to absorb change**

Answer: D

Explanation:

ACMP identifies change capacity and saturation as key evaluation factors. In a regulated, mature industry, the operational ability to absorb change is often constrained by compliance demands, rigid processes, and simultaneous initiatives. While historical experience and tools matter, the limiting factor is the practical ability of the organization to absorb and execute change without disrupting core operations. Thus, option D is correct.

(Reference: ACMP Standard, Process Group 1 - Evaluate; Activity: Assess change capacity and saturation.)

NEW QUESTION # 65

Which process provides tangible, concrete, measurable and manageable outcomes that represent planned progress towards the adoption of the future state?

- A. Identification of human, financial and information resources
- B. Identification of risks, probability of a risk occurring and mitigation plans
- **C. Identification of goals, objectives and success criteria**
- D. Identification of managers, leaders and other stakeholders

Answer: C

Explanation:

The process of identifying goals, objectives, and success criteria creates measurable outcomes that define progress toward adoption. ACMP stresses that without clearly defined criteria, it is impossible to measure adoption and benefits realization. Resource identification (A), stakeholder roles (C), and risks (D) are important but do not directly provide tangible success measures. Thus, option B aligns with ACMP's requirement for measurable progress.

(Reference: ACMP Standard, Process Group 2 - Formulate; Activity: Define goals, objectives, and criteria for success.)

NEW QUESTION # 66

.....
