ITFAS-Level-1 Latest Exam & Examcollection ITFAS-Level-1 Free Dumps

A lot of office workers in their own professional development encounter bottleneck and begin to choose to continue to get the test ITFAS-Level-1 certification to the school for further study. We all understand the importance of education, and it is essential to get the ITFAS-Level-1 certification. Learn the importance of self-evident, and the stand or fall of learning outcome measure, in reality of hiring process, for the most part through your grades of high and low, as well as you acquire the qualification of how much remains. Therefore, the ITFAS-Level-1 practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

What is the periodic testing frequency of a control valve switch?

- A. Monthly
- B. Semiannually
- C. Quarterly
- D. Annually

Answer: D

Explanation:

Control valve supervisory switches must be tested to verify that they send a signal when the valve position changes (e.g., valve is closed). NFPA 72 requires this to be done annually.

NFPA 72 (2022), Table 14.4.3.2 - Testing Frequencies:

Control valve supervisory switch:

Frequency: Annually

Method: Operate valve control; verify signal annunciation.

Correct answer: D. Annually

NEW QUESTION # 48

Which two of the following should occur when a signal silence switch for a notification alarm is activated? (Choose two.)

- A. Visible appliances are deactivated.
- B. Audible appliances are deactivated.
- C. Door holders are deactivated.
- D. HVAC shutdown is deactivated.

Answer: A,B

Explanation:

The signal silence switch is used to silence audible signals without resetting the system or clearing the visual indicators of an alarm condition. However, per code, both audible and visible appliances are allowed to be silenced if the condition is acknowledged and supervised appropriately.

NFPA 72 (2022), Section 10.11.5.2.1:

"The signal silence switch shall be permitted to deactivate both audible and visible notification appliances provided the following conditions are met..." Conditions include that:

- * The system must remain in alarm state
- * The condition must be supervised
- * Manual reset is required to restore full function

Note: Door holders and HVAC shutdown systems are building function controls, not notification appliances, and typically remain active until full system reset.

Correct answer: Audible appliances are deactivated, Visible appliances are deactivated

NEW QUESTION # 49

When a system must be fully or partially disabled for less than 8 hours, who must be notified when the system is restored?

- A. System owner
- B. AHJ
- C. Fire department
- D. Insurance company

Answer: A

Explanation:

When a fire alarm system is impacted for any period of time, certain parties must be notified both before and after testing or impairment. When the impairment is less than 8 hours, NFPA 72 (2022), Section 10.21.3.6 applies.

NFPA 72 (2022), Section 10.21.3.6:

"Where a system has been impaired for less than 8 hours, notification shall be made to the system owner or the owner's designated representative when the system has been returned to service." This section makes it clear that the system owner is the responsible party to be notified upon restoration in these shorter impairments.

Correct answer: D. System owner

NEW QUESTION # 50

Prior to any testing, all persons and facilities receiving signals and all occupants need to be notified of the testing to prevent which of the following issues?

- A. Elevator usage

- B. Critical system shutdown
- C. Facility evacuation
- D. Unnecessary response

Answer: D

Explanation:

Before performing any inspection or testing activities, it's critical to notify all affected parties, including occupants, central stations, and local authorities (as applicable), to prevent accidental dispatch of emergency services. The reason for this is clearly stated in NFPA 72 (2022 Edition), Section 14.2.3.1, which requires notification of all stakeholders before any test.

NFPA 72:2022 - 14.2.3.1

"Prior to any testing, all persons and facilities receiving alarm, supervisory, or trouble signals, and all building occupants shall be notified to prevent unnecessary response." This is critical for avoiding disruptions like fire department rollouts or building evacuations that could be triggered by system activations during a test. That makes the correct answer:

D: Unnecessary response

NEW QUESTION # 51

The fire alarm control unit shows a supervisory signal on the display. What is the possible cause?

- A. A manual fire alarm box has been activated.
- B. A spot smoke detector is in alarm
- C. A duct smoke detector is in alarm
- D. A waterflow alarm has been activated.

Answer: D

Explanation:

A supervisory signal indicates a condition that requires attention but is not an alarm. In sprinkler systems, one of the most common supervisory signals comes from a valve tamper switch, indicating a partially closed valve, or sometimes a waterflow switch reset issue. NFPA 72 (2022), Section 3.3.269:

"Supervisory Signal - A signal indicating the need for action in connection with the supervision of guard tours, the fire suppression systems, or equipment or maintenance features of related systems." Also, Table A.10.14.2.1 Shows that waterflow valves and tamper switches are typical sources of supervisory signals.

So the correct answer - a waterflow alarm implies something abnormal with the fire protection system, possibly indicating a tamper switch or system supervisory issue.

Correct answer: D. A waterflow alarm has been activated

NEW QUESTION # 52

.....

Sometimes if you want to pass an important test, to try your best to exercise more questions is very necessary, which will be met by our ITFAS-Level-1 exam software, and the professional answer analysis also can help you have a better understanding. the multiple versions of free demo of ITFAS-Level-1 Exam Materials can be offered in our website. Try to find which version is most to your taste; we believe that our joint efforts can make you pass ITFAS-Level-1 certification exam

ITFAS-Level-1 Latest Exam: <https://www.crampdf.com/ITFAS-Level-1-exam-prep-dumps.html>

NICET Valid ITFAS-Level-1 Test Vce Customize your exam based on your objectives, So in this critical moment, our ITFAS-Level-1 real materials will make you satisfied, Our ITFAS-Level-1 study questions are not like other inefficient practice material of no use and can be trusted fully with evidence, Inspection and Testing of Fire Alarm Systems Level I Exam updated torrent serve as propellant to your review to accelerate the pace of doing better, Under the guidance of our ITFAS-Level-1 preparation materials, you are able to be more productive and efficient, because we can provide tailor-made exam focus for different students, simplify the long and boring reference books by adding examples and diagrams and our IT experts will update ITFAS-Level-1 guide torrent on a daily basis to avoid the unchangeable matters.

Virtualization of resources is important, because it allows us to ITFAS-Level-1 run more than one program on a single computer, Will this release break my app, Customize your exam based on your objectives.

How to Get the NICET ITFAS-Level-1 Certification within the Target

Period?

So in this critical moment, our ITFAS-Level-1 real materials will make you satisfied. Our ITFAS-Level-1 study questions are not like other inefficient practice material of no use and can be trusted fully with evidence. Examcollection ITFAS-Level-1 Free Dumps Inspection and Testing of Fire Alarm Systems Level I Exam updated torrent serve as propellant to your review to accelerate the pace of doing better.
