Latest Upload Latest Professional-Cloud-Database-Engineer Dumps Questions - Google New Exam Professional-Cloud-Database-Engineer Materials: Google Cloud Certified - Professional Cloud Database Engineer

DOWNLOAD the newest ValidExam Professional-Cloud-Database-Engineer PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1ww7CFz2-e13FzF6Bv6B9MHy5MaFvuOaH

Three versions for Professional-Cloud-Database-Engineer training materials are available, you can choose one you like according to your own needs. All three versions have free demo for you to have a try. Professional-Cloud-Database-Engineer PDF version is printable and you can learn them anytime and anyplace. Professional-Cloud-Database-Engineer Soft test engine can stimulate the real exam environment, so that you can know the procedures for the exam, and your confidence for Professional-Cloud-Database-Engineer Exam Materials will also be improved. Professional-Cloud-Database-Engineer Online test engine is convenient and easy to learn, it has testing history and performance review, and you can have a general review of what you have learned by this version.

According to the survey, the candidates most want to take Google Professional-Cloud-Database-Engineer test in the current IT certification exams. Of course, the Google Professional-Cloud-Database-Engineer certification is a very important exam which has been certified. In addition, the exam qualification can prove that you have high skills. However, like all the exams, Google Professional-Cloud-Database-Engineer test is also very difficult. To pass the exam is difficult but ValidExam can help you to get Google Professional-Cloud-Database-Engineer certification.

New Exam Professional-Cloud-Database-Engineer Materials, Professional-Cloud-Database-Engineer Reliable Test Tips

About Google Professional-Cloud-Database-Engineer Exam, each candidate is very confused. Everyone has their own different ideas. But the same idea is that this is a very difficult exam. We are all aware of Google Professional-Cloud-Database-Engineer exam is a difficult exam. But as long as we believe ValidExam, this will not be a problem. ValidExam's Google Professional-Cloud-Database-Engineer exam training materials is an essential product for each candidate. It is tailor-made for the candidates who will participate in the exam. You will absolutely pass the exam. If you do not believe, then take a look into the website of ValidExam. You will be surprised, because its daily purchase rate is the highest. Do not miss it, and add to your shoppingcart quickly.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q12-Q17):

NEW QUESTION # 12
You are configuring the networking of a Cloud SQL instance. The only application that connects to this database resides on a Compute Engine VM in the same project as the Cloud SQL instance. The VM and the Cloud SQL instance both use the same VPC network, and both have an external (public) IP address and an internal (private) IP address. You want to improve network security. What should you do?

- A. Disable both the external IP address and the internal IP address, and instead rely on Private Google Access.
- B. Specify an authorized network with the CIDR range of the VM.
- C. Disable and remove the internal IP address assignment.
- D. Disable and remove the external IP address assignment.

Answer: D

Explanation:
It is always more secure to use an internal IP, so removing them doesn't make sense. Eliminate A. You can use Private Google Access when VM instances only have internal IP addresses, so disabling the internal IPs and use Private Google Access doesn't make sense. Eliminate B. Specifying an authorized network when they're on the same subnet doesn't make sense. Eliminate C. A way to improve network security would be to disable external IPs since they're not needed.

NEW QUESTION # 13
You are designing a database architecture for a global application that stores information about public parks worldwide. The application uses the database for read-only purposes, and a centralized batch job updates the database nightly. You want to select an open source, SQL-compliant database. What should you do?

- A. Use Cloud Spanner with multi-region configuration.
- B. Use Cloud SQL for PostgreSQL with cross-region replicas.
- C. Use Memorystore for Redis with multi-zones within a region.
- D. Use Bigtable with multi-region clusters.

Answer: B

NEW QUESTION # 14
Your company is developing a global ecommerce website on Google Cloud. Your development team is working on a shopping cart service that is durable and elastically scalable with live traffic. Business disruptions from unplanned downtime are expected to be less than 5 minutes per month. In addition, the application needs to have very low latency writes. You need a data storage solution that has high write throughput and provides 99.99% uptime. What should you do?

- A. Use Cloud SQL for data storage.
- B. Use Cloud Spanner for data storage.
- C. Use Memorystore for data storage.
- D. Use Bigtable for data storage.

Answer: A

NEW QUESTION # 15

Your organization is running a low-latency reporting application on Microsoft SQL Server. In addition to the database engine, you are using SQL Server Analysis Services (SSAS), SQL Server Reporting Services (SSRS), and SQL Server Integration Services (SSIS) in your on-premises environment. You want to migrate your Microsoft SQL Server database instances to Google Cloud. You need to ensure minimal disruption to the existing architecture during migration. What should you do?

- A. Migrate to Google Kubernetes Engine (GKE).
- B. Migrate to Cloud SQL for PostgreSQL.
- C. Migrate to Compute Engine.
- D. Migrate to Cloud SQL for SQL Server.

Answer: C

Explanation:
https://cloud.google.com/sql/docs/sqlserver/features

NEW QUESTION # 16

You want to migrate an on-premises 100 TB Microsoft SQL Server database to Google Cloud over a 1 Gbps network link. You have 48 hours allowed downtime to migrate this database. What should you do? (Choose two.)

- A. Increase the network bandwidth to 2 Gbps, and then perform an offline data migration.
- B. Keep the network bandwidth at 1 Gbps, and then perform an offline data migration.
- C. Increase the network bandwidth to 10 Gbps, and then perform an offline data migration.
- D. Move the physical database servers from on-premises to Google Cloud.
- E. Use a change data capture (CDC) migration strategy.

Answer: C,E
