## Pass Guaranteed Quiz Latest Adobe - New Study AD0-E117 Questions

The best reason for choosing our AD0-E117 exam torrent as your training materials is its reliability and authenticity. Our latest AD0-E117 vce dumps aimed to meet your exam requirements and making it easy for you to obtain high passing score in the AD0-E117 Actual Test. The learning materials provided by our website cover most of key knowledge of AD0-E117 practice exam and the latest updated exam information.

Adobe AD0-E117 exam, also known as the Adobe Experience Manager Architect Master exam, is designed for professionals who specialize in Adobe Experience Manager (AEM) architecture. Adobe Experience Manager Architect Master certification exam is ideal for architects who are responsible for designing AEM solutions for clients, as well as those who are responsible for managing and implementing AEM projects. AD0-E117 Exam is designed to evaluate the candidate's knowledge and skills in AEM architecture, integration, and deployment.

## Adobe Experience Manager Architect Master Sample Questions (Q78-Q83):

### NEW QUESTION # 78

A client wants to enable SSO in the AEM Authoring instance using SAML for the content authors. The client also wants to onboard their marketing team and design team to use AEM. However, these teams use their personal Adobe ID to login to the Creative and Marketing Cloud products such as Analytics and Target on Admin Console. The client wants to enable the usage of company credentials for all their solutions to enforce standardized security policies. What would the architect propose to meet these requirements?

- **A. Onboard all users to Adobe IMS using Enterprise ID**
- B. Create a new SAML profile in the client IDP to integrate to the Marketing and Creative cloud products

- C. Configure Adobe IMS to forward sign-in for Adobe ID to the client IDP
- D. Onboard all users to Adobe IMS using Federated ID

**Answer: A**

#### NEW QUESTION # 79

A client's marketing pages are generally slow to load which is causing a significant drop in sales. All other AEM pages load within expected performance guidelines regardless of whether the visitor is being served the desktop or mobile experiences.

The marketing pages typically get slower when multiple external campaigns such as Facebook and AdWords drive traffic to those pages. The page performance tends to dip during high traffic periods. Internal campaign clicks such as those from hero images use similar campaign codes as external campaign traffic.

What should the Architect do to resolve this issue?

- A. Add a new dispatcher farm to assist with the client's marketing pages
- **B. Convert the marketing pages to a responsive design instead of an adaptive design**
- C. Modify the dispatcher.any file's section to ignore campaign-based URL parameters
- D. Set AEM to use GZIP compression instead of the web server's compression

**Answer: B**

#### NEW QUESTION # 80

Content editors are uploading and editing thousands of PDFs daily, and notice a slow down of the AEM system over time while searching for assets in the DAM. The PDFs content does not need to be searchable.

What would the AEM architect do to improve performance?

- **A. Disable Tika text extraction for the damAssetLucene index**
- B. Increase the number of maximum parallel jobs for the DAM Update Asset workflows
- C. Upsize the authoring instance to a larger tier
- D. Create a custom Lucene index

**Answer: A**

#### NEW QUESTION # 81

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:

- \* The client currently has a dozen static templates that they want to move to editable templates.
- \* The existing pages use the parsys paragraph system for storing components.
- \* Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
- \* The client wants template authors to be able to create the editable templates.

Which approach should an Architect use to meet these requirements?

- **A. 1. Use a new page component for editable templates based on the core components page component  
2. Migrate page properties to respective components dialogues**
- B. 1. Use the same page components for editable templates  
2. Create a new editable template based on each of the existing page components
- C. 1. Use the same page components for editable templates  
2. Use a new template type for each static template
- D. 1. Use a new page component for editable templates based on the core components page component  
2. Convert page properties to policies

**Answer: A**

Explanation:

Use a new page component for editable templates based on the core components page component and migrate page properties to respective components dialogues<sup>1,2</sup>. According to Adobe Experience Manager documentation<sup>1</sup>, static templates are not considered a best practice and editable templates should be used instead. AEM Modernization tools can help migrate from static to editable templates. Editable templates use core components as their base components<sup>2</sup> and page properties can be migrated to component dialogues using content policies<sup>2</sup>.
