最真實的CV0-004認證考試的題目與答案

如果你確定想要通過CompTIA CV0-004認證考試，那麼你選擇購買NewDumps為你提供的培訓資料是很划算的。因為小小的投資時可以換來很大的收穫，使用NewDumps提供的CompTIA CV0-004認證考試測試題目和練習題可以確保你通過考試的。NewDumps是一個個信譽很高的專門為參加CompTIA CV0-004認證考試的IT專業人士提供模擬題及練習題和答案的網站。

最新的 CompTIA Cloud+ CV0-004 免費考試真題 (Q16-Q21):

問題 #16

A company wants to create a few additional VDIs so support vendors and contractors have a secure method to access the company's cloud environment. When a cloud administrator attempts to create the additional instances in the new locations, the operation is successful in some locations but fails in others. Which of the following is the most likely reason for this failure?

- A. Deprecation of functionality
- B. Partial service outages
- **C. Service quotas**
- D. Regional service availability

答案: C

解題說明:

If a cloud administrator can create additional instances in some locations but not others, the most likely reason for this failure is service quotas. Cloud providers often have quotas on the number of resources that can be created, and these limits can vary by

region.

問題 #17

Which of the following are best practices when working with a source control system? (Select two).

- A. Performing code deployment
- B. Pushing code directly to production
- C. Maintaining one branch for all features
- D. Committing code often
- E. Initiating a pull request
- F. Merging code often

答案: D,F

解題說明:

Best practices when working with a source control system include merging code often to ensure that changes from different team members are integrated regularly, reducing integration issues. Committing code often is also recommended to save small changes frequently, which helps in tracking changes and resolving issues more effectively.

Source control system best practices are part of the software development and deployment guidelines discussed in the CompTIA Cloud+ examination objectives.

問題 #18

Which of the following types of storage provides the greatest performance advantage for a traditional relational database?

- A. File
- B. Object
- C. Block
- D. Ephemeral

答案: C

解題說明:

Block storage provides the greatest performance advantage for traditional relational databases due to its high performance and low-latency characteristics. Block storage allows databases to rapidly manage data in fixed-sized blocks, which is ideal for databases that require frequent read/write operations.

Reference: Understanding different storage types and their use cases, including block storage for databases, is part of the cloud computing knowledge base covered in CompTIA Cloud+.

問題 #19

A cloud engineer is developing an operating expense report that will be used to purchase various cloud billing models for virtual machine instances. The cloud billing model must meet the following requirements:

- * The instance cannot be ephemeral.
- * The minimum life cycle of the instance is expected to be five years.
- * The software license is charged per physical CPU count.

Which of the following models would best meet these requirements?

- A. Pay-as-you-go
- B. Dedicated host
- C. Reserved resources
- D. Spot instance

答案: C

解題說明:

Reserved resources, or Reserved Instances, are ideal for workloads with predictable usage and a long-term commitment, such as a minimum lifecycle of five years. This model allows for significant cost savings compared to on-demand pricing, and the instance is not ephemeral, meaning it persists and is dedicated to the user for the duration of the reservation. The licensing charged per physical CPU count aligns with dedicated host or reserved instance models, but the long-term commitment points more towards reserved

resources.

問題 #20

A systems administrator needs to implement a security control that will prevent unknown malware from infecting a system in case the antivirus solution fails. Which of the following should the administrator implement?

- A. A host-based IDS
- **B. A software whitelist**
- C. File integrity monitoring
- D. Hardened baselines

答案: B

解題說明:

Application whitelisting is the practice of specifying an index of approved software applications or executable files that are permitted to be present and active on a computer system.

The goal of whitelisting is to protect computers and networks from potentially harmful applications.

問題 #21

.....

NewDumps始終致力於為客戶提供高品質的學習資料，來提高考生一次性通過CompTIA CV0-004考試的概率，這是考生獲取認證最佳捷徑。我們的CV0-004認證PDF和軟件版本具有最新更新的問題解答，涵蓋了所有考試題目和課題大綱，在線測試引擎測試可以幫助您準備并熟悉實際考試情況。在您決定購買我們產品之前，您可以先免費嘗試CompTIA CV0-004 PDF版本的DEMO，此外，我們還提供全天24/7的在線支持，以便為客戶提供最好的便利服務。
