SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q43-Q48):

NEW QUESTION # 43
What can you use input controls for in a story? Note: There are 2 correct answers to this question.

- A. Filtering data on a page
- B. Implementing row-level and column-level security in a table
- C. Selecting an alternate data source
- D. Changing dimensions or measures displayed in a table

Answer: A,D

Explanation:
Input controls in a story in SAP Analytics Cloud can be used for changing dimensions or measures displayed in a table and for filtering data on a page. Input controls provide a way for users to interactively modify the view of the data, such as selecting which dimensions or measures to display, or filtering the entire page's content based on selected criteria, enhancing the interactivity and flexibility of data analysis within stories.
Reference:
SAP Analytics Cloud Help Documentation: Input Controls in Stories
SAP Analytics Cloud User Guide: Using Input Controls for Data Interaction

NEW QUESTION # 44
The SAP Analytics Cloud (SAC) modeler has removed the first three characters from an SAP Analytics Cloud public dimension imported from a source system. What is impacted by this change?

- A. Public datasets
- B. Stories
- C. Source system
- D. Embedded data sets

Answer: B

Explanation:
When the SAP Analytics Cloud (SAC) modeler removes the first three characters from a public dimension imported from a source system, this change impacts Stories that use this dimension. Specifically, any visualizations, calculations, or filters within those stories that rely on the original dimension values may need to be adjusted to account for the change. This modification does not affect the source system or public datasets directly, but it can impact how the data appears and behaves in stories that use the modified dimension.

SAP Analytics Cloud User Guide: Impact of Dimension Changes on Stories

NEW QUESTION # 45
Which calculation types include dynamic date options? Note: There are 2 correct answers to this Question.

- A. Restricted Measure
- B. Date Difference
- C. Difference From
- D. Aggregation

Answer: A,C

NEW QUESTION # 46

Which tasks can you perform in data analyzer? Note: There are 2 correct answers to this question.

- A. Drill down on data
- B. Filter data
- C. Input data
- D. Create cross-calculation

Answer: A,B

Explanation:
In Data Analyzer, users can perform various tasks to analyze their data, including filtering data and drilling down on data. Filtering allows users to narrow down the dataset to focus on specific subsets of data, enhancing the analysis's relevancy. Drilling down provides the ability to explore data at a more granular level, revealing deeper insights into the data points and trends within the larger dataset.
