(A) provoke (B) counter (C) expose (D) convert
- Corrupt officials and misguided policies have _____ the country's economy and burdened its people with enormous foreign debts.
(A) crippled (B) accelerated (C) rendered (D) ventured
- As a record number of fans showed up for the baseball final, the highways around the stadium were _____ with traffic all day.
(A) choked (B) disturbed (C) enclosed (D) injected
- Studies show that the _____ unbiased media are in fact often deeply influenced by political ideology.
(A) undoubtedly (B) roughly (C) understandably (D) supposedly

二、綜合測驗（占10分）

說明：第11題至第20題為單選題，每題1分。

此外，這些Fast2test NSK300考試題庫的部分內容現在是免費的：<https://drive.google.com/open?id=1kD8SRbs53KQ44Gc9SoDXk7crwmbUKjGy>

在這個什麼都不斷上漲除了工資不上漲的年代裏，難道你不想突破自己嗎，讓工資翻倍，這也不是不可能，只要通過Netskope的NSK300考試認證，你將會得到你想要的，而Fast2test將會為你提供最好的培訓資料，讓你安心的通過考試並獲得認證，它的通過率達到100%，讓你不得不驚歎，這確實是真的，不用懷疑，不用考慮，馬上就行動吧。

Netskope NSK300 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"> Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.

主題 2	<ul style="list-style-type: none"> • Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.
主題 3	<ul style="list-style-type: none"> • Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.
主題 4	<ul style="list-style-type: none"> • Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.
主題 5	<ul style="list-style-type: none"> • Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.

NSK300資料， NSK300題庫

在這裏我要說明的是這Fast2test一個有核心價值的問題，所有Netskope的NSK300考試都是非常重要的，但在個資訊化快速發展的時代，Fast2test只是其中一個，為什麼大多數人選擇Fast2test，是因為Fast2test所提供的考題資料一定能幫助你通過測試，為什麼呢，因為它提供的資料都是最新的培訓工具不斷更新，不斷變換的認證考試目標，為你提供最新的考試認證研究資料，有了Fast2test Netskope的NSK300，你看到考試將會信心百倍，不用擔心任何考不過的風險，讓你毫不費力的獲得認證。

最新的 Netskope NCCSA NSK300 免費考試真題 (Q47-Q52):

問題 #47

Review the exhibit.

You created an SSL decryption policy to bypass the inspection of financial and accounting Web categories.

However, you still see banking websites being inspected.

Referring to the exhibit, what are two possible causes of this behavior? (Choose two.)

- A. The policy is in a "disabled" state.
- B. The policy is in a "pending changes" state.
- C. An incorrect action has been specified.
- D. An incorrect category has been selected

答案： B,C

問題 #48

A company has deployed Explicit Proxy over Tunnel (EPoT) for their VDI users. They have configured Forward Proxy authentication using Okta Universal Directory. They have also configured a number of Real-time Protection policies that block access to different Web categories for different AD groups. So, for example, marketing users are blocked from accessing gambling sites. During User Acceptance Testing, they see inconsistent results where sometimes marketing users are able to access gambling sites and sometimes they are blocked as expected. They are seeing this inconsistency based on who logs into the VDI server first. What is causing this behavior?

- A. Forward Proxy is not configured to use the IP Surrogate
- **B. Forward Proxy is not configured to use the Cookie Surrogate**
- C. Forward Proxy is configured to use the Cookie Surrogate
- D. Forward Proxy authentication is configured but not enabled.

答案: B

解題說明:

* The inconsistent results observed during User Acceptance Testing (where marketing users sometimes access gambling sites and sometimes are blocked) are likely due to the configuration of the Forward Proxy.

* Cookie Surrogate: The Cookie Surrogate is a mechanism used in Forward Proxy deployments to maintain user context across multiple requests. It ensures that user-specific policies are consistently applied even when multiple users share the same IP address (common in VDI environments).

* Issue: If the Forward Proxy is not configured to use the Cookie Surrogate, it may lead to inconsistent behavior. When different users log into the VDI server, their requests may not be associated with their specific user context, resulting in varying policy enforcement.

* Solution: Ensure that the Forward Proxy is properly configured to use the Cookie Surrogate, allowing consistent policy enforcement based on individual user identities. References:

問題 #49

You have enabled CASB traffic steering using the Netskope Client, but have not yet enabled a Real-time Protection policy. What is the default behavior of the traffic in this scenario?

- A. Traffic will be allowed, but not logged.
- **B. Traffic will be allowed and logged.**
- C. Traffic will be blocked and logged.
- D. Traffic will be blocked, but not logged.

答案: B

解題說明:

In the scenario where CASB traffic steering is enabled using the Netskope Client without a Real-time Protection policy being activated, the default behavior of the traffic is to allow and log it (B). This means that the traffic will not be blocked; instead, it will be permitted to pass through and will be recorded for monitoring and analysis purposes. This default setting ensures visibility into the traffic and user activities without immediately enforcing a block, allowing for a period of observation and policy tuning before potentially more restrictive actions are taken.

The default behavior of traffic steering in Netskope, including the logging of allowed traffic, is detailed in Netskope's best practices and community discussions on Real-time Protection policies.

問題 #50

Review the exhibit.

* dependent on the type of profile and applications you selected.

The screenshot shows a configuration interface for a security policy. At the top, there is a dropdown menu for 'User' set to 'All Users: click to select subset of users'. Below it is a section for 'Application' with a dropdown set to 'Microsoft OneDrive'. Underneath, 'ACTIVITIES & CONSTRAINTS' shows 'Activity = Upload'. A second 'ADD CRITERIA' section contains a 'DLP Profile' dropdown with three options: 'DLP-SourceCode (predefined)', 'DLP-PCI (predefined)', and 'DLP-PII (predefined)'. Below this is a table for 'PROFILE ACTION':

PROFILE ACTION	
DLP-SourceCode	Alert
DLP-PCI	Block : Default Template
DLP-PII	Useralert : Default Template

Below the table, there is a checkbox 'Set action for each profile' which is checked. At the bottom, there is a 'Sample' input field and expandable sections for '+ POLICY DESCRIPTION' and '+ EMAIL NOTIFICATION'. A watermark 'tw.fast2test.com' and 'Fast2Test FIRST TEST, FIRST PASS!' are visible over the interface.

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data. Referring to the exhibit, which statement is correct?

- A. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.
- B. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- C. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.
- D. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.

答案： A

解題說明：

In the given scenario, a user is attempting to upload a file containing sensitive PII and PCI data to Microsoft OneDrive. The Netskope Security Cloud provides real-time data and threat protection when accessing cloud services, websites, and private apps from anywhere, on any device. Based on the exhibit provided, different DLP (Data Loss Prevention) profiles are triggered - DLP-SourceCode, DLP-PCI, and DLP-PII. Each of these profiles has specific actions associated with them; for instance, an alert is generated for Source Code while blocking actions are initiated for PCI and PII data. Since multiple DLP profiles are triggered due to the sensitive nature of the content in the file being uploaded, separate incidents will be generated for each matching profile ensuring comprehensive security coverage and incident reporting.

問題 #51

Review the exhibit.

† dependent on the type of profile and applications you selected.

User = All Users: click to select subset of users

ADD CRITERIA +

Application -

Application = Microsoft OneDrive

ACTIVITIES & CONSTRAINTS EDIT

Activity = Upload

ADD CRITERIA +

DLP Profile = DLP-SourceCode (predefined) DLP-PCI (predefined) DLP-PII (predefined)

PROFILE ACTION

Alert	...
Block: Default Template	...
Useralert: Default Template	...

Set action for each profile

+ ADD TRAFFIC ACTION

Sample

+ POLICY DESCRIPTION

+ EMAIL NOTIFICATION

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data. Referring to the exhibit, which statement is correct?

- A. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.
- B. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles
- C. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.
- D. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.

答案： A

問題 #52

.....

我們的Netskope NSK300 認證考試的最新培訓資料是Fast2test的專業團隊不斷地研究出來的，可以幫很多人成就夢想。在現在的競爭激烈的IT行業中，想要穩固自己的地位，就得向專業人士證明自己的知識和技術水準。Netskope NSK300 認證考試是一個很好的證明自己能力的考試。有了Netskope NSK300認證證書，你工作會有很大的變化，工資和工作職位都會有所提升。
