PMI-ACP (PMI Agile Certified Practitioner) Exam is a certification program that is designed to validate an individual's knowledge and expertise in agile methodologies. The PMI-ACP exam is offered by the Project Management Institute (PMI), a globally recognized organization that is dedicated to promoting excellence in the field of project management. The PMI-ACP certification is highly sought after by professionals who are involved in agile projects, as it demonstrates their proficiency in agile methodologies and their commitment to continuous improvement.

PMI-ACP certification exam is a computer-based test that consists of 120 multiple-choice questions. Candidates have three hours to complete the exam, and they must achieve a passing score of 70% or higher to become certified. PMI-ACP Exam is designed to test the candidate's knowledge and understanding of agile principles and methodologies, as well as their ability to apply agile concepts in real-world situations.

Explanation:

#### NEW QUESTION # 1021

During a backlog refinement meeting, a senior team member raises a concern about an epic sizing that requires the use of a new interface for a vendor product. The product owner acknowledges this as a risk.

What should the product owner do now?

- A. Create a spike story to determine what needs to be done to use the new interface.
- B. Log the risk in the risk register, and share the information with impacted stakeholders at the next monthly review meeting.
- C. Lower the epic's priority so that it can be deferred, and analyze it during backlog refinement meetings.
- D. Move the work to the vendor, since they have better knowledge of interface implementation.

**Answer: A**

#### NEW QUESTION # 1022

What should a scrum master do when an agile team member is behind on their tasks?

- A. Inform key stakeholders
- B. Ask the team for suggestions.
- C. Move the tasks to another team member who has spare capacity in the sprint.
- D. Hold a one-on-one meeting to encourage the team member to meet task commitments.

**Answer: D**

#### NEW QUESTION # 1023

How should the agile team address this?

- A. Conduct an internal review to validate functionality before shipping
- B. Lengthen iterations to ensure there is sufficient time to build functionality
- C. Audit the quality control process to ensure that the product adheres to requirements
- D. Hold product review sessions with the client to obtain product acceptance
