**Practical 220-1102 Latest Material | Easy To Study and Pass Exam at first attempt & Efficient CompTIA CompTIA A+ Certification Exam: Core 2**

One can start using product of Pass4sures instantly after buying. The 24/7 support system is available for the customers so that they don't stick to any problems. If they do so, they can contact the support system, which will assist them in the right way and solve their issues. A lot of CompTIA A+ Certification Exam: Core 2 (220-1102) exam applicants have used the CompTIA A+ Certification Exam: Core 2 (220-1102) practice material. They are satisfied with it because it is updated.

## CompTIA A+ Certification Exam: Core 2 Sample Questions (Q52-Q57):

### NEW QUESTION # 52

An organization is creating guidelines for the incorporation of generative AI solutions. In which of the following would these guidelines be published?

- A. Data flow diagram
- B. Security protocols
- C. Acceptable use policy
- D. Standard operating procedure

**Answer: C**

Explanation:

Explanation

An acceptable use policy (AUP) is a document that defines the rules and expectations for the users of a system, network, or service. It typically covers topics such as the purpose, scope, responsibilities, and restrictions of using the system, network, or service<sup>1</sup>. An AUP is a suitable place to publish the guidelines for the incorporation of generative AI solutions, as it can inform the users of the benefits, risks, and ethical implications of using such tools. It can also specify the conditions and limitations for using generative AI solutions, such as the types of data, content, and applications that are allowed or prohibited, the security and privacy requirements, the legal and regulatory compliance, and the accountability and reporting mechanisms<sup>23</sup>.

### NEW QUESTION # 53

A technician is setting up backup and recovery solutions that must restore quickly. Storage space is not a factor. Which of the following backup methods should the technician implement?

- A. Synthetic
- B. Differential
- C. Full
- D. Incremental

**Answer: C**

Explanation:

The correct answer is C. Full Backup.

\* A Full Backup creates a complete copy of all selected data every time it runs. This method ensures the fastest possible recovery time because all the necessary data is contained in a single backup file.

\* Since storage space is not a concern, full backups are ideal because they avoid the need to restore multiple incremental or differential backups.

\* Recovery Time Objective (RTO) is minimized, making full backups the best choice for quick restoration.

Why Other Options Are Incorrect:

\* A. Differential Backup - Backs up only the data that has changed since the last full backup. While faster to restore than an incremental backup, it still requires both the last full backup and the most recent differential backup for restoration.

\* B. Synthetic Backup - A synthetic full backup is created by combining previous full and incremental backups without needing to back up data again from the source. While efficient in terms of backup creation, restoration can be slower compared to a traditional full backup.

\* D. Incremental Backup - Backs up only data that has changed since the last backup (whether full or incremental). While efficient in storage, restoring from incremental backups can be slow because multiple backups must be restored in sequence.

CompTIA A+ 220-1102 Exam Reference:

\* Objective 4.3 - Given a scenario, apply best practices to secure a workstation.

\* Objective 4.4 - Given a scenario, implement methods for securing mobile devices.

#### NEW QUESTION # 54

A systems administrator received a request to limit the amount of cellular data a user's Windows 10 tablet can utilize when traveling. Which of the following can the administrator do to best solve the user's issue?

- A. Enable the Windows Defender Firewall.
- B. Turn on airplane mode.
- C. Set the connection to be metered.
- D. Configure the device to use a static IP address.

**Answer: C**

Explanation:

Setting the connection to be metered is the best solution for limiting the amount of cellular data a user's Windows 10 tablet can utilize when traveling. A metered connection is a network connection that has a data limit or charges fees based on the amount of data used. Windows 10 allows users to set any network connection as metered, which reduces the amount of data that Windows and some apps use in the background. For example, setting a connection as metered will prevent Windows from downloading updates automatically, stop some apps from syncing data online, and disable some live tiles on the Start menu. Setting a connection as metered can help users save cellular data and avoid extra charges when traveling. Turning on airplane mode, configuring the device to use a static IP address, and enabling the Windows Defender Firewall are not effective solutions for limiting the amount of cellular data a user's Windows 10 tablet can utilize when traveling. Turning on airplane mode will disable all wireless connections on the device, including Wi-Fi, Bluetooth, and cellular data. This will prevent the user from accessing any online services or applications on the tablet. Configuring the device to use a static IP address will assign a fixed IP address to the device instead of obtaining one dynamically from a DHCP server. This will not affect the amount of cellular data the device uses, and it may cause IP conflicts or connectivity issues on some networks. Enabling the Windows Defender Firewall will block or allow incoming and outgoing network traffic based on predefined or custom rules. This will not reduce the amount of cellular data the device uses, and it may interfere with some apps or services that require network access. Reference:

#### NEW QUESTION # 55

A wireless network is set up, but it is experiencing some interference from other nearby SSIDs. Which of the following can BEST resolve the interference?

- A. Modifying the wireless security
- B. Changing channels
- C. Disabling the SSID broadcast
- D. Changing the access point name

**Answer: B**

Explanation:

Explanation

Changing channels can best resolve interference from other nearby SSIDs. Wireless networks operate on different channels, and changing the channel can help to avoid interference from other nearby networks.

#### NEW QUESTION # 56

While accessing a website, a user clicks on a menu option and nothing happens. Which of the following actions should the user take to most likely resolve this issue?

- A. Enable TLS 1.0 in the browser.
- B. Enable private-browsing mode.
- C. Clear the cache.
- D. Disable pop-up blocker.

**Answer: A**
