## Microsoft Azure Security Technologies Sample Questions (Q350-Q355):

### NEW QUESTION # 350

You have an Azure subscription that contains the alerts shown in the following exhibit.

**All Alerts**

Don't see a subscription? [Open Directory](#) + [Subscription settings](#)

+ New alert rule    ≡ Edit columns    ⚙ Manage alert rules    🔔 View classic alerts    ↻ Refresh    ✓ Change state

\* Subscription: Azure Pass - Sponsorship    Resource group: Type to start filtering ...    Resource type: 0 selected    Resource: Type to start filtering ...    Time range: Past hour

Monitor service: 15 selected    Monitor condition: 2 selected    Severity: Sev 4    Alert state: 3 selected    Smart group id: Smart group id

**All Alerts**    Alerts By Smart Group (Preview)

Search by name (case-insensitive)

NAME	SEVERITY	MONITOR C...	ALERT STATE	AFFECT...	MONITOR SERV...	SIGNAL TYPE	FIRED TIME	SU...
Alert1	Sev4	Fired	New		ActivityLog Ad...	Log	6/6/2019, 11:23:53 ...	Azure ...
Alert1	Sev4	Fired	Acknowledged		ActivityLog Ad...	Log	6/6/2019, 11:23:52 ...	Azure ...
Alert2	Sev4	Fired	Acknowledged		ActivityLog Ad...	Log	6/6/2019, 11:23:25 ...	Azure ...
Alert2	Sev4	Fired	Closed		ActivityLog Ad...	Log	6/6/2019, 11:23:24 ...	Azure ...

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

The state of Alert1 that was fired at 11:23:52

cannot be changed  
can be changed to Closed only  
can be changed to New only  
can be changed to New or Closed

The state of Alert2 that was fired at 11:23:24

cannot be changed  
can be changed to Acknowledged only  
can be changed to New only  
can be changed to New or Acknowledged

**Answer:**

**Explanation:**

The state of Alert1 that was fired at 11:23:52

▼

cannot be changed

can be changed to Closed only

can be changed to New only

can be changed to New or Closed

The state of Alert2 that was fired at 11:23:24

▼

cannot be changed

can be changed to Acknowledged only

can be changed to New only

can be changed to New or Acknowledged

### NEW QUESTION # 351

You have an Azure subscription that contains an Azure SQL database named SQLDB1. SQLDB1 contains the columns shown in the following table.

Name	Data type	Sample value
Email	Varchar	admin@contoso.com
Birthday	Date	2010-07-07

For the Email and Birthday columns, you implement dynamic data masking by using the default masking function.

Which value will the users see in each column? To answer, drag the appropriate values to the correct columns. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values

1900-01-01

1900-01-01 00:00:00.0000

2010-XX-XX

XXXX

Answer Area

Email:

Birthday:

Answer:

Explanation:

Values

1900-01-01

1900-01-01 00:00:00.0000

2010-XX-XX

XXXX

Answer Area

Email:

Birthday:

### NEW QUESTION # 352

You have an Azure subscription that contains a key vault and an Azure SQL server.

You need to deploy an Azure SQL database that uses Transparent Data Encryption (TDE) and a customer- managed key.

What should you create before you deploy the database?

- A. An app registration
- **B. A user-assigned managed identity**
- C. A standard general-purpose v2 storage account
- D. A user account that is assigned the SQL Security Manager role

Answer: B

#### NEW QUESTION # 353

You have an Azure subscription named Sub1 that is associated to an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to implement an application that will consist of the resources shown in the following table.

Name	Type	Description
CosmosDBAccount1	Azure Cosmos DB account	A Cosmos DB account containing a database Named CosmosDB1 that serves as a back-end tier of the application
WebApp1	Azure web app	A web app configured to serve as the middle tier of the application

Users will authenticate by using their Azure AD user account and access the Cosmos DB account by using resource tokens.

You need to identify which tasks will be implemented in CosmosDB1 and WebApp1.

Which task should you identify for each resource? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

CosmosDB1:  ▼

- Authenticate Azure AD users and generate resource tokens.
- Authenticate Azure AD users and relay resource tokens.
- Create database users and generate resource tokens.

WebApp1:  ▼

- Authenticate Azure AD users and generate resource tokens.
- Authenticate Azure AD users and relay resource tokens.
- Create database users and generate resource tokens.

Answer:

Explanation:

CosmosDB1:  ▼

- Authenticate Azure AD users and generate resource tokens.
- Authenticate Azure AD users and relay resource tokens.
- Create database users and generate resource tokens.

WebApp1:  ▼

- Authenticate Azure AD users and generate resource tokens.
- Authenticate Azure AD users and relay resource tokens.
- Create database users and generate resource tokens.
