

New 300-830 Test Blueprint - Reliable 300-830 Exam Voucher

The screenshot shows a webpage with a dark background and a grid of icons. The main heading is "77200X Reliable Exam Testing, New 77200X Test Blueprint". Below this, there is a paragraph of text: "In such industry where all people take the time to invest, choosing IT Tests to help you pass the Avaya certification 77200X exam is sure effective. If you choose IT Tests, we promise that we will try our best to help you pass the exam and also provide you with the year free update service. If you do not pass the exam, we will give you a full refund." Below the text is a section titled "For more info, visit" followed by a link "Avaya 77200X Exam Reference". There is also a section titled "What is the duration, language, and format of Avaya 77200X: Avaya IP Office™ Platform Basic Integration and Configuration Exam" with a list of details: "• Passing Score: 72%", "• Format: Multiple choice, multiple answers", "• Length of Exam: 60 minutes", "• Number of Questions: 45", "• Language: English". At the bottom, there is a section titled "Quiz Avaya - 77200X - Reliable Avaya IP Office™ Platform Basic Integration and Configuration Exam Reliable Exam Testing" with a short paragraph: "Our company keeps pace with contemporary talent development and makes every exam an RL in the needs of the industry. Get it all advanced technological capabilities, use 77200X study materials, and..."

We believe that if you trust our 300-830 exam simulator and we will help you obtain 300-830 certification easily. After purchasing, you can receive our 300-830 training material and download within 10 minutes. Besides, we provide one year free updates of our 300-830 learning guide for you and money back guaranteed policy so that we are sure that it will give you free-shopping experience. Now choose our 300-830 practic braindump, you will not regret.

Test your knowledge of the 300-830 exam dumps with Cisco 300-830 practice questions. The software is designed to help with Implementing Cisco Collaboration Cloud Customer Experience (300-830) exam dumps preparation. Cisco 300-830 Practice Test software can be used on devices that range from mobile devices to desktop computers.

100% Pass-Rate New 300-830 Test Blueprint Provide Prefect Assistance in 300-830 Preparation

Getting tired of humdrum life, you may want to get some successful feeling or try something different instead. We all know that is of important to pass the 300-830 exam and get the 300-830 certification for someone who wants to find a good job in internet area, and it is not a simple thing to prepare for exam. So you are in the right place now. The 300-830 practice materials are a great beginning to prepare your exam. Actually, just think of our 300-830 practice materials as the best way to pass the exam is myopic.

They can not only achieve this, but ingeniously help you remember more content at the same time.

Cisco Implementing Cisco Collaboration Cloud Customer Experience Sample Questions (Q53-Q58):

NEW QUESTION # 53

What are the two types of Local Gateway trunking models with Webex Calling? (Choose two.)

- A. certificate-based trunks
- B. PSTN trunks
- C. DNS-based trunks
- D. enterprise trunks
- E. registration-based trunks

Answer: A,E

Explanation:

Cisco documents two Local Gateway trunking models for Webex Calling: registration-based trunks and certificate-based trunks. A registration-based trunk has the local gateway maintain SIP registration toward Webex Calling, and the signaling relationship is established through that registration. Cisco's trunk and dial plan documentation describes this model as an implicit connection based on the gateway's registration. A certificate-based trunk uses mutual TLS and certificate trust to authenticate signaling without SIP registration in the same way. These are the formal trunking choices used when integrating on-premises voice infrastructure with Webex Calling and, by extension, supporting Webex Contact Center telephony designs that use Local Gateway. DNS-based trunks are not a Cisco trunking model name in this context. PSTN trunks and enterprise trunks are generic or design descriptions, not the two Local Gateway models. For 300-830, the key is recognizing the official Webex Calling trunk model terminology. Reference: Cisco Help, Configure Local Gateway on Cisco IOS XE for Webex Calling; Configure trunks, route groups, and dial plans for Webex Calling.

NEW QUESTION # 54

Which action must an administrator take in a Webex Contact Center voice flow to ensure that, after a customer selects option 2 for Spanish in the initial language menu, all AI Agent responses are delivered in Spanish using a consistent, professional executive-sounding Spanish voice, regardless of the caller's location or dialect?

- A. Set the Global_Language and Global_VoiceName variables to the default system string value "en-ES" to activate Spanish interaction.
- B. Set the Global_Language variable to "es-ES" and Global_VoiceName to the company-approved Spanish voice system name.
- C. Assign a friendly voice name to the Global_VoiceName variable and add a Global-Language variable with the default language setting.
- D. Change only the Global_Language variable to "es-ES," as this global variable entity dictates both aspects, i.e., language and voice.

Answer: B

Explanation:

The flow must explicitly set the global language variable to the required Spanish locale and set the global voice-name variable to the approved Spanish voice system name. This ensures the AI Agent uses Spanish for responses and applies the intended consistent voice regardless of caller location or dialect.

NEW QUESTION # 55

A Webex Contact Center engineer is configuring a new Webex Contact Center tenant and wants to implement digital channels. Which two actions must be taken before setting up digital channels? (Choose two.)

- A. Complete Webex CC Task integration authorization in Webex Connect.
- B. Complete Webex CC Task integration authorization in Webex Engage.
- C. Complete Webex CC Engage integration authorization in Webex Engage.
- D. Complete WxCC Task integration authorization in Webex Engage.
- E. Complete Webex CC Engage integration authorization in Webex Connect.

Answer: A,E

Explanation:

Before configuring Webex Contact Center digital channels, the integration nodes in Webex Connect must be authorized. Cisco's digital-channel setup documentation explicitly requires completing node authorization in Webex Connect and setting both Webex CC Task and Webex CC Engage nodes to Authorized state. The Task integration lets Webex Connect communicate with Webex Contact Center for task creation, queuing, routing notifications, and task resolution. The Engage integration lets Webex Connect work with conversation objects in Webex Engage, such as creating, appending, resolving, and updating conversations. The wording in the incorrect options places authorization in Webex Engage, but Cisco's procedure puts the pre-built integration authorization under Webex Connect assets and integrations. Digital channel setup depends on those authorizations because the flow cannot queue or resolve a conversation through WxCC without valid access tokens. Therefore, Webex CC Engage and Webex CC Task integration authorization in Webex Connect are the prerequisites. Reference: Cisco Help, Set up digital channels in Webex Contact Center; Webex Connect Help, Webex CC Task Integration Nodes and Node Authorizations.

NEW QUESTION # 56

Which two domains must be allowed through the firewall or VPN of the organization to ensure that the WxCC Agent Desktop can connect and function correctly? (Choose two.)

- A. *.wbx.com:443
- B. *.ucce.com:443
- C. *.wxcc.com:443
- D. *.amazonaws.com
- E. *.ciscoocservice.com:443

Answer: A,E

Explanation:

Agent Desktop connectivity depends on the Webex service domains and the Contact Center service domain being reachable over HTTPS. Cisco's security and network documentation for Webex Contact Center includes domain allow-listing so the browser desktop can load scripts, APIs, authentication paths, media-related services, and Contact Center application components. The official domain patterns include Webex domains such as *.wbx.com on port 443 and Contact Center service domains such as *.ciscoocservice.com on port 443.

Blocking either can prevent the desktop from loading, authenticating, or communicating with Contact Center services. The ucce.com domain is associated with Unified Contact Center Enterprise naming, not Webex Contact Center Agent Desktop. The generic amazonaws.com domain may appear in some cloud service paths, but it is not one of the two direct required domain answers here. The wxcc.com option is also not the official service domain in the documented network requirement list. Reference: Cisco Help, Set up security for Webex Contact Center; System requirements for Webex Contact Center Desktop.

NEW QUESTION # 57

What are the two current default rate limits for a given client ID when Webex Contact Center APIs are protected with rate limiting? (Choose two.)

- A. 1000 requests per minute
- B. 300 requests per minute
- C. 30 requests per second
- D. 1800 requests per minute
- E. 300 requests per second

Answer: C,D

NEW QUESTION # 58

.....

For the challenging Implementing Cisco Collaboration Cloud Customer Experience (300-830) exam, they make an effort to locate reputable and recent Treasury with Implementing Cisco Collaboration Cloud Customer Experience (300-830) practice questions. The high anxiety and demanding workload the candidate must face being qualified for the Treasury with Implementing Cisco Collaboration Cloud Customer Experience (300-830) certification are more difficult than only passing the Implementing Cisco
