

SAP C_SEC_2405 Valid Exam Questions & C_SEC_2405 Valid Test Preparation

P.S. Free & New C_SEC_2405 dumps are available on Google Drive shared by ExamsLabs: https://drive.google.com/open?id=1-xCEaI1U388E6B_a2C8yOMGIYLWtiFwq

We are quite confident that all these SAP C_SEC_2405 exam dumps feature you will not find anywhere. Just download the SAP C_SEC_2405 and start this journey right now. For the well and SAP C_SEC_2405 Exam Dumps preparation, you can get help from SAP C_SEC_2405 which will provide you with everything that you need to learn, prepare and pass the SAP Certified Associate - Security Administrator (C_SEC_2405) certification exam.

SAP C_SEC_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 2	Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.
Topic 3	Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 4	Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 5	User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.

SAP C_SEC_2405 Valid Exam Questions: SAP Certified Associate - Security Administrator - ExamsLabs Ensure you Pass Exam

As we all know it is not easy to obtain the C_SEC_2405 certification, and especially for those who cannot make full use of their sporadic time. But you are lucky, we can provide you with well-rounded services on C_SEC_2405 practice braindumps to help you improve ability. You would be very pleased and thankful if you can spare your time to have a look about features of our C_SEC_2405 Study Materials. With the pass rate high as 98% to 100%, you can totally rely on our C_SEC_2405 exam questions.

SAP Certified Associate - Security Administrator Sample Questions (Q25-Q30):

NEW QUESTION # 25

When you maintain authorizations for SAPUI5 Fiori apps, which of the following object types is the front-end authorization object type?

- A. TADIR IWSV - SAP Gateway Business Suite Enablement-Service
- B. TADIR G4BA - SAP Gateway Odata V4 Backend Service Group & Assignments
- C. TADIR IWSG - SAP Gateway: Service Groups Metadata
- D. TADIR INA1 - InA Service

Answer: A

Explanation:

For SAPUI5 Fiori apps, the front-end authorization object type is TADIR IWSV (SAP Gateway Business Suite Enablement-Service). This object type represents the OData services used by Fiori apps on the front-end server, and its authorization is managed via the S_SERVICE authorization object in PFCG roles. The IWSV type specifically defines the services that the front-end server calls to access back-end data, requiring start authorizations and default values to be included in the role. TADIR IWSG is used for service group metadata, not front-end authorizations, and TADIR G4BA pertains to OData V4 services, which are less common in standard SAPUI5 Fiori apps. TADIR INA1 is related to InA (Information Access) services, not typical Fiori app authorizations. By using IWSV, SAP ensures that front-end authorizations are correctly aligned with the OData services powering Fiori apps, providing secure and efficient access control in SAP S/4HANA systems.

NEW QUESTION # 26

Following an upgrade of your SAP S/4HANA on-premise system to a higher release, you perform a Modification Comparison using SU25.

What does this comparison do?

- A. It compares your changes to the SAP defaults in USOBX and USOBT with the new SAP defaults in the current release and allows you to make adjustments.
- B. It compares your changes to the SAP defaults in USOBX_C and USOBT_C with the new SAP defaults in the current release and allows you to make adjustments.
- C. It compares the Role Maintenance data from the previous release with the data for the current release and writes any new default values in tables USOBX_C and USOBT_C.
- D. It compares the Role Maintenance data from the current release with the data for the previous release and allows you to adjust any custom default values in tables USOBX and USOBT.

Answer: A

NEW QUESTION # 27

Following an upgrade of your SAP S/4HANA on-premise system to a higher release, you perform a Modification Comparison using SU25.

What does this comparison do?

- A. It compares your changes to the SAP defaults in USOBX and USOBT with the new SAP defaults in the current release and allows you to make adjustments.
- B. It compares your changes to the SAP defaults in USOBX_C and USOBT_C with the new SAP defaults in the current release and allows you to make adjustments.

- C. It compares the Role Maintenance data from the current release with the data for the previous release and allows you to adjust any custom default values in tables USOBX and USOBT.
- D. It compares the Role Maintenance data from the previous release with the data for the current release and writes any new default values in tables USOBX_C and USOBT_

Answer: A

NEW QUESTION # 28

Which tool can you use to modify the entities schema content across multiple repositories?

- A. SAP BTP Account Explorer
- B. SAP Business Application Studio
- C. SAP Cloud Identity Services Schemas app
- D. SAP Cloud Identity Services Transformation Editor

Answer: C

Explanation:

* Context: Modifying entities schema content across multiple repositories is crucial for customizing identity services.

* Solution Description:

* The Schemas app in SAP Cloud Identity Services is specifically designed for managing schema content.

SAP Security References:

* SAP Cloud Identity Services Documentation

* SAP Schemas App User Guide

NEW QUESTION # 29

Where can you find SAP Fiori tiles and target mappings according to segregation of duty?

- A. Assigned Pages
- B. Assigned Spaces
- C. Assigned Business Catalogs
- D. Assigned Technical Catalogs

Answer: C

Explanation:

In SAP Fiori, segregation of duty-related tiles and target mappings can be found within Assigned Business Catalogs. Business catalogs group Fiori apps and authorizations logically, ensuring that users only have access to the apps they need for their roles while adhering to segregation of duties (SoD) principles.
