In the 21st century, with the development of science and technology, the Internet is not only a entertainment platform, but also a world-class electronic library. On BraindumpsPass site you can find IT information knowledge treasure that belongs to you. Choosing BraindumpsPass's UiPath-ADPv1 Exam Training materials is to choose to embrace the bright future. When you buy our UiPath-ADPv1 exam training materials, we will ensure that you pass UiPath-ADPv1 test.

Our specialists check whether the contents of UiPath-ADPv1 real exam are updated every day. If there are newer versions, they will be sent to users in time to ensure that users can enjoy the latest resources in the first time. In such a way, our UiPath-ADPv1 Guide materials can have such a fast update rate that is taking into account the needs of users. And we will always send our customers with the latest and accurate UiPath-ADPv1 exam questions.

Pdf UiPath-ADPv1 Dumps, UiPath-ADPv1 Exam Dumps Collection

You may be given the UiPath UiPath-ADPv1 practice exam results as soon as they have been saved in the software. BraindumpsPass modified UiPath UiPath-ADPv1 exam dumps allow students to learn effectively about the real UiPath UiPath-ADPv1 Certification Exam. UiPath UiPath-ADPv1 practice exam software allows students to review and refine skills in a preceding test setting.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 2	<ul style="list-style-type: none">• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.
Topic 3	<ul style="list-style-type: none">• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.
Topic 4	<ul style="list-style-type: none">• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q123-Q128):

NEW QUESTION # 123

Considering that the attached table is stored in a variable called "dt":

Which LINQ query can be used to return the maximum total Quantity?

- A. `dt.AsEnumerable. Max(Function(x) Convert.ToInt32(x("Quantity").ToString))`
- B. `dt.AsEnumerable. OrderByDescending(Function(x) Convert.ToInt32(x("Quantity").ToString)).First.Item("Quantity")`
- C. `dt.AsEnumerable. Max(Function(x) Convert.ToInt32(x("Quantity").ToString))("Item")`
- D. `dt.AsEnumerable. GroupBy(Function(x) x("Item").ToString). Max(Function(x) x.Sum(Function(y) Convert.ToInt32(y("Quantity").ToString)))`

Answer: D

Explanation:

The LINQ query that can be used to return the maximum total Quantity from the attached table is `dt.AsEnumerable.`

`GroupBy(Function(x) x("Item").ToString). Max(Function(x) x.Sum(Function(y) Convert.ToInt32(y("Quantity").ToString)))`. This query uses the LINQ methods `AsEnumerable`, `GroupBy`, `Max`, and `Sum` to manipulate the data in the `dt` variable. The `dt` variable is a `DataTable` that contains the following data:

No.

Item

Quantity

1

apple

10

2

orange

20

3

mango

50

4

kiwi

80

5

pear

1

6

apple

5

7

mango

15

The AsEnumerable method converts the DataTable into an Enumerable collection of DataRow objects. The GroupBy method groups the elements of the collection by the value of the Item column, creating a collection of groups. Each group has a key, which is the Item name, and a list of elements, which are the DataRows that have the same Item value. The Max method returns the maximum value of the collection, based on a selector function. The selector function is a lambda expression that calculates the sum of the Quantity column for each group. The Sum method returns the sum of the elements in a collection, based on a selector function. The selector function is a lambda expression that converts the value of the Quantity column into an integer.

Therefore, the query will group the DataRows by the Item name, calculate the total Quantity for each group, and return the maximum total Quantity among the groups. The maximum total Quantity is 80, which corresponds to the group with the key "kiwi". References: [DataTable.AsEnumerable Method],

NEW QUESTION # 124

How should the computation of the signature be done for client apps that receive Orchestrator requests and need to check their authenticity?

Instructions: Drag the Description found on the left and drop on the correct Step Sequence found on the right.

Answer:

Explanation:

NEW QUESTION # 125

Consider testing a workflow that computes the sum of two numbers having the data driven test data from the Excel file below:

Expanding the functionality of the workflow to compute the sum of three numbers, the data needs to be updated as well to accommodate the new scenario:

What are steps to do that?

- A. Click Right on the Test Case and select Update Test Data
- B. Click Right on the Test Case and select Remove Test Data.
- **C. Click Right on the Test Case and select Refresh Test Data**
- D. Click Right on the Test Case and select Add Test Data.

Answer: C

NEW QUESTION # 126

Which of the following is a tag in a selector?

- **A. <html app-msedge.exe' title-Find Unicorn Name' />**
- B. aaname='FirstName'
- C. id='selMonth'
- D. class-down-chevron set-font'

Answer: A

Explanation:

A tag in a selector is a node that represents a UI element or a container of UI elements. A tag has the following format: <ui_system attr_name_1='attr_value_1' ... attr_name_N='attr_value_N'/>. A tag can have one or more attributes that help identify the UI element uniquely and reliably¹. For example, the tag <html app-msedge.exe' title-Find Unicorn Name' /> represents the HTML document of a web page opened in Microsoft Edge browser, with the title "Find Unicorn Name". The attributes app-msedge.exe and title-Find Unicorn Name help distinguish this tag from other HTML documents.

The other options are not tags, but attributes. An attribute is a property of a UI element that has a name and a value. For example, id='selMonth' is an attribute that indicates the ID of a UI element is

"selMonth". Attributes are used inside tags to specify the UI element or container¹.

NEW QUESTION # 127

Which one is a feature of UiPath Solutions Management?

- A. Solution package
- B. Environment-specific configuration file
- C. Process execution set
- D. Orchestrator bundle

Answer: A

Explanation:

Solution packages are part of UiPath Solutions Management, which helps manage complex automations by bundling workflows, dependencies, assets, and configurations together. These packages are used to promote automations between environments, support version control, and ensure consistency across deployments.
