

HOT Valid DA0-002 Exam Answers 100% Pass | High-quality CompTIA CompTIA Data+ Exam (2025) Valid Exam Online Pass for sure

P.S. Free & New DA0-002 dumps are available on Google Drive shared by Exam-Killer: <https://drive.google.com/open?id=1w1YTcAlbQ2Uk1B9N5ORQxs5HqWZIFTzE>

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our DA0-002 exam question will be constantly updated every day. The IT experts of our company will be responsible for checking whether our DA0-002 Exam Prep is updated or not. Once our DA0-002 test questions are updated, our system will send the message to our customers immediately. If you use our DA0-002 exam prep, you will have the opportunity to enjoy our updating system and pass the DA0-002 exam.

It is similar to the DA0-002 desktop-based software, with all the elements of the desktop practice exam. This mock exam can be accessed from any browser and does not require installation. The CompTIA Data+ Exam (2025) (DA0-002) questions in the mock test are the same as those in the real exam. And candidates will be able to take the web-based CompTIA Data+ Exam (2025) (DA0-002) practice test immediately through any operating system and browsers.

DA0-002 Valid Exam Online | Valid Dumps DA0-002 Files

We have the DA0-002 Questions and answers with high accuracy and timely update. Our professional team checks DA0-002 answers and questions carefully with their professional knowledge. We also have the latest information about the exam center, and will update the version according to the new requirements. Pass guarantee and money back guarantee are also our principles, and if you have any questions, you can also consult the service staff.

CompTIA Data+ Exam (2025) Sample Questions (Q26-Q31):

NEW QUESTION # 26

Before distributing a report, a marketing analyst notices that the total distinct promotional email messages is less than the combined total of emails sent. Which of the following is the most likely reason for this difference?

- A. The aggregation did not include all emails.
- B. The report failed to run properly.
- C. A recipient received duplicate emails.
- D. Some emails were not delivered.

Answer: C

Explanation:

This question falls under the Data Analysis domain, focusing on analyzing discrepancies in data reports. The total distinct messages are fewer than the total emails sent, indicating a specific issue.

* The aggregation did not include all emails (Option A): If the aggregation missed emails, the total sent would be lower, not the distinct count.

* Some emails were not delivered (Option B): Undelivered emails would reduce the total sent, but the scenario implies the total sent is accurate.

* The report failed to run properly (Option C): A report failure would likely cause broader issues, not a specific discrepancy between distinct and total counts.

* A recipient received duplicate emails (Option D): If recipients received duplicates, the total emails sent would be higher than the distinct messages (unique email content), explaining the difference.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," and identifying duplicates is a common analysis task to explain such discrepancies.

NEW QUESTION # 27

A Chief Executive Officer requests a report that must:

- * Summarize the company metrics in a simple way.
- * Be clear and concise.
- * Be easily understood by all company levels.
- * Be accessible and updated without manual intervention.

Which of the following communication approaches best meets these requirements?

- A. Slide presentation
- B. Open data portal
- C. Executive summary
- D. Key performance indicator dashboard

Answer: D

Explanation:

This question pertains to the Visualization and Reporting domain, focusing on selecting the appropriate communication method for a report. The requirements emphasize simplicity, clarity, accessibility, and automatic updates, which point to a specific approach.

* Executive summary (Option A): An executive summary is a written document that summarizes metrics but isn't typically updated automatically and may not be accessible to all levels without distribution.

* Slide presentation (Option B): A slide presentation can be clear but requires manual updates and isn't inherently accessible to all company levels.

* Key performance indicator dashboard (Option C): A KPI dashboard provides a simple, visual summary of metrics, is clear and concise, can be understood by all levels, and can be set up to update automatically, meeting all requirements.

* Open data portal (Option D): An open data portal provides raw data access, which may not be simple or easily understood by all levels.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a KPI dashboard is the best approach for meeting these requirements.

NEW QUESTION # 28

Which of the following is found in metadata?

- A. Data lineage
- B. Syntax
- C. Variable types
- D. Transformations

Answer: C

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on the content of metadata.

Metadata describes data attributes, and the task is to identify what it typically includes.

* Transformations (Option A): Transformations (e.g., data cleaning steps) are part of data lineage, not metadata.

* Data lineage (Option B): Data lineage tracks data flow and transformations, which is related to metadata but not a direct component.

* Syntax (Option C): Syntax refers to code structure, not a metadata component.

* Variable types (Option D): Metadata includes information about data fields, such as variable types (e.g., integer, string), which is a standard component.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and metadata typically contains details like variable types to describe the dataset.

NEW QUESTION # 29

A manager wants to use the information in a recurring report on incomplete timesheets for the prior month to guide employee outreach. Which of the following report types is the best for this task?

- A. Summary
- B. Snapshot
- C. Ad hoc
- D. Infographic

Answer: A

Explanation:

This question is part of the Visualization and Reporting domain, focusing on selecting the appropriate report type for a specific purpose. The manager needs a recurring report on incomplete timesheets to guide outreach, which requires a concise, data-driven report.

* Summary (Option A): A summary report aggregates data (e.g., total incomplete timesheets per employee) and presents it concisely, making it ideal for recurring use to guide decisions like employee outreach.

* Infographic (Option B): Infographics are visual representations for broad audiences, not typically used for recurring, detailed employee outreach tasks.

* Snapshot (Option C): A snapshot report captures data at a specific point in time, but it's not ideal for recurring analysis of trends or aggregates.

* Ad hoc (Option D): Ad hoc reports are one-time, on-demand reports, not suitable for recurring needs.

The DA0-002 Visualization and Reporting domain includes "the appropriate visualization in the form of a report", and a summary report best fits the need for recurring, actionable data.

NEW QUESTION # 30

A data analyst is analyzing the following dataset:

Transaction Date

Quantity

Item

Item Price

12/12/12

11

USB Cords

9.99

11/11/11

3

Charging Block

8.89

10/10/10

5

Headphones

50.15

Which of the following methods should the analyst use to determine the total cost for each transaction?

- A. Compressing
- B. Parsing
- C. Scaling
- **D. Deriving**

Answer: D

Explanation:

This question falls under the Data Analysis domain, focusing on calculating new values from existing data.

The task is to determine the total cost per transaction, which involves multiplying Quantity by Item Price.

* Parsing (Option A): Parsing involves breaking down data (e.g., splitting a string), not calculating totals.

* Scaling (Option B): Scaling adjusts numerical values to a common range (e.g., normalization), not relevant for calculating totals.

* Compressing (Option C): Compressing reduces data size, not applicable to calculating costs.

* Deriving (Option D): Deriving involves creating new data fields by performing calculations on existing ones (e.g., Total Cost = Quantity × Item Price), which fits the task.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," such as deriving new fields through calculations to analyze data.
