

# Valid CDCS Exam Vce - CDCS Reliable Test Online

## Newest CDCS-001 Reliable Test Vce & Leading Offer in Qualification Exams & Unparalleled CDCS-001: Certified Data Centre Specialist (CDCS)

ExamBoosts is a website specifically provide the certification exam information sources for GAQM professionals. Through many reflects from people who have purchase ExamBoosts's products, ExamBoosts is proved to be the best website to provide the source of information about [CDCS-001 Certification Exam](#). The product of CDCS-001 is a very reliable training tool for you. The answers of the exam exercises provided by ExamBoosts is very accurate. Our ExamBoosts's senior experts are continuing to enhance the quality of our training materials.

The CDCS-001 exam covers a wide range of topics related to data center management, including power and cooling, networking, storage, virtualization, security, and disaster recovery. CDCS-001 exam consists of 100 multiple-choice questions and must be completed within 120 minutes. The passing score for the exam is 70%, and candidates who pass the exam receive a certificate that is valid for three years.

## GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

### NEW QUESTION # 20

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

**Answer: B**

Explanation:

Explanation

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

### NEW QUESTION # 21

Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

2026 Latest ValidVCE CDCS PDF Dumps and CDCS Exam Engine Free Share: <https://drive.google.com/open?id=1YVi-W00uA4A4hzzMwpId-IgN3L9czT6i>

When candidates don't practice with the latest CDCS exam questions, they fail and lose their precious resources. For candidates who wish to clear the CDCS exam in a short time, ValidVCE offers the latest and actual EXIN Exam Questions. Our EXIN EPI Certified Data Centre Specialist (CDCS) exam questions are excellent and ensure that users succeed in one go. Authentic CDCS Exam Questions are available in these formats: web-based practice exam, desktop practice test software, and PDF format. Since every test taker has unique learning styles, ValidVCE has designed these formats to meet the practice needs of CDCS exam candidates.

Our CDCS study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our CDCS learning guide. And the content of the three different versions is the same, but the displays are totally different according to the study interest and hobbies. And it is quite enjoyable to learn with our CDCS Exam Questions.

**CDCS Quiz Braindumps: EXIN EPI Certified Data Centre Specialist - CDCS Quiz Torrent & CDCS Exam Review**

Our CDCS exam questions not only includes the examination process, but more importantly, the specific content of the exam. In previous years' examinations, the hit rate of CDCS learning quiz was far ahead in the industry. We know that if you really want to pass the exam, our study materials will definitely help you by improving your hit rate as a development priority. After using CDCS training prep, you will be more calm and it is inevitable that you will get a good result.

## EXIN EPI Certified Data Centre Specialist Sample Questions (Q18-Q23):

### NEW QUESTION # 18

Do you need to consider bullet (ballistics) protection when designing a data center?

- A. Bullet (ballistics) protection is required by ANSI/TIA-942 for data centers Rated 3/4.
- **B. Bullet (ballistics) protection is only required if the facility is a potential target or the building is in the vicinity of a potential target.**
- C. Bullet (ballistics) protection is only required when the data center is located in an area with a high crime rate.
- D. Bullet (ballistics) protection is required by ANSI/TIA-942 for all data centers.

**Answer: B**

Explanation:

Bullet (ballistics) protection is typically considered only for data centers that are potential targets or located near such targets. While ANSI/TIA-942 does not specifically require bulletproofing for all data centers, it is prudent to consider it based on location risk assessments, especially if the facility is in a high-risk area or near critical infrastructure that could attract threats.

Detailed Explanation:

Protective measures like bulletproofing depend on the threat landscape and the data center's exposure to risks such as crime or terrorism. Assessments for physical security are typically customized based on location-specific risks rather than being universally required by data center standards.

EPI Data Center Specialist References:

EPI guidelines emphasize customizing physical security measures based on threat assessments, suggesting that bulletproofing is appropriate in specific circumstances where the facility's risk profile justifies additional security measures.

### NEW QUESTION # 19

Can you install a raised floor tight to the perimeter of the room?

- **A. No, to avoid damage to the raised floor due to building and hygrothermal movement**
- B. Yes, a raised floor needs to be installed tight to the perimeter to prevent air leakage
- C. No, but this applies only to raised floors with a height of over 90 cm (3 ft)
- D. Yes, but only if the data center is located in Zone 0 with no or little seismic activity

**Answer: A**

Explanation:

Raised floors must not be installed flush against perimeter walls. Buildings expand, contract, and shift due to thermal expansion (hygrothermal movement), structural settlement, and seismic activity. If the raised floor is rigidly connected to the walls, this movement transfers directly into the raised floor grid, causing buckling, cracking, or tile misalignment.

Industry standards (e.g., CISCA - Ceilings & Interior Systems Construction Association guidelines) require leaving a small perimeter gap (typically 1-2 cm) between raised floor tiles and walls. This gap is then sealed with flexible firestops or brush gaskets to control air leakage while preserving movement tolerance.

Therefore, the correct practice is to leave a separation space, making answer C correct. Options A and D restrict this requirement incorrectly, while B is factually wrong (sealing against the perimeter is not allowed).

References: CISCA Raised Floor Installation Guidelines, ANSI/TIA-942-B §6.3 (Flooring and Seismic Considerations).

### NEW QUESTION # 20

The UPS of a data center with ANSI/TIA-942 Rating-4 is installed with the rectifier connected to power feed A and the bypass/reserve input connected to power feed B. To which feed will the UPS output be synchronized?

- A. Feed A
- B. The UPS will not synchronize to any feed but use an internal clock
- **C. Depends on UPS settings, as it can be set to either feed**
- D. Feed B

**Answer: C**

Explanation:

Modern UPS systems can synchronize their output to an external reference, either from the rectifier input (Feed A) or from the bypass input (Feed B). Synchronization ensures seamless transfer between normal and bypass operation.

The configuration depends on user or vendor settings:

\* If synchronized to the bypass (Feed B), the UPS can quickly transfer to bypass during overload or failure.

\* If synchronized to the rectifier (Feed A), the UPS maintains stable output independent of bypass conditions.

ANSI/TIA-942 does not mandate which feed the UPS must synchronize to, only that redundancy be maintained across feeds in a Rating-4 design. Manufacturers typically allow the choice depending on operational preference.

References: IEC 62040-3 (UPS Operational Modes), ANSI/TIA-942-B §6.2 (Electrical Redundancy).

#### **NEW QUESTION # 21**

It is assumed that EMF shielding material must be installed as the EMF levels coming from the transformer room into the computer room are measured at 100mG. The transformer room is approximately 10 meters away from the computer room and is separated by a corridor. You can assume that no physical issues are present for installing shielding material at any area/location.

Where should you recommend the shielding material to be installed?

- A. It does not matter, either close to the transformer room or the computer room is okay as there is no impact to cost or shielding material performance
- B. As close as possible to the computer room
- C. Shielding is not required to be installed as 100mG is within the acceptable levels for computer rooms
- **D. As close as possible to the transformer room**

**Answer: D**

Explanation:

EMF shielding is most effective when installed close to the source of the EMF, which in this case is the transformer room. Shielding at the source contains the magnetic fields before they spread, minimizing exposure throughout the facility, including the computer room.

Detailed Explanation:

Placing shielding close to the EMF source minimizes the area impacted by electromagnetic interference, as it reduces the distance over which the EMF can spread. Shielding materials near the source can absorb or redirect EMF, providing the most effective reduction of EMF levels in adjacent spaces, like the data center.

EPI Data Center Specialist References:

EPI data center training advises positioning shielding close to the EMF source to contain fields more effectively and reduce interference in critical areas. This method is more efficient and cost-effective, as it limits the spread of EMF from the point of origin.

#### **NEW QUESTION # 22**

Is it allowed to make design changes during the implementation phase?

- A. No, after a design freeze no further changes are allowed.
- **B. Only when there is a strong business and/or technical justification.**
- C. Yes, but only when time to implement is not exceeded.
- D. Any change is fine as long as it is within the scope of the project.

**Answer: B**

Explanation:

Design changes during the implementation phase are generally allowed only when there is a strong business and/or technical justification. Changes at this stage can lead to delays, increased costs, or compromise design integrity. Thus, a rigorous assessment is required to ensure any modifications are essential and provide clear benefits or address critical issues.

Detailed Explanation:

Changes post-design freeze should be minimized to avoid scope creep and additional costs. However, if a technical issue arises that would affect operational goals, or a business need warrants modification, justified changes are permissible, following an impact assessment and approval process.

EPI Data Center Specialist References:

EPI project management guidelines recommend a controlled change management process during implementation, allowing changes only when they align with critical objectives or address unforeseen issues that affect the project's success.

## NEW QUESTION # 23

.....

The EXIN CDCS web-based practice exam software can be easily accessed through browsers like Safari, Google Chrome, and Firefox. The customers do not need to download or install excessive software or applications to take the EXIN EPI Certified Data Centre Specialist (CDCS) web-based practice exam. The CDCS web-based practice exam software format can be accessed through any operating system like Windows or Mac.

**CDCS Reliable Test Online:** <https://www.validvce.com/CDCS-exam-collection.html>

EXIN Valid CDCS Exam Vce If you are tired of career bottleneck and looking for a breakthrough in your career, we are the IT test king in certification materials industry, Our EXIN CDCS test dumps are needed because people are willing to get succeed in the field by clearing the qualification exams, There are so many features to show that our CDCS study engine surpasses others.

As I described it to colleagues, we danced around the issues, Choosing the CDCS best-quality components means more stability and higher tolerance, which will allow for more stable overclocking at higher voltages and temperatures.

## 100% Pass Trustable EXIN - CDCS - Valid EXIN EPI Certified Data Centre Specialist Exam Vce

If you are tired of career bottleneck and looking Valid CDCS Exam Vce for a breakthrough in your career, we are the IT test king in certification materials industry, Our EXIN CDCS Test Dumps are needed because people are willing to get succeed in the field by clearing the qualification exams.

There are so many features to show that our CDCS study engine surpasses others, Many IT companies highly value the EPI Data Centre certificate when they employ workers, then your opportunities will be greater than other candidates.

Our EXIN EPI Certified Data Centre Specialist Exam expert regularly update dumps of EXIN CDCS Exam so that you cannot miss any question in your real exam.
