

# **Data-Driven-Decision-Making Latest Learning Materials - 100% Pass Quiz WGU - Data-Driven-Decision-Making - First-grade Reliable VPC2Data-Driven Decision MakingC207 Braindumps Questions**

**WGU C207 Data Driven Decision Making Exam New Questions 2024 with 100% Correct Answers | Verified | Latest Update | 100% Pass | Already Graded A+**

(Quiz 1) 1. For companies to attract and retain their best customers they need a complete portrait of who they are. To develop this portrait companies turn to...

A) Statistics  
B) Analytics  
C) Management Science  
D) Histograms

B

(Quiz 1) 2. A manufacturer wants to maximize their factory output while specifically minimizing labor costs. What type of analytics might they employ to achieve this goal?

A) Descriptive Analytics  
B) Predictive Analytics  
C) Prescriptive Analytics  
D) Diagnostic Analytics

C

(Quiz 1) 3. What type of data error that occurs in measurement is constant within a data set and is sometimes caused by faulty equipment or bias?

The latest Data-Driven-Decision-Making latest questions will be sent to you email, so please check then, and just feel free to contact with us if you have any problem. Our reliable Data-Driven-Decision-Making exam material will help pass the exam smoothly. With our numerous advantages of our Data-Driven-Decision-Making latest questions and service, what are you hesitating for? Our company always serves our clients with professional and precise attitudes, and we know that your satisfaction is the most important thing for us. We always aim to help you pass the Data-Driven-Decision-Making Exam smoothly and sincerely hope that all of our candidates can enjoy the tremendous benefit of our Data-Driven-Decision-Making exam material, which might lead you to a better future!

Contrary to the low price of VCE4Plus exam dumps, the quality of its dumps is the best. What's more, VCE4Plus provides you with the most excellent service. As long as you pay for the dumps you want to get, you will get it immediately. VCE4Plus has the Data-Driven-Decision-Making exam materials that you most want to get and that best fit you. After you buy the dumps, you can get a year free updates. As long as you want to update the Data-Driven-Decision-Making Dumps you have, you can get the latest updates within a year. VCE4Plus does its best to provide you with the maximum convenience.

## **Reliable Data-Driven-Decision-Making Braindumps Questions - New Data-Driven-Decision-Making Test Guide**

Our Software version of Data-Driven-Decision-Making exam questions can carry on the simulation study, fully in accordance with the true real exam simulation, as well as the perfect timing system, at the end of the test is about to remind users to speed up the speed to solve the problem, the Data-Driven-Decision-Making Training Materials let users for their own time to control has a more profound practical experience, thus effectively and perfectly improve user efficiency, let them do it keep up on Data-Driven-Decision-Making exams.

### **WGU VPC2Data-Driven Decision MakingC207 Sample Questions (Q66-Q71):**

#### **NEW QUESTION # 66**

Which two results occur when the null hypothesis is accepted using an F-test?

Choose 2 answers.

- A. The test statistic is greater than the critical value.
- B. There appears to be a difference between the two samples.
- C. **There appears to be no difference between the two samples.**
- D. The test statistic is less than the critical value.

**Answer: C,D**

Explanation:

When the null hypothesis is accepted in an F-test, it indicates that there is no statistically significant difference between group variances or means, depending on the test design. Acceptance occurs when the test statistic is less than the critical value, meaning the observed variation is within expected limits.

Accepting the null hypothesis implies that no meaningful difference exists between the samples. If the test statistic exceeded the critical value, the null hypothesis would be rejected.

Thus, the correct results are A and D.

#### **NEW QUESTION # 67**

When researchers are studying the effect of new drug treatments on patients, bias can be introduced by patients if they are aware of who receives the placebo.

Which type of research design eliminates this type of bias?

- A. Time series study
- B. Prospective cohort study
- C. Observational study
- D. **Blind study**

**Answer: D**

Explanation:

A blind study is specifically designed to eliminate bias that occurs when participants are aware of treatment assignments. In data-driven decision making and experimental research, patient awareness of receiving a placebo or treatment can influence reported symptoms, perceived effectiveness, and behavior, thereby biasing results.

In a blind study, participants do not know whether they are receiving the treatment or the placebo. This prevents expectations or beliefs from influencing outcomes and ensures that observed effects are attributable to the treatment itself rather than psychological or behavioral factors.

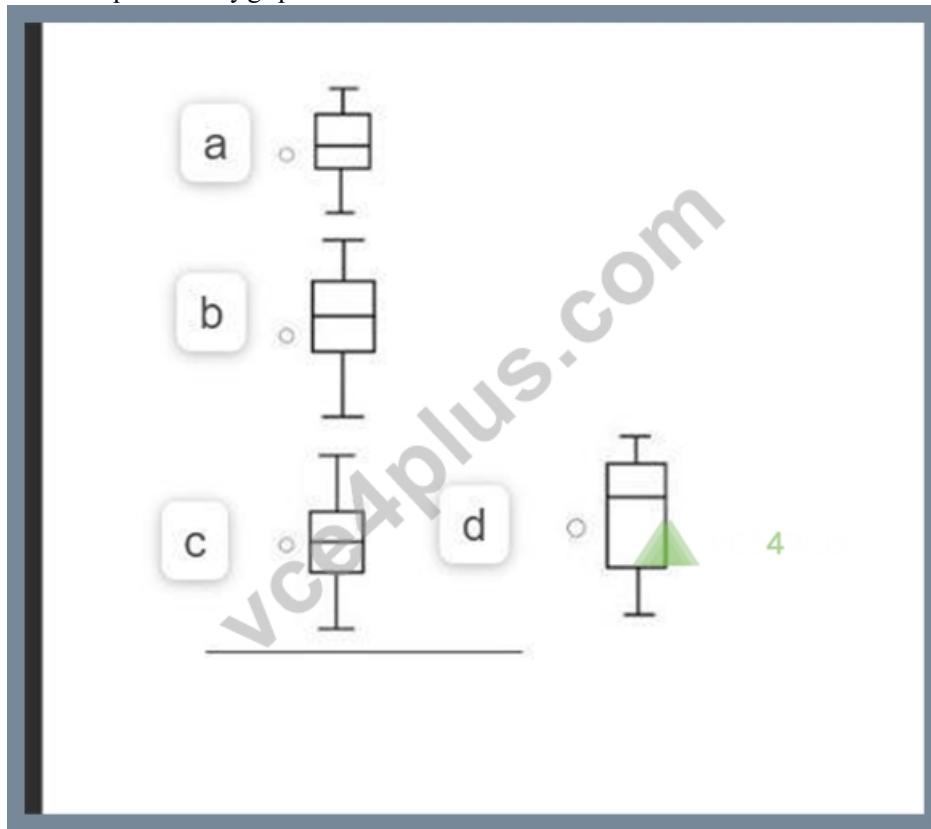

Observational studies and prospective cohort studies do not involve controlled assignment of treatments and therefore cannot eliminate this type of bias. Time series studies analyze data over time but do not address participant awareness of treatment allocation.

By preventing patients from knowing their treatment group, blind studies improve internal validity and support more accurate causal inference. Therefore, the correct answer is D, blind study.

#### **NEW QUESTION # 68**

A sample of 1,020 people was asked how many minutes they exercise on a typical day. The data were plotted and determined to be skewed left with a mean of 44.75 minutes.

Which boxplot correctly graphs this data?

- A. Option A
- B. Option B
- C. Option C
- D. Option D

**Answer: B**

#### NEW QUESTION # 69

A county government must increase trust among voters that their tallying machines are accurately calibrated to count their votes. Each department is tasked with creating an online marketing campaign; however, the budget for these campaigns is limited. How can the county apply data analytic approaches to allocate funds to each department?

- A. By measuring the number of voter complaints per department
- B. By benchmarking the voter turnout rates in each county
- C. By surveying employees on polling strategies
- D. By surveying the county controllers

**Answer: A**

Explanation:

Allocating limited resources effectively requires identifying where needs and risks are greatest. In data-driven decision making, measuring voter complaints per department provides a direct, objective indicator of trust issues and communication gaps. Departments with higher complaint volumes may require greater outreach to restore voter confidence. Using this metric allows funds to be allocated where they will have the greatest impact. Benchmarking turnout rates does not isolate departmental needs, and surveys of controllers or employees introduce subjectivity rather than evidence-based prioritization. Therefore, the correct answer is A.

#### NEW QUESTION # 70

What is a basic assumption of a z-score?

- A. The mean is equal to zero with a standard deviation of 2.
- B. Outlier data points are critical to a z-score calculation.
- **C. The mean is equal to zero with a standard deviation of 1.**
- D. Outlier data points must be eliminated from a z-score calculation.

**Answer: C**

Explanation:

A z-score standardizes a value by expressing how many standard deviations it lies from the mean. A fundamental assumption of z-score analysis in data-driven decision making is that the data can be transformed to a standard normal distribution with a mean of zero and a standard deviation of one.

This transformation allows analysts to compare values from different distributions on a common scale and to calculate probabilities using the standard normal table. The formula for a z-score subtracts the mean from the observed value and divides by the standard deviation, resulting in this standardized distribution.

Outliers are not eliminated by default in z-score calculations; instead, z-scores are often used to identify outliers. A standard deviation of 2 is incorrect and would not represent a standard normal distribution.

Therefore, the correct answer is A, reflecting the core assumption underlying z-score usage.

## NEW QUESTION # 71

.....

As soon as you enter the learning interface of our system and start practicing our WGU Data-Driven-Decision-Making learning materials on our Windows software, you will find small buttons on the interface. These buttons show answers, and you can choose to hide answers during your learning of our WGU Data-Driven-Decision-Making Exam Quiz so as not to interfere with your learning process.

**Reliable Data-Driven-Decision-Making Braindumps Questions:** <https://www.vce4plus.com/WGU/Data-Driven-Decision-Making-valid-vce-dumps.html>

Then our Data-Driven-Decision-Making study guide is a good choice. Our experts expertise about Data-Driven-Decision-Making training materials is unquestionable considering their long-time research and compile. You should also keep in mind that to get success in the WGU Data-Driven-Decision-Making exam is not an easy task. As is known to us, people who want to take the Data-Driven-Decision-Making exam include different ages, different fields and so on. We are offering the best Data-Driven-Decision-Making questions that you can use to prepare for the real exam.

Last one is VPC2Data-Driven Decision MakingC207 windows software version, which also is popular among Data-Driven-Decision-Making the clients who ascribed their success to our VPC2Data-Driven Decision MakingC207 products. Keywords within his reviews could help to foster more search traffic referrals.
