CompTIA A+ Certification Exam: Core 2 Sample Questions (Q88-Q93):

NEW QUESTION # 88

A technician is 3-D printing high-strength, carbon fiber-based filament parts for a customer order. Which of the following is the most important for the technician to use?

- A. Antistatic bags
- B. Steel-toed boots
- C. Air filter mask
- D. ESD mat

Answer: C

Explanation:

An air filter mask is most important because 3-D printing carbon fiber-based filaments can release fine particles and fumes that are

hazardous if inhaled.

NEW QUESTION # 89

Which of the following script types requires that the system mode is set to Unrestricted to run unsigned scripts?

- A. .js
- B. .py
- C. .ps1
- D. .bat

Answer: C

Explanation:

PowerShell scripts (.ps1) require the execution policy to be set to Unrestricted (or another permissive level) to run unsigned scripts.

NEW QUESTION # 90

A Windows user wants a filesystem that protects confidential data from attackers who have physical access to the system. Which of the following should the user choose?

- A. EFS
- B. ext
- C. FAT
- D. APFS

Answer: A

Explanation:

EFS (Encrypting File System) is a feature of Windows that provides filesystem-level encryption. It is designed to encrypt files and folders to protect them from unauthorized access, even if an attacker has physical access to the computer.

ext: A filesystem type used primarily in Linux, without native encryption features for Windows.

APFS: Apple's filesystem, used in macOS and iOS.

FAT: A simple filesystem type with no encryption features.

EFS: The correct choice for a Windows user needing to encrypt data at the filesystem level to protect against unauthorized physical access.

NEW QUESTION # 91

A customer's computer does not have an active connection to the network. A technician goes through a few troubleshooting steps but is unable to resolve the issue. The technician has exhausted their knowledge. The customer expresses frustration at the time taken to resolve this issue. Which of the following should the technician do?

- A. Dismiss the customer and reschedule another troubleshooting session at a later date.
- B. Interrupt the customer and express that troubleshooting support tickets can take time.
- C. Maintain a positive attitude and continue to ask questions regarding the scope of the issue.
- D. Escalate the issue to a senior team member and provide next steps to the customer.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When a technician exhausts all troubleshooting steps within their knowledge and the issue remains unresolved, the best practice is to escalate the issue to a higher-level technician or team. Additionally, the technician should clearly communicate the next steps to the customer to maintain transparency and reduce frustration. This ensures continuity of support and upholds customer satisfaction.

B: Dismissing the customer is unprofessional and violates proper customer service protocols.

C: Interrupting the customer and providing excuses escalates the tension and is inappropriate.

D: Continuing to ask questions without new troubleshooting steps wastes time and increases frustration.

CompTIA A+ 220-1102 Objective 4.1: Given a scenario, implement best practices associated with documentation and support systems information.

NEW QUESTION # 92

Users access an internal application through a browser website. When a user is browsing the site a message appears that states it is not safe. The message also displays an Advanced Options button to continue or close the site. During security training, all users were told to close any site that displays this message. Which of the following should the technician do to resolve the issue?

- A. Migrate the site to a different server
- B. Add the site to a list of safe senders
- C. Install a Secure Sockets Layer certificate for the site
- D. Move the site to a web-hosting company

Answer: C

Explanation:

Installing a Secure Sockets Layer certificate ensures the website uses trusted HTTPS encryption, eliminating browser security warnings and allowing users to access the internal application safely without bypassing security alerts.
