

New Microsoft SC-401 Exam Online - SC-401 Study Materials Review

P.S. Free 2026 Microsoft SC-401 dumps are available on Google Drive shared by VCEEngine: <https://drive.google.com/open?id=1PX3Q3r9xXMnccDEM8-6rmNt5XJJBxiM3>

Every person in IT industry should not just complacent with own life. Now the competitive pressures in various industries are self-evident, and the IT industry is no exception. So if you have a goal, then come true it courageously. Pass the Microsoft SC-401 Exam is a competition. If you passed the exam, then you will have a brighter future. VCEEngine can provide you with the true and accurate training materials to help you pass the exam. And then you can achieve your ideal.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	<ul style="list-style-type: none"> Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 3	<ul style="list-style-type: none"> Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 4	<ul style="list-style-type: none"> Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

SC-401 Study Materials Review - New SC-401 Test Papers

It is acknowledged that high-quality service after sales plays a vital role in enhancing the relationship between the company and customers. Therefore, we, as a leader in the field specializing in the {Examcode} exam material especially focus on the service after sales. In order to provide the top service after sales to our customers, our customer agents will work in twenty four hours, seven days a week. So after buying our SC-401 Study Material, if you have any doubts about the {Examcode} study guide or the examination, you can contact us by email or the Internet at any time you like. We Promise we will very happy to answer your question with more patience and enthusiasm and try our utmost to help you out of some troubles. So don't hesitate to buy our {Examcode} test torrent, we will give you the high-quality product and professional customer services.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q113-Q118):

NEW QUESTION # 113

Hotspot Question

You have a Microsoft 365 E5 subscription.

In Microsoft Exchange Online, you have the mail flow rule shown in the following exhibit.

□ Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

Box 1: subject line

Box 2: restrict recipients from printing the message

Note: IRM is an encryption solution that also applies usage restrictions to email messages. It helps prevent sensitive information from being printed, forwarded, or copied by unauthorized people.

IRM capabilities in Microsoft 365 use Azure Rights Management (Azure RMS).

NEW QUESTION # 114

You have a Microsoft 365 E5 subscription.

You need to prevent users from uploading data loss prevention (DLP)-protected documents to the following third-party websites:

*web1.contoso.com

*web2.contoso.com

The solution must minimize administrative effort.

To what should you set the Service domains setting for Endpoint DLP?

- A. contoso.com
- B. web1.contoso.com and web2.contoso.com
- C. web*.contoso.com
- D. *.contoso.com

Answer: B

Explanation:

The Service domains setting in Microsoft 365 Endpoint Data Loss Prevention (Endpoint DLP) allows administrators to block or allow specific domains for file uploads. The goal is to prevent users from uploading DLP-protected documents to web1.contoso.com and web2.contoso.com.

Setting the Service domains to "web1.contoso.com and web2.contoso.com" precisely targets the two specific third-party websites, minimizing administrative effort while ensuring strict control.

NEW QUESTION # 115

HOTSPOT

You have a Microsoft SharePoint Online site that contains the following files.

□

Users are assigned roles for the site as shown in the following table.

Which files can User1 and User2 open? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Let's break it down:

File1.docx # DLP action = None

No DLP restrictions, so it is fully accessible to both User1 (owner) and User2 (member).

File2.docx # DLP action = Matched by DLP

"Matched" means the DLP policy detected sensitive content but has not blocked access. Instead, it may generate an alert or policy tip.

Both User1 and User2 can still open this file.

File3.docx # DLP action = Blocked by DLP

"Blocked" means the DLP policy actively restricts access or sharing of the file.

User2 (member) cannot open this file.

However, User1 (site owner) can open it because site collection admins and owners always retain full control over content, even if a DLP rule applies.

Ref: Microsoft Purview DLP policy tips and enforcement

DLP policies do not prevent SharePoint/OneDrive site collection admins (owners) from accessing content.

Final Answer Table:

User1 (Site Owner): File1.docx, File2.docx, File3.docx

User2 (Site Member): File1.docx, File2.docx

NEW QUESTION # 116

Hotspot Question

You have Microsoft 365 E5 tenant that has a domain name of 86s40q.onmicrosoft.com.

The tenant contains the users shown in the following table.

You have a published sensitivity label.

The Access control settings for the sensitivity label are configured as shown in the exhibit. (Click the Exhibit tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 117

You have a data loss prevention (DLP) policy that applies to the Devices location. The policy protects documents that contain United States passport numbers. Users report that they cannot upload documents to a travel management website because of the policy.

You need to ensure that the users can upload the documents to the travel management website. The solution must prevent the protected content from being uploaded to other locations.

Which Microsoft 365 Endpoint data loss prevention (Endpoint DLP) setting should you configure?

- A. Service domains
- B. File path exclusions
- C. Unallowed apps
- D. Unallowed browsers

Answer: A

Explanation:

The issue: Users cannot upload documents with U.S. passport numbers to a legitimate travel management website because Endpoint DLP is blocking it.

Solution: Configure Service domains in Endpoint DLP # this allows defining specific trusted domains where uploads of sensitive
