Once we have latest version, we will send it to your mailbox as soon as possible. our ACP-620 exam questions just need students to spend 20 to 30 hours practicing can let them have the confidence to pass the ACP-620 Exam, so little time great convenience for some workers. It must be your best tool to pass your ACP-620 exam and achieve your target.

ATLASSIAN Managing Jira Cloud Projects Sample Questions (Q17-Q22):

NEW QUESTION # 17

Your project is configured as shown.

☐ An issue is created with all three components selected: Hardware, Software, and Infrastructure. The assignee is set to Automatic. Who will be automatically assigned to the issue?

- A. Fatima Ali
- B. Raj Mathusutharan
- C. Alana Grant
- **D. Unassigned**
- E. Vincent Choy

Answer: D

Explanation:

When multiple components are selected on issue creation, Jira cannot determine a single default assignee if each component has a different assignee rule. In this case:

Hardware # Component lead (Vincent Choy)

Software # Project default (Alana Grant)

Infrastructure # Unassigned

Since the assignee logic conflicts, Jira defaults to Unassigned to avoid ambiguity.

NEW QUESTION # 18

Raz's team and Don's team are working on the same backlog, but they have their own active sprint.

Which of the following are true about parallel sprints? (Choose three.)

- A. Users cannot have a separate velocity chart for each team.
- B. Users can run up to 2 parallel sprints only.
- C. Project administrators can disable the parallel sprint feature for their projects.
- D. Users cannot complete multiple active sprints at once.
- E. If users want to complete active sprint A with unresolved issues, they cannot move it to active sprint B.

Answer: A,D,E

NEW QUESTION # 19

You are the project administrator for a team based in the Middle East.

You need to change the Standard Working Days configuration on the board: from Sunday to Thursday instead of Monday to Friday.

What will be affected by this change?

- A. Velocity Chart
- B. Average Age Report
- C. Burndown Chart
- D. sprint duration
- E. original estimates on issues

Answer: C

Explanation:

Changing the Standard Working Days affects the Burndown Chart, as this chart relies on working days to plot the ideal and actual burn of work during a sprint. Adjusting working days ensures the burndown chart accurately reflects the team's actual schedule.

NEW QUESTION # 20

Your team switched to using story points for estimation in the last 2 months and their sprints are 2 weeks long.

Which chart can definitely help you determine the average effort that the team can deliver during each sprint?

- A. Velocity Chart
- B. Cumulative Flow Diagram
- C. Burnup Chart
- D. Burndown Chart

Answer: A

Explanation:

The Velocity Chart shows the amount of story points completed in each sprint, allowing you to determine the average effort the team can deliver. It's specifically designed to track estimation units like story points across completed sprints.

NEW QUESTION # 21

Which of the following users have access to create a team-managed Jira project? (Choose four.) Note:

- Company-managed projects are formerly known as classic projects.
- Team-managed projects are formerly known as next-gen projects.

- Answer: A,C,D,F**
