

100% Pass Quiz Confluent - CCAAK - Confluent Certified Administrator for Apache Kafka Authoritative Reliable Exam Cost

BONUS!!! Download part of Actual4dump CCAAK dumps for free: <https://drive.google.com/open?id=1aNH6luVeOGs4krkf9ATKOMLQcG8nXDFn>

For some candidates, a good after-sale service is very important to them, since they may have some questions about the CCAAK exam materials. We have the both live chat service stuff and offline chat service, if any question that may bother you , you can ask for a help for our service stuff. They have the professional knowledge about the CCAAK Exam Materials, and they will give you the most professional suggestions.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.
Topic 2	• Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.
Topic 3	• Observability: This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.
Topic 4	• Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.

Topic 5	• Apache Kafka® Security: This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.

Hot Reliable CCAAK Exam Cost | Well-Prepared CCAAK Valid Test Questions: Confluent Certified Administrator for Apache Kafka

You can install Confluent CCAAK PRACTICE TEST file and desktop practice test software on your devices and easily start Confluent Certified Administrator for Apache Kafka (CCAAK) exam preparation right now. Whereas the "Actual4dump" CCAAK web-based practice test software is concerned, it is a simple browser-based application that works with all the latest web browsers. Just put the link of Actual4dump CCAAK web-based practice test application in your browser and start Confluent CCAAK exam preparation without wasting further time. The "Actual4dump" is quite confident that you will be the next successful Confluent Certified Administrator for Apache Kafka exam candidate.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q49-Q54):

NEW QUESTION # 49

Which out-of-the-box Kafka Authorizer implementation uses ZooKeeper?

- A. LDAP
- B. RBAC
- **C. ACLs**
- D. Ranger

Answer: C

Explanation:

Kafka's built-in ACL (Access Control List) authorizer stores and manages permissions using ZooKeeper by default. This implementation controls access at the resource level (topics, consumer groups, etc.).

NEW QUESTION # 50

When a broker goes down, what will the Controller do?

- **A. Trigger a leader election among the remaining followers to distribute leadership.**
- B. Become the leader for the topic/partition that needs a leader, pending the broker return in the cluster.
- C. Wait for a follower to take the lead.
- D. Automatically elect the least loaded broker to become the leader for every orphan's partitions.

Answer: A

Explanation:

When a broker goes down, the Controller detects the failure and triggers a leader election for all partitions that had their leader on the failed broker. The leader is chosen from the in-sync replicas (ISRs) of each partition.

NEW QUESTION # 51

Which use cases would benefit most from continuous event stream processing? (Choose three.)

- A. Historical dashboards
- **B. Context-aware product recommendations for e-commerce**
- **C. Fraud detection**
- D. End-of-day financial settlement processing

- E. Log monitoring/application fault detection

Answer: B,C,E

Explanation:

Real-time analysis of transactions helps detect suspicious activity instantly.

Context-aware product recommendations for e-commerce requires real-time user behavior tracking to serve personalized recommendations.

Log monitoring/application fault detection needs immediate processing to alert on system issues or failures.

NEW QUESTION # 52

What are important factors in sizing a KSQLDB cluster? (Choose three.)

- A. Data Encryption
- B. Data Schema
- C. Number of Queries
- D. Number of Partitions
- E. Topic Data Retention

Answer: B,C,D

Explanation:

The complexity of the schema (number of fields, data types, etc.) affects processing and memory usage.

Each KSQLDB persistent query consumes resources (CPU, memory), so more queries require more capacity.

More partitions increase parallelism, but also resource usage, especially in scaling and state management.

NEW QUESTION # 53

What is the atomic unit of data in Kafka?

- A. Offset
- B. Topic
- C. Partition
- D. Message

Answer: D

Explanation:

The message (also called a record) is the atomic unit of data in Kafka. It consists of a key, value, and optional headers and metadata. Messages are written to partitions and read by consumers.

NEW QUESTION # 54

.....

In this Desktop-based Confluent CCAAK practice exam software, you will enjoy the opportunity to self-exam your preparation.

The chance to customize the Confluent CCAAK practice exams according to the time and types of Confluent Certified

Administrator for Apache Kafka (CCAAB) practice test questions will contribute to your ease. This format operates only on

Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and

style of the real Confluent Certified Administrator for Apache Kafka (CCAAB) exam to make your preparation productive and relevant.
