Salesforce Certified Advanced Administrator Sample Questions (Q105-Q110):

NEW QUESTION # 105

Users at AW Computing use a custom object to manage order*. All profiles share a single page layout. Customer Service and Sales users express frustration overseeing actions that-do not always apply to their situation on the page layout.

What should an administrator recommend?

- A. Make two separate Lightning record pages and assign them to the applicable profiles.
- B. Create separate record types for the Customer Service and Sales users' records.
- C. Configure two separate permission sets and assign the appropriate permissions to each user.
- **D. Use Dynamic Actions and conditional visibility to show the appropriate actions to the applicable users.**

Answer: D

Explanation:

Dynamic actions are actions that appear on Lightning record pages based on criteria such as field values or user profiles. Dynamic actions allow administrators to customize which actions are available for users on different record types or page layouts without creating multiple page layouts for each scenario. By using dynamic actions and conditional visibility for accounts at AW Computing, administrators can show only relevant actions for customer service and sales users based on their situation.

NEW QUESTION # 106

An administrator wants to allow users who are creating leads to have access to the Find Duplicates button.

What lead object-level permission will the administrator need to provide these users?

- A. Merge
- B. Read and Edit
- C. Delete
- **D. View All**

Answer: D

NEW QUESTION # 107

Universal Containers needs to use a different pricebook for sales representatives in each of the US, LATAM, EMEA, and APAC regions. What should the system administrator do?

- A. Add a different list price for products depending on the region.
- B. Create a separate pricebook for each region.
- **C. Clone the standard pricebook and create separate pricebooks for each region.**

Answer: C

NEW QUESTION # 108

The support manager at Universal Containers wants a dashboard that shows the number of cases that remain open as of 5:00 p.m. each day. What type of report should be used in the dashboard component?

- A. Custom summary report where unit equals business hours
- B. Report based on custom report type using cases and business hours.
- C. Standard case lifecycle report where unit equals business hours
- **D. Report based on a reporting snapshot that runs daily at 5:00 p.m.**

Answer: D

NEW QUESTION # 109

A sales user is assigned to a permission set group that gives them Modify All access to Accounts. An administrator assigns the same user to a muting permission set that mutes Deletes access on Account. What level of access will the sales user have on the Account object?

- A. No Access
- **B. Modify All**
- C. Read-only
- D. Read, Create, and Edit

Answer: B

Explanation:

Permission set groups are a combination of permission sets that grant users access to various tools and functions. Muting permission sets are used to remove access that is granted by other permission sets in the group. However, muting permission sets cannot remove object-level access that is granted by Modify All or View All permissions. Therefore, if a user is assigned to a permission set group that gives them Modify All access to Accounts, a muting permission set that mutes Delete access on Account will not have any effect.

The user will still have Modify All access on the Account object, which includes Delete access. References:
