Besides, considering the current status of practice materials market based on exam candidates' demand, we only add concentrated points into our AZ-400 Exam tool to save time and cost for you.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q385-Q390):

NEW QUESTION # 385

You have an Azure Kubernetes Service (AKS) implementation that is RBAC-enabled. You plan to use Azure Container Instances as a hosted development environment to run containers in the AKS implementation.

You need to configure Azure Container Instances as a hosted environment for running the containers in AKS.

Which three actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

Step 1: Create a YAML file.

If your AKS cluster is RBAC-enabled, you must create a service account and role binding for use with Tiller.

To create a service account and role binding, create a file named `rbac-virtual-kubelet.yaml`. Step 2: Run `kubectl apply`.

Apply the service account and binding with `kubectl apply` and specify your `rbac-virtual-kubelet.yaml` file.

Step 3: Run `helm init`.

Configure Helm to use the tiller service account:

```
helm init --service-account tiller
```

You can now continue to installing the Virtual Kubelet into your AKS cluster.

Explanation

Text Description automatically generated with medium confidence

NEW QUESTION # 387

You have an app named `App1`. You have a Log Analytics workspace named `Workspace1` that contains two tables named `Events` and `Logs`. `App1` manages events in multiple locations and writes logs to `Workspace1`.

You need to query `Workspace1` for all log entries related to Asia that occurred during the last two days.

In which order should you arrange the query statements?

Answer:

Explanation:

Explanation:

NEW QUESTION # 388

You need to configure access to Azure DevOps Agent pools to meet the forwarding requirements:

- * Use a project agent pool when authoring build release pipelines.

- * View the agent pool and agents of the organization.

- * Use the principle of least privilege.

Which role memberships are required for the Azure DevOps organization and the project? To answer, drag the appropriate role membership to the correct targets. Each role membership may be used once, more than once, or not at all. You may need to drag

the split bar between panes or scroll to content NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

project level role: UserOrganization level role: Reader
