## Microsoft AI Business Professional Sample Questions (Q15-Q20):

### NEW QUESTION # 15

You are creating a custom agent in the Microsoft 365 Copilot app for the marketing team at your company.

The agent will be used to produce marketing collateral, including copy, logos, and artwork.

What should you add to the agent? More than one answer choice may achieve the goal. Select the BEST answer.

- A. a template
- **B. image generator**
- C. code interpreter
- D. a suggested prompt

**Answer: B**

#### NEW QUESTION # 16

In a Microsoft 365 Copilot conversation, you generate a report, and then edit the report in a page. You need to collaborate with a colleague on the report.

What are two ways to achieve the goal?

- A. Add the page to a notebook.
- **B. @mention the colleague in the page.**
- C. Open the page in Microsoft Word.
- **D. Share the page link.**

**Answer: B,D**

Explanation:

Microsoft 365 Copilot Pages supports collaboration similarly to other Microsoft 365 documents.

Collaboration requires notifying or granting access to colleagues.

Using @mentions within the page (Option A) directly notifies the colleague and facilitates collaborative engagement. Sharing the page link (Option D) allows others to access and edit the content according to permissions. These two methods provide complete collaboration workflows.

Adding the page to a notebook does not grant collaborative access. Opening the page in Word changes the editing surface but does not inherently enable collaboration unless shared.

Therefore, the correct answers are A and D.

#### NEW QUESTION # 17

Select the answer that correctly completes the sentence.

#### NEW QUESTION # 19

You receive the following response to a prompt: "Sorry, it looks like I can't respond to this. Let's try a different topic." What is a possible cause of the response?

- **A. The prompt contains language that violates safety guidelines.**
- B. The prompt is too vague to elicit a response.
- C. The prompt is larger than the allowed context window.
- D. The prompt contains more than five requests.

**Answer: A**

Explanation:

Microsoft 365 Copilot follows Microsoft's Responsible AI principles and enforces strict content safety policies. When a prompt

violates safety guidelines-such as containing harmful, abusive, illegal, or restricted content-the system may refuse to generate a response. The refusal message shown is consistent with safety filtering behavior.

Generative AI systems include moderation layers that evaluate prompts before generating output. If the prompt is classified as unsafe or non-compliant with policy, Copilot blocks the request and encourages the user to try a different topic.

A vague prompt typically results in a generic or clarifying response rather than a refusal. There is no fixed limit of five requests per prompt. Exceeding the context window usually results in truncation or processing errors, not a safety-based refusal message.

Therefore, the most likely cause of the response is that the prompt contains language that violates safety guidelines.
