MB-820 Exam Study Guide - Free MB-820 Exam

For candidates who are going to buy MB-820 training materials online, they may care more about the privacy protection. If you chose us, your personal information, such as your email address and your name will be protected well. Once the order finishes, your

personal identification information will be concealed. In addition, MB-820 Exam Materials are high-quality, and we have received lots of good feedbacks from our customers. Free demo for MB-820 exam dumps are available, we recommend you to have a try before buying, so that you can have a deeper understanding of what you are going to buy.

Microsoft MB-820 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Develop by using AL: How to Customize the UI experience and Use AL for business central extension is discussed here. It also delves into explaining the essential development standards.
Topic 2	<ul style="list-style-type: none">Describe Business Central: Describing the components and capabilities of Business Central, and describing the core solution and extensions approach for Business Central are focal points of this topic. It also explains the difference between Business Central Online and Business Central on-premises features.
Topic 3	<ul style="list-style-type: none">Install, develop, and deploy for Business Central: It delves into the installation and configuration of a Business Central development environment. Moreover, it discusses creating, debugging, and deploying an extension in Business Central.
Topic 4	<ul style="list-style-type: none">Work with development tools: Implementing semi-automated test processes and managing and assessing telemetry are its sub-topics.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q95-Q100):

NEW QUESTION # 95

A company plans to set up a local Business Central Development Docker container. The environment will be used for testing new project ideas.

You need to ensure that the most recent Business Central artifact URL has been selected. Which command should you use?

- A. Get-BcArtifactUrl -type sandbox -select Closest
- B. Get-BcArtifactUrl -type sandbox -select Current**
- C. Get-BcArtifactUrl -type sandbox -select NextMinor
- D. Get-BcArtifactUrl -type sandbox -select NextMajor

Answer: B

Explanation:

To ensure the most recent Business Central artifact URL is selected for setting up a local Business Central Development Docker container, the command to use is Get-BcArtifactUrl -type sandbox -select Current (A). This PowerShell command retrieves the URL for the latest available Business Central artifact for a sandbox environment, ensuring that the Docker container is set up with the most up-to-date version for testing new project ideas. The -select Current parameter is crucial as it specifies that the current, or latest, version of the artifact is to be retrieved, as opposed to selecting a version based on other criteria such as Closest, NextMinor, or NextMajor.

NEW QUESTION # 96

You need to define the properties of the comments field of the Non-conformity page.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

xtendedDataType property

```
group(commentsGroup)
{
    field("comments"; NonConformityComments)
    {
        ApplicationArea = All;
        
    }
}
-----  
var
    NonConformityComments: Text;
```

Answer:

Explanation:

xtendedDataType property

```
group(commentsGroup)
{
    field("comments"; NonConformityComments)
    {
        ApplicationArea = All;
        
    }
}
-----  
var
    NonConformityComments: Text;
```

ExtendedDataType property

```
group(commentsGroup)
{
    field("comments"; NonConformityComments)
    {
        ApplicationArea = All;
        
    }
}
-----  
var
    NonConformityComments: Text;
```

NEW QUESTION # 97

How are enums used in Business Central development?

- A. To optimize data retrieval from the database
- B. To create complex data types for calculations
- C. To define a set of named constants
- D. To handle exceptions and errors in code

Answer: C

NEW QUESTION # 98

A company uses Azure Application Insights for Business Central online in its production environment.

A user observes that some job queues go into the failed state and require manual intervention.

You need to analyze job queue lifecycle telemetry.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Kusto Query Language (KQL) job queue analysis code segment

```
traces
| take 100
| take
| top
| project
| extend
| where customDimensions.eventId == 'YOUREVENTID'
| project timestamp
| take
| top
| project
| extend
, jobQueueObjectId = customDimensions.alJobQueueObjectId
, jobQueueObjectType = customDimensions.alJobQueueObjectType
, jobQueueExecutionNumberOfAttemptsToRun
customDimensions.alJobQueueNumberOfAttemptsToRun
```

Answer:

Explanation:

Kusto Query Language (KQL) job queue analysis code segment

```
traces
| take 100
| take
| top
| project
| extend
| where customDimensions.eventId == 'YOUREVENTID'
| project timestamp
| take
| top
| project
| extend
, jobQueueObjectId = customDimensions.alJobQueueObjectId
, jobQueueObjectType = customDimensions.alJobQueueObjectType
, jobQueueExecutionNumberOfAttemptsToRun
customDimensions.alJobQueueNumberOfAttemptsToRun
```

NEW QUESTION # 99

You are developing a test application to test the posting process of a sales order. You must provide the following implementation:

* Specify the value of post options (dialog: Ship, Invoice, Ship & Invoice) as Invoice.

* Perform calculations and values checking.

You need to complete the development of the test codeunit.

Which methods should you use? To answer, move the appropriate methods to the correct implementation.

You may use each method once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Specify the value of the post options as Invoice:

* Test

Perform calculations and values checking:

* Handler

In the context of Microsoft Dynamics 365 Business Central testing, the 'Test' attribute is used to mark a method as a test method. This is where you would specify the action or the behavior you're testing - in this case, setting the post options as Invoice. It's within these test methods that you would simulate setting the posting option to "Invoice" programmatically.

For performing calculations and checking values, you would use 'Handler' methods to handle specific business events or conditions that occur within the system, such as before or after posting a document. These handlers can ensure that calculations are done correctly and that all validation checks pass before the document is posted.

The 'Normal' method would be a standard method that could be involved in the posting process, ensuring that all business logic is correctly applied and that the calculations and value checks are as expected.

In a test codeunit, you would typically have test methods that call these handler and normal methods to verify the business logic in various scenarios, such as posting with different options or checking the results of calculations under different conditions.

NEW QUESTION # 100

.....

The Microsoft Dynamics 365 Business Central Developer (MB-820) PDF format, desktop practice test software, and web-based practice test software, all three formats of actual exam questions are ready for quick download.
