Get Real SAP C_C4H22_2411 Questions From TorrentExam & Ace Your

Exam

A certificate may be a threshold for many corporations, it can decide that if you can enter a good company. There are C_C4H22_2411 test dumps in our company with high quality, if you choose us pass guarantee and money back guarantee, if you indeed fail the exam, your money will be returned to your account. You can take easy to use the C_C4H22_2411 Test Dumps, since we have the first-hand information, we will ensure that you will get the latestet information.

SAP C_C4H22_2411 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Collection and Contact Management: Aimed at Data Center Network Engineers, this section focuses on contact management, block lists, Smart Insight, Web Extend, relational data, and plug-in onboarding for platforms like SAP Commerce, SAP Customer Data Platform, and Magento. It assesses the ability to effectively describe, explain, and utilize these components.
Topic 2	• Account Creation and Settings: This section targets IT Solution Architects, covering the provisioning of environments and configuration of various settings. It includes contact data integration, DNS settings, SSL certificates, email channel setup and compliance, account security settings, and channel setup. The focus is on describing, explaining, and configuring these elements.
Topic 3	• Data Integrations Advanced: Designed for Data Center Network Engineers, this section delves into advanced data integration techniques. It encompasses store data onboarding (CSV), product data integration (URL, Google Tag Manager), sales data onboarding (APIs), customer data onboarding (APIs, CSV), Predict, and the SAP Customer Data Platform connector. The emphasis is on describing and explaining these integration methods.
Topic 4	• Managing Clean Core: This section evaluates the ability of IT Solution Architects to apply clean core principles to ERP systems. It emphasizes maximizing business process agility, reducing adaptation efforts, and accelerating innovation.

SAP Certified Associate - Implementation Consultant - SAP Emarsys Sample Questions (Q41-Q46):

NEW QUESTION # 41
You have just made an API call and received an HTTP 400 response code. What is the specific reason for this?

- A. Your API credentials are incorrect.
- B. It indicates the call was successful.
- C. An internal issue occurred and you should try again.
- D. There is an error in the information provided that needs correcting.

Answer: D

Explanation:
HTTP response codes in SAP Emarsys API indicate call status:
* Option A:Correct. A 400 Bad Request means the request contains invalid data (e.g., syntax error, missing parameters) that needs correction.
* Option B:Incorrect. Internal issues return a 500-series code, not 400.
* Option C:Incorrect. Incorrect credentials typically return a 401 Unauthorized, not 400.
* Option D:Incorrect. Success is a 200 OK, not 400.The SAP Emarsys API Documentation defines 400 as a client-side error.References:SAP Emarsys API Documentation - "Response Codes" (https://dev. emarsys.com/).

NEW QUESTION # 42
Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be used in all SAP S/4HANA Cloud editions.
- B. Customers can grant access to the dashboard to partners.
- C. Customers can use the dashboard in the dev, test, and production tenants.
- D. It can be accessed by using SAP For Me.

Answer: C,D

Explanation:
The "Clean Core Dashboard" is not a specific feature of SAP Emarsys but rather relates to SAP S/4HANA Cloud as part of the broader SAP ecosystem. Since the question appears in the context of an SAP Emarsys- related list but references a clean core concept, I'll clarify based on SAP's official documentation for both systems:
* Option A:Correct. The Clean Core Dashboard in SAP S/4HANA Cloud is available across development, test, and production tenants to monitor system health and compliance with clean core principles (e.g., minimizing customizations).
* Option B:Incorrect. While partners can be involved in SAP projects, the Clean Core Dashboard is primarily for customer use, and granting access to partners is not a standard feature highlighted in official documentation.
* Option C:Incorrect. The dashboard's availability depends on the specific S/4HANA Cloud edition (e.
g., Public vs. Private Cloud), and not all editions may fully support it as a standard feature.
* Option D:Correct. SAP For Me is a customer portal that provides access to various dashboards, including those related to clean core monitoring for S/4HANA systems.Since this question seems misplaced in an Emarsys context, the explanation aligns with SAP S/4HANA Cloud's Clean Core Dashboard. For Emarsys-specific dashboards, refer to "Strategic Dashboard" or "Predict Dashboard," but these do not match the options provided.References:SAP Help Portal - "Clean Core Strategy" (https://help.sap.com/), SAP For Me Documentation.

NEW QUESTION # 43
What key details do you need to provide to activate the email channel? Note: There are 3 correct answers to this question.

- A. Product information
- B. Sender domain(s)
- C. Historic sales information
- D. Sending volumes
- E. Tenant name and region

Answer: B,D,E

Explanation:
To activate the email channel in SAP Emarsys:
* Option A (Sending volumes):Correct. Expected send volumes are required for capacity planning and compliance.
* Option D (Sender domain(s)):Correct. Domains for sending emails must be specified and authenticated (e.g., DKIM, SPF).
* Option E (Tenant name and region):Correct. Tenant details identify the account and region for setup.
* Option B:Incorrect. Product info is for catalogs, not email activation.
* Option C:Incorrect. Sales data is for analytics, not channel setup.The SAP Emarsys Help Portal under
"Email Channel Setup" lists these requirements.References:SAP Emarsys Help Portal - "Email Channel" (https://help.emarsys.com/).

NEW QUESTION # 44
You want to connect your own hosted databases to SAP Emarsys Customer Engagement using Relational Data. Which of the following connection types are available? Note: There are 3 correct answers to this question.

- A. Oracle database
- B. Google BigQuery
- C. IBM DB2
- D. Snowflake
- E. MySQL

Answer: B,D,E

Explanation:
Relational Data in SAP Emarsys supports:
* Option A (MySQL):Correct. A widely supported SQL database.
* Option C (Snowflake):Correct. A cloud-based data warehouse supported for integration.

* Option E (Google BigQuery):Correct. Another cloud data platform compatible with Relational Data.
* Option B:Incorrect. Oracle is not listed as a supported connection.
* Option D:Incorrect. IBM DB2 is not supported natively.The SAP Emarsys Help Portal under
"Relational Data" confirms MySQL, Snowflake, and BigQuery.References:SAP Emarsys Help Portal -
"Relational Data" (https://help.emarsys.com/).

NEW QUESTION # 45

The image below shows the summary page of your mobile app tutorial program. What does "583 Messages Triggered" represent?
Note: There are 2 correct answers to this question.

- A. It is the number of contacts who entered the program.
- B. It is the number of SMS messages sent.
- C. It is the number of mobile push messages sent.
- D. It is the number of all messages sent in the Interactions program, regardless of the channel.

Answer: C,D

Explanation:
"583 Messages Triggered" on an Interactions program summary:
* Option B:Correct. In Interactions, this metric reflects all messages sent across configured channels (e.
g., push, SMS) in the program.
* Option D:Correct. Since it's a mobile app tutorial program, it specifically includes mobile push messages sent, a common channel
for such programs.
* Option A:Incorrect. It's not limited to SMS; it includes all channels unless specified.
* Option C:Incorrect. Contacts entering is a separate metric (e.g., "Entered"), not "Messages Triggered." The SAP Emarsys Help
Portal under "Interactions Reporting" explains this metric.References:SAP Emarsys Help Portal - "Interactions"
(https://help.emarsys.com/).
