By attempting these Canadian Securities Course Exam2 (CSC2) mock exams, you can enhance your confidence and overcome weaknesses. The CSC2 desktop software of Prep4SureReview works offline on Windows computers. The web-based CSI CSC2 Practice Exam is compatible with all operating systems and browsers.

CSI Canadian Securities Course Exam2 Sample Questions (Q59-Q64):

NEW QUESTION # 59

For institutional trading, when does the investor need to provide trade-matching elements?

- A. One the custodian confirms the trade.

- B. With the initial order.
- **C. After the dealer issues a trade execution notice.**
- D. Once the trade clears.

Answer: C

Explanation:

Trade-matching is a critical process in institutional trading, ensuring that details of a trade (e.g., price, quantity, and settlement terms) align among the involved parties, including the investor, dealer, and custodian.

In Canada, institutional trade matching must occur within a specific timeline, and the investor is responsible for providing trade-matching elements after the trade execution notice is issued by the dealer.

Step-by-Step Explanation:

- * What is Trade Matching? Trade matching involves the comparison of trade details between the buyer and seller (and their intermediaries) to confirm accuracy and reduce settlement risks.
- * When Does the Investor Provide Trade-Matching Elements?
 - * After the dealer executes the trade, the dealer issues a trade execution notice to the investor.
 - * The investor must then provide the necessary trade-matching details, such as account information, settlement instructions, and any other required confirmations.
 - * This process ensures that the trade can move seamlessly through to settlement.
- * Why Not Other Options?
 - * Option B (Once the custodian confirms the trade): Incorrect. The custodian's role is typically involved in the final settlement process and not in providing trade-matching details.
 - * Option C (With the initial order): Incorrect. Trade-matching details are provided after the trade is executed, not at the time the order is placed.
 - * Option D (Once the trade clears): Incorrect. Trade matching occurs before the trade clears to ensure settlement.

References to Canadian Securities Course Exam 2 Study Materials:

- * Volume 2, Chapter 27 - Institutional Clearing and Settlement
 - * Highlights the process of institutional trade matching, the roles of the investor, dealer, and custodian, and the required timelines.
- * Volume 2, Chapter 27 - The Sell Side and the Buy Side of the Market
 - * Explains trade execution and the responsibilities of institutional clients and their intermediaries in completing trades.

Final answer:

- * Option A (After the dealer issues a trade execution notice): Correct.
- * Other options are incorrect based on the standard processes for institutional trade matching in Canada.

NEW QUESTION # 60

What is a characteristic of a fixed-period withdrawal plan?

- **A. Withdrawals are set to collapse the plan by the end of the period.**
- B. Withdrawals are based on a predetermined life expectancy of the plan holder.
- C. Withdrawals are a consistent amount from the fund after the fixed period.
- D. Withdrawals are a set percentage of the fund holdings each payment period.

Answer: A

NEW QUESTION # 61

What is most likely true of a portfolio that is managed from a value basis?

- A. Portfolio turnover is high, so investors can expect to incur frequent capital gains
- B. This portfolio style tends to perform best in up markets, with minimal gains in down markets
- C. Stock selections tend to have a higher beta than those chosen by a growth manager
- **D. The portfolio will realize higher dividend yields than a growth equity portfolio**

Answer: D

NEW QUESTION # 62

Franco purchased an ETF in his non-registered account, and his total adjusted cost base in year 1 was \$30,000. The ETF distributes income each year. And this reinvested distribution total was \$1,750. The ETF also distributes a return

of capital of \$850. What would Franco's total capital gain be if he sold the ETF for \$39,000?

- A. \$8,100
- B. \$9,000
- C. \$,250
- D. \$6,400

Answer: A

Explanation:

To calculate Franco's total capital gain, we adjust the adjusted cost base (ACB) for reinvested distributions and return of capital (ROC).

- * Initial ACB: \$30,000.
- * Add Reinvested Distributions: Reinvested distributions increase the ACB. $30,000 + 1,750 = 31,750$ $30,000 + 1,750 = 31,750$
- * Subtract Return of Capital: ROC reduces the ACB. $31,750 - 850 = 30,900$ $31,750 - 850 = 30,900$
- * Calculate the Capital Gain: Subtract the adjusted ACB from the sale price. $39,000 - 30,900 = 8,100$ $39,000 - 30,900 = 8,100$
- * A. \$1,250: Incorrect, likely a miscalculation of adjusted ACB.
- * B. \$8,100: Correct, based on accurate ACB adjustments and sale price.
- * C. \$6,400: Incorrect, ignores reinvested distributions.
- * D. \$9,000: Incorrect, ignores the impact of ROC adjustments on ACB.

:

CSC Volume 2, Chapter 19: Adjusted Cost Base Calculations, which explains the impact of reinvested distributions and ROC on capital gains.

NEW QUESTION # 63

What do technical analysis and fundamental analysis have in common?

- A. They compare the intrinsic value against a security's current price.
- B. **They are used to predict changes in security prices.**
- C. They study the causes of security's price movements.
- D. They are nullified according to the random walk theory.

Answer: B

Explanation:

Both technical analysis and fundamental analysis are tools used to predict changes in security prices, but they differ significantly in their approaches.

- * Fundamental Analysis evaluates the intrinsic value of a security by analyzing factors such as a company's financial statements, industry conditions, and macroeconomic trends. It assumes that market prices will eventually reflect a security's true value.
- * Technical Analysis examines historical price and volume data to predict future price movements. It focuses on identifying patterns, trends, and market sentiment without regard to the underlying fundamentals.

Option A is incorrect because it only describes fundamental analysis. Option B erroneously connects both methodologies to the random walk theory, which discounts their effectiveness. Option D misstates their purpose, as technical analysis focuses on price trends, not the causes of price movements.

:

Volume 2, Chapter 13: Fundamental and Technical Analysis, Overview of Fundamental and Technical Analysis, Canadian Securities Course.

NEW QUESTION # 64

.....

Different with other similar education platforms on the internet, the CSC2 guide torrent has a high hit rate, in the past, according to data from the students' learning to use the CSC2 test torrent, 99% of these students can pass the qualification test and acquire the qualification of their yearning, this powerfully shows that the information provided by the CSC2 Study Tool suit every key points perfectly, targeted training students a series of patterns and problem solving related routines, and let students answer up to similar

topic.
