NEW QUESTION # 17

Which of the following are examples of indirect digital access? Note: There are 2 correct answers to this question.

- A. A Defect document created through an industry application
- B. An unattended bot in SAP Build Process Automation
- C. A Production Order created through a non-SAP front-end
- D. A Time Sheet Record from a 3rd party application

Answer: A,D

Explanation:

Indirect digital access occurs when humans, devices, or systems use the digital core indirectly through non-SAP intermediary software, such as a non-SAP front end, a custom-solution, or any other non-SAP application¹. Indirect digital access is measured by the number of documents created, updated, or deleted in the SAP system as a result of the indirect use². Examples of indirect digital access include:

- * A Defect document created through an industry application: This is an example of indirect digital access because the industry application is a non-SAP software that triggers the creation of a document in the SAP system.
- * A Time Sheet Record from a 3rd party application: This is also an example of indirect digital access because the 3rd party application is a non-SAP software that triggers the creation of a document in the SAP system.
- * An unattended bot in SAP Build Process Automation: This is not an example of indirect digital access because the bot is using SAP software to access the SAP system directly, not through a non-SAP intermediary software.
- * A Production Order created through a non-SAP front-end: This is not an example of indirect digital access because the production order is not a document type that is counted for indirect digital access. The document types that are counted are: Sales Order, Invoice, Purchase Order, Service and Maintenance Document, Manufacturing Document, Quality Management Document, Time Sheet, Financial Document, and Material Document².
