Do you need to find a high paying job for yourself? Well, by passing the Zscaler Digital Transformation Administrator, you will be able to get your dream job. Make sure that you are buying our bundle ZDTA brain dumps pack so you can check out all the products that will help you come up with a better solution. You can easily land a dream job by passing the ZDTA Exam in the first attempt.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 2	<ul style="list-style-type: none">Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 3	<ul style="list-style-type: none">Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLSSSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.
Topic 4	<ul style="list-style-type: none">Platform Services: This section measures skills of Cloud Infrastructure Engineers and focuses on the suite of Zscaler platform services. Key topics include advanced device posture assessments, TLS inspection mechanics, and the application of policy frameworks governing internet, private access, and digital experience services.

Reliable ZDTA Exam Sample, Reliable ZDTA Test Labs

Our ZDTA study material is the most popular examination question bank for candidates. ZDTA study material has helped thousands of candidates successfully pass the exam and has been praised by all users since it was appearance. ZDTA study material has the most authoritative test counseling platform, and each topic in ZDTA Study Materials is carefully written by experts who are engaged in researching in the field of professional qualification exams all the year round.

Zscaler Digital Transformation Administrator Sample Questions (Q83-Q88):

NEW QUESTION # 83

What does TLS Inspection for Zscaler Internet Access secure public internet browsing with?

- A. Logging which clients receive the original webserver certificate.
- B. Storing connection streams for future customer review.
- C. Intermediate certificates are created for each client connection.
- D. Removing certificates and reconnecting client connection using HTTP.

Answer: C

Explanation:

TLS Inspection in Zscaler Internet Access secures public internet browsing by creating intermediate certificates for each client connection. This Man-In-The-Middle approach enables Zscaler to decrypt and inspect encrypted traffic for threats and policy compliance while still maintaining secure connections with the client. The intermediate certificate acts as a trusted entity between the client and the real server during inspection.

NEW QUESTION # 84

What transport mechanism will Zscaler Client Connector use to forward traffic to the Zero Trust Exchange when configured for Tunnel 2.0?

- A. Zscaler Client Connector will encapsulate the user's traffic in GRE tunnels to the ZTE.
- B. Zscaler Client Connector will encapsulate the user's traffic in dTLS/TLS tunnels to the ZTE.
- C. Zscaler Client Connector will encapsulate the user's traffic in IPSec tunnels to the ZTE.
- D. Zscaler Client Connector will encapsulate the user's traffic in HTTP Connect tunnels to the ZTE.

Answer: B

Explanation:

Zscaler Client Connector's Tunnel 2.0 encapsulates user traffic in DTLS (or TLS) tunnels to the Zero Trust Exchange, providing both transport security and protocol flexibility before handing off to Zscaler's inspection and enforcement engines.

NEW QUESTION # 85

What is the ZIA feature that ensures certain SaaS applications cannot be accessed from an unmanaged device?

- A. Out-of-band Application Access
- B. Tenant Restriction
- C. SaaS Application Access
- D. Identity Proxy

Answer: B

Explanation:

Tenant Restriction is the ZIA feature that enforces access control policies to prevent access to certain SaaS applications from unmanaged or non-compliant devices. This ensures that only authorized and managed devices can access sensitive corporate SaaS resources, enhancing security posture.

The study guide highlights Tenant Restriction as an essential control for enforcing device compliance in SaaS access policies.

NEW QUESTION # 86

Within ZPA, the mapping relationship between Connector Groups and Server Groups can best be defined as which of the following?

- A. Server Groups are configured for Dynamic Server Discovery so that mapped Connector Groups can DNS resolve and make health checks toward the application.
- B. Connector Groups are configured for Dynamic Server Discovery so that ZPA can steer traffic through the appropriate Server Group.
- C. Connector Groups are configured for Dynamic Server Discovery so that mapped Server Groups can DNS resolve and

advertise the applications.

- D. Server Groups are configured for Dynamic Server Discovery so that mapped Connector Groups can then DNS resolve individual application Segment Groups.

Answer: A

Explanation:

Server Groups in ZPA use Dynamic Server Discovery to supply Connector Groups with the application endpoints' DNS names or IPs. The Connector Groups then resolve those addresses and perform health checks to ensure the applications are reachable before steering user traffic.

NEW QUESTION # 87

An administrator wants to allow users to access a wide variety of untrusted URLs. Which of the following would allow users to access these URLs in a safe manner?

- **A. Browser Isolation**
- B. Zscaler Client Connector
- C. App Connector
- D. Zscaler Private Access

Answer: A

Explanation:

Browser Isolation enables secure access to potentially malicious or untrusted websites by rendering web pages in a remote containerized environment. This isolates any harmful content away from the user's device, ensuring safe browsing without compromising endpoint security. This approach is especially effective for unknown or risky URLs where traditional content filtering might be insufficient.
