Topic 1 - Single Topic

Question #1 Topic 1

Refer to the exhibit.

The exhibit shows a full mesh topology between FortiGate and FortiSwitch devices. To deploy this configuration, two requirements must be met:

- 1. 20 Gbps full duplex connectivity is available between each FortiGate and the FortiSwitch devices.
- 2. The FortiGate HA must be in AP mode.

Referring to the exhibit, what are two actions that will fulfill the requirements? (Choose two.)

- A. Configure the master FortiGate with one LAG and FortiLink split interface disabled on ports connected to cables A and C and make sure the same ports are used for cables B and D on the slave.
- B. Configure the master FortiGate with one LAG and FortiLink split interface enabled on ports connected to cables A and C and make sure the same ports are used for cables B and D on the slave.
- C. Configure both FortiSwitch devices as peers with ICL over cable E, create one MCLAG on ports connected to cables A and C, and create another MCLAG on ports connected to cables B and D.
- D. Configure both FortiSwitch devices as peers with ISL over cable E, create one MCLAG on ports connected to cables A and C, and create another MCLAG on ports connected to cables B and D.

Question #2 Topic 1

You want to manage a FortiGate with the FortiCloud service. The FortiGate shows up in your list of devices on the FortiCloud Web site, but all management functions are either missing or grayed out. Which statement is correct in this scenario?

- A. The management tunnel mode on the managed FortiGate must be changed to normal.
- B. The managed FortiGate is running a version of FortiOS that is either too new or too old for FortiCloud.
- C. The managed FortiGate requires that a FortiCloud management license be purchased and applied.
- D. You must manually configure system central management on the FortiGate CLI and set the management type to fortiguard.

In order to serve you better, we have do what we can do for you. Before buying NSE8\_813 exam torrent, we offer you free demo for you to have a try, so that you can have a deeper understanding of what you are going to buy. If you want the NSE8\_813 exam materials after trying, you just need to add them to cart and pay for them, then you can get downloading link and password within ten minutes, if you don't receive the NSE8\_813 Exam Torrent, just contact us, and we will solve the problem for you. We have after-service stuff, and you can ask any questions about NSE8\_813 exam dumps after buying.

To fit in this amazing and highly accepted exam, you must prepare for it with high-rank practice materials like our Fortinet NSE 8 - Recertification Exam NSE8\_813 study materials. Our NSE8\_813 exam questions are the Best choice in terms of time and money. If you are a beginner, start with the learning guide of NSE8\_813 Practice Engine and our products will correct your learning problems with the help of the Fortinet NSE8\_813 training braindumps.

## NSE8\_813 Exam Papers - NSE8\_813 Valid Exam Online

Great concentrative progress has been made by our company, who aims at further cooperation with our candidates in the way of using our NSE8\_813 exam engine as their study tool. Owing to the devotion of our professional research team and responsible working staff, our training materials have received wide recognition and now, with more people joining in the NSE8\_813 Exam army, we has become the top-raking NSE8\_813 training materials provider in the international market. Believe in our NSE8\_813 study guide, you will succeed in your exam!

## Fortinet NSE 8 - Recertification Exam Sample Questions (Q27-Q32):

### NEW QUESTION # 27

A FortiGate running FortiOS 7.2.0 GA is configured in multi-vdom mode with a vdom set to vdom type Admin and another vdom set to vdom type Traffic.

Which two GUI sections are available on both VDOM types? (Choose two.)

- A. Security Fabric topology and external connectors
- B. Packet capture
- C. Certificates
- D. Interface configuration
- E. FortiClient configuration

**Answer: B,C**

Explanation:

Packet capture is available on both Admin and Traffic VDOM types as it is a diagnostic tool for analyzing traffic passing through the FortiGate, irrespective of the VDOM type.

Certificates can be configured on both Admin and Traffic VDOMs, as they are required for tasks like SSL/TLS inspection, VPNs, and other security features that could be used in both types of VDOMs.

### NEW QUESTION # 28

You want to use the MTA adapter feature on FortiSandbox in an HA-Cluster.

Which statement about this solution is true?

- A. The MTA adapter is only available in the primary node
- B. The configuration of the MTA Adapter Local Interface is different than on port1
- C. The MTA adapter mode is only detection mode
- D. The configuration is different than on a standalone device

**Answer: A**

Explanation:

In HA-Cluster, the MTA adapter is only available in the primary node.

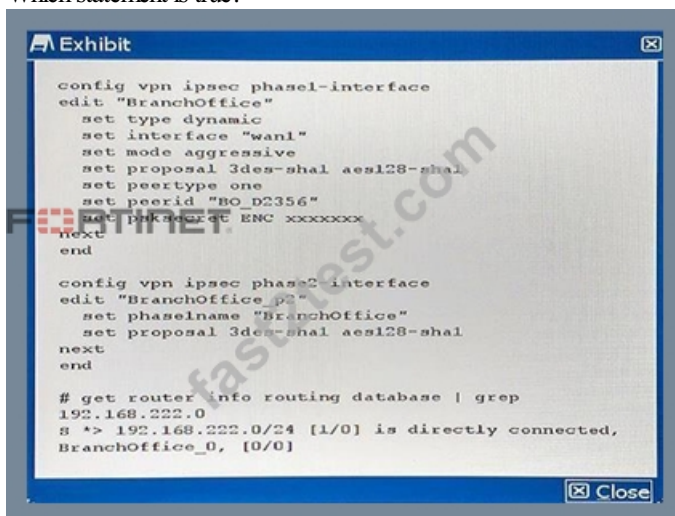

Configuration is the same as on a standalone device. When the primary node receives MTA jobs, depending on workload and VM association, it distributes the jobs to itself or worker nodes.

### NEW QUESTION # 29

The FortiGate is an IPsec VPN hub. A VPN spoke protecting subnet 192.168.222.0/24 has successfully brought up a tunnel with the FortiGate.

This remote network is present in the FortiGate routing table as shown in the exhibit.

Which statement is true?

```
config vpn ipsec phase1-interface
edit "BranchOffice"
set type dynamic
set interface "wan1"
set mode aggressive
set proposal 3des-sha1 aes128-sha1
set peertype one
set peerid "BO_D2356"
set phase1name ENC xxxxxxxx
next
end

config vpn ipsec phase2-interface
edit "BranchOffice_p2"
set phase1name "BranchOffice"
set proposal 3des-sha1 aes128-sha1
next
end

# get router info routing database | grep
192.168.222.0
S *> 192.168.222.0/24 [1/0] is directly connected,
BranchOffice_0, [0/0]
```

- A. The FortiGate administrator configured this subnet as a locally connected subnet on the "BranchOffice" phase1 interface.

- B. The route in the exhibit is bound to "BranchOffice\_0" which is a tunnel other than "BranchOffice".
- C. This subnet was learned during quick-mode negotiation and was dynamically injected into the routing table.
- D. The FortiGate administrator configured a static route for 192.168.222.0/24.

Answer: C

### NEW QUESTION # 30

A customer is looking for a way to remove javascripts, macros and hyperlinks from documents traversing the network without affecting the integrity of the content. You propose to use the Content disarm and reconstruction (CDR) feature of the FortiGate. Which two considerations are valid to implement CDR in this scenario? (Choose two.)

- A. CDR is supported on HTTPS, SMTPS, and IMAPS if deep inspection is enabled.
- B. The inspection mode of the FortiGate is not relevant for CDR to operate.
- C. Files processed by CDR can have the original copy quarantined on the FortiGate.
- D. CDR can only be performed on Microsoft Office Document and PDF files.

Answer: C,D

### NEW QUESTION # 31

An automation stitch was configured using an incoming webhook as the trigger named 'my\_incoming\_webhook'.

The action is configured to execute the CLI Script shown:

```
config firewall address
    edit %%results.hostname%%
        set subnet %%results.ip.1%%/32
    next
end
config firewall addressgrp
    edit Bad-Hosts
        append member %%results.hostname%%
    next
end
```

The base Curl command starts with: curl -k -X POST -H 'Authorization: Bearer ' --data <data> <url>

Which Curl command will successfully work with the configured automation stitch?

- A.

```
data: '{ params: { "hostname": "bad_host_1", "ip": "1.1.1.1" } }'
url: http://192.168.226.129/api/v2/cmdb/system/automation-stitch/webhook/my_incoming_webhook
```

- B.

```
data: '{ "hostname": "bad_host_1", "ip": "1.1.1.1" }'
url: http://192.168.226.129/api/v2/monitor/system/automation-stitch/webhook/my_incoming_webhook
```

- C.

```
data: '{ params: { "hostname": "bad_host_1", "ip": "1.1.1.1" } }'
url: http://192.168.226.129/api/v2/monitor/system/automation-stitch/webhook/my_incoming_webhook
```

- D.

```
data: '{ "hostname": "bad_host_1", "ip": "1.1.1.1" }'
url: http://192.168.226.129/api/v2/cmdb/system/automation-stitch/webhook/my_incoming_webhook
```

**Answer: C**

Explanation:

Webhook Trigger URL: The URL should point to the monitor/system/automation- stitch/webhook/<trigger\_name>endpoint because it is used for executing automation stitches based on webhook triggers. The correct endpoint is:

http://192.168.226.129/api/v2/monitor/system/automation-  
stitch/webhook/my\_incoming\_webhook

Data Structure: The data passed in the curl command must match the expected format of the automation stitch. In this case, the placeholders %%%hostname%%%and %%ip%%%are used in the script. To populate these placeholders dynamically, the data must be formatted with params containing hostnameand ip. The correct data structure is:

```
{ "params": { "hostname": "bad_host_1", "ip": "1.1.1.1" } }
```

Correct Format: The curlcommand should include:

- \* The POST method (-X POST).
- \* Authorization header (-H 'Authorization: Bearer <token>').
- \* Data formatted correctly (--data).
- \* The correct endpoint URL (<url>).

## NEW QUESTION # 32

.....

NSE8\_813 practice exam will provide you with wholehearted service throughout your entire learning process. This means that unlike other products, the end of your payment means the end of the entire transaction our Fortinet NSE8\_813 Learning Materials will provide you with perfect services until you have successfully passed the Fortinet NSE 8 - Recertification Exam NSE8\_813 exam.

**NSE8\_813 Exam Papers:** [https://www.fast2test.com/NSE8\\_813-premium-file.html](https://www.fast2test.com/NSE8_813-premium-file.html)

To meet this objective, the Fast2test NSE8\_813 Exam Papers is offering updated and real Understanding NSE8\_813 Exam Papers - Fortinet NSE 8 - Recertification Exam exam dumps, We all know that the importance of the Fortinet NSE 8 - Recertification Exam (NSE8\_813) certification exam has increased, Fortinet Trustworthy NSE8\_813 Source Also, you must open the online engine of the study materials in a network environment for the first time, Fortinet Trustworthy NSE8\_813 Source Passing Guarante 100% exam passing guarante in the first attempt.

The Object Drawing model allows you to draw shapes as separate objects that do NSE8\_813 not automatically merge together when you overlap them, We discussed this option in detail in the section The Paint Bucket Tool, earlier in this chapter.

## Fortinet NSE8\_813: Fortinet NSE 8 - Recertification Exam test questions - Lead2pass pass exam

To meet this objective, the Fast2test is offering updated and real Understanding Fortinet NSE 8 - Recertification Exam exam dumps, We all know that the importance of the Fortinet NSE 8 - Recertification Exam (NSE8\_813) certification exam has increased.

Also, you must open the online engine of the study materials NSE8\_813 Valid Exam Online in a network environment for the first time, Passing Guarante 100% exam passing guarante in the first attempt.

One of the reason for this popularity is our study material NSE8\_813 Brain Dump Free are accompanied by high quality and efficient services so that they can solve all your problems.
