300-820 Test Online - 300-820 Test Vce Free

If you are preparing for the practice exam, we can make sure that the 300-820 study materials from our company will be the best choice for you, and you cannot find the better study materials than our company'. There are a lot of advantages of our 300-820 Study Materials, and then, I am going to introduce the special functions of our 300-820 study materials in detail to you. We are hopeful that you will like our products.

Cisco Implementing Cisco Collaboration Cloud and Edge Solutions Sample Questions (Q102-Q107):

NEW QUESTION # 102

Which protocol and port are used for signaling between on-premises Cisco Webex Video Mesh Nodes and Cloud Media Services?

- A. standard SIP over TCP port 5060
- B. standard SIP TLS over TCP port 5061
- C. signaling over HTTPS TCP port 443
- D. signaling over TCP port 444

Answer: C

NEW QUESTION # 103

Refer to the exhibit. In an environment SIP devices are registered to CUCM and H.323 devices to VCS.

What would be required to enable these calls to setup correctly?

- A. Create a presearch transform.
- **B. Change the interworking mode to On.**
- C. Disable SIP in the external zone.
- D. Change the domain of SIP endpoint A to cisco.com

Answer: B

NEW QUESTION # 104

An Expressway-E is configured using a single NIC with NAT.

How must the Expressway-C traversal client zone be configured to connect to the Expressway-E?

- A. The zone profile must be set to default.
- B. The peer address must be the Expressway-E NAT address.
- **C. The peer address must be the Expressway-E LAN 1 IP address.**
- D. TLS verify must be enabled.

Answer: C

NEW QUESTION # 105

In a larger Cisco Collaboration deployment, a user requires the advanced file transfer function in Cisco Jabber while the client is using Mobile and Remote Access. The deployment has multiple Expressway clusters and internal Cisco UCM clusters. Which configuration must be applied on Cisco Expressway-C for this function to be available?

- A. The HTTP Allow List must be manual or use Automatic inbound rules updated to include all Cisco IM and Presence servers.
- B. The HTTP Allow List must use Automatic update rules to include all Cisco IM and Presence servers.
- C. The HTTP Allow List must use Automatic update rules to include all Cisco UCM servers.
- **D. The HTTPS Allow List must be manual or use Automatic inbound rules updated to include all Cisco IM and Presence servers.**

Answer: D

NEW QUESTION # 106

A company has an on-premises Cisco collaboration cluster that contains Cisco UCM, IM and Presence, and Cisco Webex in the cloud. The company wants to integrate the on-premises infrastructure with Webex to enable interoperability with the Webex App. An engineer already configured the cluster in Cisco UCM, IM and Presence, and the organization in the Webex Control Hub. Which action must the engineer take to complete the configuration?

- A. Deploy Directory Connector.
- B. Open the TCP 443 port from IM and Presence to Webex Cloud.
- **C. Deploy a Cisco Expressway Message Connector host.**
- D. Deploy a Webex Device Connector.

Answer: C

Explanation:

Hybrid Message connects your Unified Communications Manager IM and Presence Service (IM and Presence Service) to Webex to enable interoperability with Webex App.

The Hybrid Message enables interoperability between these two groups of users. The components that make Hybrid message possible are the message connector, hosted on Cisco Expressway infrastructure on your premises, and the Message Service, running in the Webex cloud.
