

EXIN CDCP Latest Exam Forum - 100% Pass 2026

Realistic CDCP Valid Test Review

P.S. Free 2026 EXIN CDCP dumps are available on Google Drive shared by PracticeMaterial: https://drive.google.com/open?id=10TWXiZEubhpnx5iS8GGGM_sBH4WAvmVw

If you want to practice the CDCP exam questions with different electronic devices. We believe our APP version of CDCP training braindump will be very convenient for you. In addition, the online version of our CDCP training materials can work in an offline state. If you buy our CDCP Study Guide, you have the chance to use our CDCP study materials for preparing your exam when you are in an offline state. We believe that you will like the online version of our CDCP exam questions.

Our CDCP learning prep boosts the self-learning, self-evaluation, statistics report, timing and test stimulation functions and each function plays their own roles to help the clients learn comprehensively. The self-learning and self-evaluation functions of our CDCP guide materials help the clients check the results of their learning of the CDCP Study Materials. The timing function of our CDCP training quiz helps the learners to adjust their speed to answer the questions and keep alert and our study materials have set the timer.

CDCP Valid Test Review & CDCP New Dumps Sheet

We are never complacent about our achievements, so all content are strictly researched by proficient experts who absolutely in compliance with syllabus of this exam. Accompanied by tremendous and popular compliments around the world, to make you feel more comprehensible about the CDCP practice materials, all necessary questions of knowledge concerned with the exam are included into our CDCP practice materials. They are conducive to your future as a fairly reasonable investment.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Water Supply: This topic is all about water supply techniques and application areas.
Topic 2	<ul style="list-style-type: none">Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 3	<ul style="list-style-type: none">Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 4	<ul style="list-style-type: none">Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.

Topic 5	<ul style="list-style-type: none"> • Equipment Racks: It discusses power rail • strip options, security considerations, and rack standards, properties and selection criteria.
Topic 6	<ul style="list-style-type: none"> • Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 7	<ul style="list-style-type: none"> • Designing a Scalable Network Infrastructure: It covers ANSI • TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 8	<ul style="list-style-type: none"> • Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q57-Q62):

NEW QUESTION # 57

The termination of the ability of a product to perform its required function can be defined as.

- A. Hindrance
- **B. Failure**
- C. Obstacle
- D. Termination

Answer: B

Explanation:

According to the EPI Data Centre Professional (CDCP®) Preparation Guide, failure is defined as "the termination of the ability of a product to perform its required function" (page 9). Failure can occur due to various reasons, such as wear and tear, design flaws, human errors, environmental factors, or external events.

Failure can affect the availability, reliability, and performance of a product, system, or service.

NEW QUESTION # 58

What is a requirement of an FM200 (HFC-227) installation?

- A. Install the gas containers (tanks) close to the data centre.
- B. Install pre-action sprinklers in the same room as the FM200.
- **C. It is a high-pressure gas; therefore nozzles must be mounted with two brackets.**
- D. Drainage system under the raised floor.

Answer: C

Explanation:

FM200 (HFC-227) is a clean agent fire suppression system that uses a high-pressure gas to extinguish fires by reducing the oxygen concentration and absorbing the heat. FM200 is stored in cylinders at pressures of up to 42 bar (600 psi) and is released through nozzles into the protected area. Because of the high pressure, the nozzles must be mounted with two brackets to prevent them from moving or breaking during discharge. The brackets must be securely attached to the ceiling or wall and aligned with the nozzle outlet. The nozzle outlet must also be free of any obstructions that could affect the discharge pattern or distribution.

NEW QUESTION # 59

What is the most preferred unit of measure for cooling capacity?

- **A. Watt**
- B. Ton
- C. BTU
- D. Horsepower

Answer: A

Explanation:

Cooling capacity is the measure of a cooling system's ability to remove heat from a space. The most preferred unit of measure for cooling capacity is watt (W), which is the SI unit for power. Watt is defined as the amount of energy transferred or converted per unit time. One watt is equal to one joule of energy per second. Using watt as the unit of measure for cooling capacity allows for easy comparison and calculation of the cooling performance and efficiency of different cooling systems.

Other units of measure for cooling capacity are ton, BTU, and horsepower, but they are less common and less convenient than watt. Ton is a unit of measure that describes how much water at freezing temperature can be frozen in 24 hours, equivalent to 3.5 kW or 12,000 BTU/h. BTU (British Thermal Unit) is a unit of measure that describes the amount of heat required to raise the temperature of one pound of water by one degree Fahrenheit, equivalent to 0.293 W. Horsepower is a unit of measure that describes the rate at which work is done, equivalent to 746 W.

NEW QUESTION # 60

How many monitoring points should be used in Temperature Measurement?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

According to the EPI Data Centre Professional (CDCP®) Reference Materials, the recommended number of monitoring points for temperature measurement in a data centre is 3 per rack: one at the top, one at the middle, and one at the bottom¹. This is to ensure that the temperature distribution within the rack is uniform and within the acceptable range for the equipment. The temperature sensors should be placed at the front of the rack, where the air enters the equipment, and not at the back, where the hot air exits¹.

NEW QUESTION # 61

When dealing with glass door racks, cold air is injected into the rack from:

- A. The front door in a downflow direction.
- **B. The rear door in a downflow direction.**
- C. The top of the rack through the fans and vents mounted inside the rack.
- D. The bottom of the rack.

Answer: B

NEW QUESTION # 62

.....

The former customers who bought EXIN CDCP training materials in our company all are impressed by the help as well as our after-sales services. That is true. We offer the most considerate after-sales services on our EXIN CDCP Exam Questions for you 24/7 with the help of patient staff and employees. They are all professional and enthusiastic to offer help.
