1Z0-1109-25 Exam Quiz, 1Z0-1109-25 Exam Reviews

2026 Latest Test4Engine 1Z0-1109-25 PDF Dumps and 1Z0-1109-25 Exam Engine Free Share: https://drive.google.com/open?id=1F0hAyVUuAu2GaGDWYvqfce3CpanKJtWZ

If you have registered Oracle 1Z0-1109-25 test, you can enter our Test4Engine Oracle 1Z0-1109-25. You may try our Test4Engine Oracle 1Z0-1109-25 free demo to decide whether to buy or not. You can also download pdf real questions and answers. Test4Engine Oracle 1Z0-1109-25 certification training must help you to pass the exam easily. Its practice test is the most effective. We promise to help you to get the certification. Without the certification, we will give you FULL REFUND of your purchase fees. On request we can provide you with another exam of your choice absolutely free of cost.

Obtaining the 1Z0-1109-25 certificate will make your colleagues and supervisors stand out for you, because it represents your professional skills. At the same time, it will also give you more opportunities for promotion and job-hopping. The 1Z0-1109-25 latest exam dumps have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. On buses or subways, you can use fractional time to test your learning outcomes with 1Z0-1109-25 Test Torrent, which will greatly increase your pro forma efficiency.

Actual 1Z0-1109-25 Test Material Makes You More Efficient - Test4Engine

We have professional technicians to check the website every day, and you can have a clean and safe online shopping environment if you purchasing 1Z0-1109-25 learning materials from us. In addition, we are pass guarantee and money back guarantee for 1Z0-1109-25 exam dumps, and if you fail to pass the exam, we will give you full refund. We have free demo for you to have a try before buying 1Z0-1109-25 Exam Materials of us, so that you can know what the complete version is like. We have online and offline service, and if you have any questions for 1Z0-1109-25 exam dumps, you can consult us.

Oracle Cloud Infrastructure 2025 DevOps Professional Sample Questions (Q14-Q19):

NEW QUESTION # 14
A team wants to deploy artificial intelligence and machine learning workloads in their OCI Container Engine for Kubernetes (OKE) cluster. They prioritize strong isolation, cost-efficiency, and the ability to leverage serverless capabilities.

Which solution is best suited for their requirements?

- A. Self-Managed Nodes in OKE
- B. Virtual nodes in OKE
- C. Managed nodes in OKE
- D. Container Instances in OCI

Answer: B

Explanation:

Virtual nodes in OKE provide a serverless experience for deploying Kubernetes workloads, which means you do not have to manage or scale the underlying infrastructure. This solution is particularly cost-efficient because you only pay for the resources used by the pods, and it provides strong isolation for workloads.

Virtual nodes are well suited for AI/ML workloads as they allow users to easily scale compute resources without being constrained by the limits of individual worker nodes.

NEW QUESTION # 15

You are using the Oracle Cloud Infrastructure (OCI) DevOps service and you have successfully built and tested your software applications in your Build Pipeline. The resulting output needs to be stored in a container repository.

Which stage should you add next to your Build Pipeline?

- A. Managed build
- B. Deliver artifacts
- C. Trigger deployment
- D. Export packages

Answer: B

Explanation:

Step 1: Understanding the Requirement

The objective is to store the resulting build output from a Build Pipeline in a container repository. In OCI DevOps, the build output is stored as an artifact, which can include Docker images or other build-generated files. To store these artifacts in a container repository, you need to explicitly deliver artifacts in the pipeline.

Step 2: Explanation of the Options

A . Trigger deployment

This stage is used to trigger a deployment pipeline, which comes after the artifacts are already stored and prepared for deployment.

Not applicable: This stage is downstream of storing artifacts and is used for deploying software, not for saving the build output to a repository.

B . Managed build

The managed build stage is where you compile, test, and package the application. This has already been completed successfully according to the question.

Not applicable: The question specifies that the build has been completed, so this stage is not relevant at this point.

C . Deliver artifacts

The Deliver Artifacts stage in OCI DevOps pipelines is designed to store the output of the build process in an artifact repository, such as:

OCI Container Registry (OCIR) for Docker images.

Artifact Registry for build artifacts like binaries or JAR files.

Applicable and Correct Answer: This is the correct next step for storing the resulting D . Export packages This is not a standard OCI DevOps pipeline stage. It may be relevant in other contexts but is not related to OCI DevOps for storing build artifacts.

Step 3: Key Concepts of "Deliver Artifacts" in OCI DevOps

Purpose: Save build outputs (artifacts) to an artifact repository.

Artifact Types: Includes Docker container images, binaries, JAR files, or other build outputs.

Repositories Supported:

OCI Container Registry (OCIR)

OCI Artifact Registry

Configuration:

Specify the artifact source (build stage output).

Define the destination repository (e.g., OCIR).

Step 4: References and OCI Resources

OCI DevOps Build Pipelines:

Build Pipeline Documentation
Deliver Artifacts Stage
OCI Container Registry (OCIR):
OCI Container Registry Overview
OCI Artifact Registry:
OCI Artifact Registry Overview

NEW QUESTION # 16

As a DevOps Engineer, you are tasked with explaining the key concepts of Terraform to a new team member. You want to ensure they understand the fundamental concepts of Terraform.
Which of the following best describes the purpose of Terraform variables?

- A. Terraform variables are used to output the final state of the infrastructure after deployment.
- B. Terraform variables are used to manage the life cycle of Terraform resources.
- C. Terraform variables are used to define the structure and organization of Terraform configuration files.
- D. Terraform variables are used to define input values for Terraform configurations, allowing for customization and reuse of infrastructure code.

Answer: D

Explanation:
Terraform variables are used to define input values for Terraform configurations. They allow users to customize infrastructure deployments by providing different values without modifying the configuration files themselves. Variables help in creating reusable infrastructure code, making it easy to maintain and adjust the infrastructure setup according to different environments or needs.

NEW QUESTION # 17

As a DevOps engineer at XYZ Corp, you have been assigned the task of setting up a new OKE (Oracle Kubernetes Engine) cluster to manage the organization's Kubernetes applications hosted on Oracle Cloud Infrastructure (OCI). Your goal is to ensure a smooth and efficient process while preparing for the cluster creation.
Which of the following statements is false regarding the preparation process for setting up a new OKE cluster?

- A. Container Engine for Kubernetes cannot utilize existing network resources for the creation of the new cluster.
- B. Access to an Oracle Cloud Infrastructure tenancy is required to set up the new OKE cluster.
- C. It is necessary to ensure sufficient quota on different resource types in your OCI tenancy for the cluster setup.
- D. Container Engine for Kubernetes automatically creates and configures new network resources for the new cluster.

Answer: A

Explanation:
This statement is false because Container Engine for Kubernetes (OKE) can utilize existing network resources such as Virtual Cloud Networks (VCNs), subnets, security lists, and route tables for the creation of a new cluster. You can either use pre-existing network resources or let OKE create new network resources automatically.

NEW QUESTION # 18

As a developer working on a software project to be deployed on OKE, you have created a Helm chart for your application. You want to deploy the chart using OCI DevOps service.
Which statement is true about deploying a Helm Chart using OCI DevOps service?

- A. The values.yaml file is a generic file located in the OCI Container Registry. You must create a reference to this file.
- B. A single chart can be installed only once into the same cluster, and create single release.
- C. The Helm charts must be located in the OCI Container Registry repository for deployment.
- D. Oracle Cloud Infrastructure (OCI) DevOps service supports deployment of Helm charts to Container Instances.

Answer: C

Explanation:
OCI DevOps service can be used to deploy Helm charts for Kubernetes-based applications running on Oracle Kubernetes Engine (OKE). For deploying the Helm chart through the OCI DevOps service, the Helm chart must be stored in the OCI Container

Registry. This allows the OCI DevOps service to easily access the Helm chart during the deployment process.

NEW QUESTION # 19

......

We always lay great emphasis on the quality of our 1Z0-1109-25 study guide. Never have we been complained by our customers in the past ten years. The manufacture of our 1Z0-1109-25 real exam is completely according with strict standard. We do not tolerate any small mistake. We have researched an intelligent system to help testing errors of the 1Z0-1109-25 Exam Materials. That is why our 1Z0-1109-25 practice engine is considered to be the most helpful exam tool in the market.
