

CWAP-404 Demotesten, CWAP-404 Vorbereitung

2025 Die neuesten ZertPruefung CWAP-404 PDF-Versionen Prüfungsfragen und CWAP-404 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=186hETahhXVT-i3o_tVSkK47qX2PuNKJj

Gott will, dass ich eine Person mit Fähigkeit, statt eine gute aussehende Puppe zu werden. Wenn ich IT-Branche wähle, habe ich dem Gott meine Fähigkeiten bewiesen. Aber der Gott ist mit nichts zufrieden. Er hat mich gezwungen, nach oben zu gehen. Die CWNP CWAP-404 Zertifizierungsprüfung ist eine große Herausforderung in meinem Leben. So habe ich sehr hart gelernt. Aber das macht doch nichts, weil ich ZertPruefung die Fragenkataloge zur CWNP CWAP-404 Zertifizierung gekauft habe. Mit ihr kann ich sicher die die CWNP CWAP-404 Prüfung bestehen. Der Weg ist unter unseren Füßen, nur Sie können ihre Richtung entscheiden. Mit den Prüfungsmaterialien zur CWNP CWAP-404 Prüfung von ZertPruefung können Sie sicher eine bessere Zukunft haben.

CWNP CWAP-404 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Frame Exchanges: The topic evaluates the skills of a wireless network professional in capturing, understanding, and analyzing various frame exchanges, including BSS discovery, joining, roaming, and data frames. The CWAP-404 exam targets the ability of candidates to troubleshoot and resolve issues related to MAC layer operations, ensuring they can maintain robust and efficient WLAN communications.
Thema 2	• PHY Layers and Technologies: In the topic, the CWAP-404 exam tests the understanding of a wireless network professional about the Physical (PHY) layer functions and technologies. Wireless analysts need to describe and apply knowledge of PHY headers, PPDU's, and other PHY-related data. This topic ensures that analysts are proficient in interpreting PHY information within protocol analyzers and can select appropriate capture devices for different PHY types.
Thema 3	• Protocol Analysis: The topic in the CWNP CWAP-404 exam evaluates the skill of a wireless network professional to capture and analyze 802.11 frames effectively. Candidates must demonstrate proficiency in configuring protocol analysis tools, interpreting frame captures to diagnose issues, and applying appropriate troubleshooting methods.
Thema 4	• MAC Sublayer and Functions: The topic measures the ability of a wireless network professional to understand and analyze the MAC layer operations. Candidates are expected to validate BSS configurations and identify issues like CRC errors and retransmissions, ensuring they can maintain the integrity and performance of the WLAN.
Thema 5	• WLAN Medium Access: The exam evaluates the understanding of a wireless network professional about 802.11 contention algorithms and their impact on WLAN performance. The CWAP-404 exam requires candidates to analyze QoS configurations and operations.

CWAP-404 echter Test & CWAP-404 sicherlich-zu-bestehen & CWAP-404 Testguide

In Bezug auf die CWNP CWAP-404 Zertifizierungsprüfung ist die Zuverlässigkeit nicht zu ignorieren. Die Schulungsmaterialien zur CWAP-404 Zertifizierungsprüfung von ZertPruefung werden besonders entworfen, um Ihre Effizienz zu erhöhen. Unsere Website hat weltweit die höchste Erfolgsquote.

CWNP Certified Wireless Analysis Professional CWAP-404 Prüfungsfragen mit Lösungen (Q63-Q68):

63. Frage

How many frames make up the Group Key Handshake excluding any Ack frames that may be required?

- A. 0
- B. 1
- C. 2
- D. 3

Antwort: A

Begründung:

Explanation

The Group Key Handshake consists of two frames excluding any Ack frames that may be required. The Group Key Handshake is used to distribute and update the Group Temporal Key (GTK) for encrypting broadcast and multicast traffic. The AP initiates the Group Key Handshake by sending a Group Key Message 1 frame to a STA, which contains the new GTK and other information. The STA responds with a Group Key Message 2 frame to the AP, which confirms the receipt of the GTK and other information. After this, both the AP and the STA can use the new GTK for encryption and decryption of broadcast and multicast traffic .

64. Frage

What is the function of 802.11 Management frames?

- A. Prioritize network administration traffic
- B. Manage the flow of data
- C. Communicate configuration changes between WLAN controller and APs
- D. Manage the BSS

Antwort: D

Begründung:

Explanation

The function of 802.11 management frames is to manage the BSS. A BSS (Basic Service Set) is a group of STAs (stations) that share a common SSID (Service Set Identifier) and communicate with each other through an AP (access point) or directly in an ad hoc mode. Management frames are one of the three types of 802.11 frames, along with control and data frames. Management frames are used to establish, maintain, and terminate associations between STAs and APs, as well as to advertise and discover BSSs, exchange security information, report errors, and perform other management functions. The other options are not correct, as they are not functions of 802.11 management frames. Prioritizing network administration traffic, communicating configuration changes between WLAN controller and APs, and managing the flow of data are functions of other types of frames or protocols. 65. Frage

Given: The Frame Check Sequence (FCS) is a 32 CRC used for error detection.

The CRC is calculated over what?

- A. Mac Header and Frame Body only
- B. PHY Header and Mac Header only
- C. PHY Header, MAC Header and Frame Body
- D. Frame Body only

Antwort: A

Begründung:

Explanation

The CRC is calculated over the MAC Header and Frame Body only. The CRC (Cyclic Redundancy Check) is a 32-bit value that is used for error detection in wireless transmissions. The CRC is calculated over the MAC Header and Frame Body of a PSDU, which are the parts of the data unit that contain information such as source and destination addresses, frame type, frame control, sequence number, payload, etc. The CRC is appended to the end of the PSDU as a FCS (Frame Check Sequence) field. The CRC is not calculated over the PHY Header or PHY Preamble, which are parts of the PPDU that contain information such as modulation, coding, data rate, etc. The PHY Header and PHY Preamble are added or removed by the PHY layer during the conversion between PSDU and PPDU. References: [Wireless Analysis Professional Study Guide CWAP-404], Chapter 4: 802.11 Physical Layer, page 97-98

66. Frage

When a 5 GHz HT station in a 40 MHz BSS desires to protect a 40 MHz transmission from an OFDM station using an RTS/CTS or CTS-to-Self exchange, what frame format is used for the RTS and/or CTS frames?

- A. HT-mixed format
- B. Phased Coexistence PPDU
- C. HT-greenfield format
- D. Dual-CTS
- E. Non-HT Duplicate

Antwort: E

67. Frage

Which parameters accurately describe the Beacon Interval field in the Beacon frame? (Choose 2)

- A. Value can range from 0 to 2007
- B. easured in time units of 1024 μ s
- C. 4-octet length
- D. Indicates the desired time interval between TBTTs
- E. Indicates the exact time interval between Beacon transmissions

Antwort: B,D

68. Frage

.....

Das Expertenteam von ZertPruefung hat neulich das effiziente kurzfristige Schulungsprogramm zur CWNP CWAP-404 Zertifizierungsprüfung entwickelt. Die Kandidaten sollen an dem 20-stündigen Kurs teilnehmen, dann können sie neue Kenntnisse beherrschen und ihre ursprüngliches Wissen konsolidieren und auch die CWNP CWAP-404 Zertifizierungsprüfung leichter als diejenigen, die viel Zeit und Energie auf die Prüfung verwendet, bestehen.
