On the one hand, the software version can simulate the real CCFA-200b examination for all of the users in windows operation system. By actually simulating the real test environment, you will have the opportunity to learn and correct your weakness in the course of study. So that you can get your best pass percentage by our CCFA-200b Exam Questions.

CrowdStrike Falcon Administrator Sample Questions (Q116-Q121):

NEW QUESTION # 116

What is true about User Accounts created by the Falcon Administrator?

- A. All User Accounts must start with the domain identifier and number
- **B. All User Accounts must be created with an email address from the list of approved domains**
- C. All new User Accounts are created using an employee identification number (EID)
- D. By default, all User Accounts are created with the Falcon Analyst role

Answer: B

NEW QUESTION # 117

In order to prevent duplicate Agent IDs, what install parameter should be used on VMs to be used as persistent clones?

- A. ProvNoWait=1
- **B. VM=True**
- C. NO_START=1
- D. /quiet

Answer: B

NEW QUESTION # 118

When troubleshooting the Falcon Sensor on Windows, what is the correct parameter to output the log directory to a specified file?

- A. C:\CSSensor\Install\LogFiles
- B. \log log.txt
- C. LOG=log.txt
- **D. /log log.txt**

Answer: D

Explanation:

The correct parameter to output the log directory to a specified file when troubleshooting the Falcon Sensor on Windows is /log log.txt. This parameter will create a log file named log.txt in the same folder where you run the sensor installation command. The log file will contain information about the sensor installation process, such as the parameters used, the actions performed, and any errors encountered.

NEW QUESTION # 119

After successfully installing Falcon on a new employee's laptop, you notice that the machine is assigned the default prevention policy instead of the custom prevention policy you created. You verify that the Falcon sensor is functioning properly, and you confirm that the custom policy is enabled and successfully running on more than 1,000 other Falcon hosts.

What is the likely cause of this issue?

- A. A prompt to apply the new prevention policy was manually declined
- **B. The laptop is not a member of a host group assigned to the custom policy**
- C. A host-based firewall rule is preventing the custom policy from applying successfully
- D. Falcon requires a 24-hour waiting period to apply custom policies to newly installed hosts

Answer: B

NEW QUESTION # 120

You have created a Sensor Update Policy for the Mac platform. Which other operating system(s) will this policy manage?

- A. Windows
- B. *nix
- **C. Only Mac**
- D. Both Windows and *nix

Answer: C

Explanation:

A Sensor Update Policy for the Mac platform will only manage Mac operating systems. Sensor Update Policies are platform-specific, meaning that they only apply to hosts that have the same operating system as the policy. For example, a Sensor Update Policy for Windows will only manage Windows hosts, and a Sensor Update Policy for Linux will only manage Linux hosts. You cannot create a Sensor Update Policy that manages multiple operating systems at once.

NEW QUESTION # 121

.....

As old saying goes, no pains, no gains. You must depend on yourself to acquire what you want. No one can substitute you with the process. Of course, life has shortcut, which can ensure you have a bright future. Our CCFA-200b study materials will become your new hope.
