COBIT-Design-and-Implementation赤本合格率 & COBIT-Design-and-Implementation試験対策

多くの人は、COBIT-Design-and-Implementationの有効な学習ガイド教材を購入することを好みます。なぜなら、購入するだけで間違いなくテストに合格できると深く信じているからです。COBIT-Design-and-Implementationガイドの質問を好む理由は、教材の品質が非常に高いためです。長年、私たちは常にCOBIT-Design-and-

Implementation学習教材の完成に専念しています。一流の研究チームと一流の販売サービスを強化します。COBIT-Design-and-Implementationガイドの質問とCOBIT-Design-and-Implementation学習教材の更新を担当する専門スタッフの研究と制作を専門とするエキスパートチームを後押しします。

ISACA COBIT Design and Implementation Certificate 認定 COBIT-Design-and-Implementation 試験問題 (Q27-Q32):

質問 # 27

While tailoring design factors, which of the following roles of IT demonstrates the HIGHEST level of enterprise dependency on I&T?

- A. Support
- B. Turnaround
- C. Strategic
- D. Factory

正解: C

解説:

In COBIT 2019, the role of IT that demonstrates the highest level of enterprise dependency on Information and Technology (I&T) is Strategic. This role indicates that IT is not only integral to the business but is also a driver of innovation and strategic initiatives.

References in COBIT 2019 Design and Implementation:

* COBIT 2019 Design Guide, Chapter 3: This chapter explains the various roles of IT within an enterprise. The strategic role is where IT is pivotal for business transformation, competitive advantage, and achieving strategic business goals.

* COBIT 2019 Framework: Introduction and Methodology, Chapter 4: This chapter highlights the impact of the strategic role of IT on the governance system, emphasizing the high dependency on IT for achieving business objectives.

Enterprises with IT in a strategic role rely heavily on IT to drive business strategies, innovate, and gain a competitive edge, making it the highest level of dependency on I&T.

質問 # 28

It is CRITICAL to perform a due diligence review following which type of event?

- A. Merger, acquisition, or divestiture
C New business strategy or priority
- B. External consultant assessment
- C. Shifts in the market or economy

正解: A

解説:

It is critical to perform a due diligence review following a merger, acquisition, or divestiture. Such events involve significant changes to the organizational structure, assets, and operations, necessitating thorough review to identify risks, synergies, and compliance issues.

References in COBIT 2019 Design and Implementation:

* COBIT 2019 Framework: Governance and Management Objectives, APO12 (Managed Risk): This objective emphasizes the importance of risk management during significant organizational changes, such as mergers and acquisitions.

* COBIT 2019 Implementation Guide, Chapter 3: This chapter outlines the need for due diligence in evaluating potential risks and ensuring that governance and management practices are adapted to new organizational contexts.

A due diligence review ensures that all aspects of the merger, acquisition, or divestiture are carefully assessed, mitigating risks and supporting a smooth transition.

質問 # 29

When considering the IT implementation methods design factor, and the design factor value is DevOps, which of the following should be a management objective priority?

- A. Managed availability and capacity (BAI04)
- B. Managed service requests and incidents (DSS02)
- C. Managed change acceptance and transitioning (BAI07)

- **D. Managed solution identification and build (BAI03)**

正解: D

解説:

When DevOps is selected as the IT implementation method design factor, COBIT 2019 emphasizes continuous integration, automation, and rapid solution delivery. The Design Guide indicates that DevOps environments require strong governance over solution identification, development, and build practices.

BAI03 (Managed Solution Identification and Build) directly supports these needs by ensuring that solutions are designed, built, tested, and maintained in a controlled yet agile manner. While change transitioning (BAI07) and operational objectives remain important, DevOps shifts responsibility earlier in the lifecycle toward build and integration activities.

DSS02 and BAI04 focus on operational stability rather than rapid delivery. Therefore, under DevOps, BAI03 becomes a priority management objective to ensure quality, speed, and alignment with business requirements.

質問 # 30

A COBIT consultant has been hired with a mandate from the board to ensure the enterprise uses leading-edge technologies to provide exceptional service delivery to its customers and enhance the enterprises reputation as a first mover. Which of the following governance and management objectives should the consultant recommend?

- A. BAI08 Managed Knowledge
- **B. APO04 Managed Innovation**
- C. AP011 Managed Quality
- D. APO02 Managed Strategy

正解: B

解説:

To ensure the enterprise uses leading-edge technologies to provide exceptional service delivery and enhance its reputation as a first mover, the COBIT consultant should recommend the governance and management objective APO04 Managed Innovation. This objective focuses on fostering and managing innovation to improve business processes and services.

References in COBIT 2019 Design and Implementation:

* COBIT 2019 Framework: Governance and Management Objectives, APO04 (Managed Innovation): This objective is specifically designed to support and manage the innovation process, ensuring that the enterprise can leverage new technologies and ideas to maintain a competitive edge.

* COBIT 2019 Implementation Guide, Chapter 4: This chapter discusses the importance of innovation in achieving strategic goals and the role of managed innovation in governance.

By focusing on managed innovation, the enterprise can systematically explore and adopt new technologies, enhancing service delivery and maintaining its status as a market leader.

質問 # 31

Which of the following situations is MOST likely the root cause for an enterprise lacking the required skills and competencies to execute an EGIT implementation program plan?

- **A. Enterprise training does not include business and management skill development.**
- B. The enterprise relies too heavily on the use of COBIT as its EG IT framework.
- C. IT staff are too often focused on the achievement of business value.
- D. Business staff are too often involved in IT processes that affect business processes and procedures.

正解: A

解説:

The most likely root cause for an enterprise lacking the required skills and competencies to execute an EGIT (Enterprise Governance of IT) implementation program plan is that enterprise training does not include business and management skill development. Effective EGIT implementation requires a blend of technical, business, and management skills.

References in COBIT 2019 Design and Implementation:

* COBIT 2019 Framework: Governance and Management Objectives, APO07 (Managed Human

* Resources): This objective emphasizes the importance of developing skills and competencies, including business and management skills, for successful governance and management of enterprise IT.

* COBIT 2019 Implementation Guide, Chapter 3: This chapter outlines the need for comprehensive training programs that address

not only technical skills but also business and management capabilities to ensure successful implementation of governance frameworks.

Without proper training that includes business and management skills, staff may be ill-prepared to handle the complexities of EGIT implementation, leading to skill gaps and competency issues.
