## **ISQI CPRE-FL\_Syll\_3.0 Latest Exam Answers & PassCollection - Leader in Qualification Exams & CPRE-FL\_Syll\_3.0: IREB Certified Professional for Requirements Engineering. Foundation Level**

Looking at the experiences of our loyal customers, you will find with the help of our excellent CPRE-FL\_Syll\_3.0 exam questions, to achieve the desired certification is no longer a unreached dream. And i believe that you will definitely be more determined to pass the CPRE-FL\_Syll\_3.0 Exam. At the same time, you will also believe that our CPRE-FL\_Syll\_3.0 learning questions can really help you. We can claim that as long as you study with our CPRE-FL\_Syll\_3.0 preparation engine for 20 to 30 hours, you will pass the exam easily.

### **ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q54-Q59):**

#### **NEW QUESTION # 54**

The scope of the system equals:

- A. Everything that is inside the system boundary.
- B. The portion of the system environment relevant for understanding the system and its requirements.
- C. The boundary between the system and its surrounding context.
- D. **The range of things that can be shaped or designed while developing a system**

#### **Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

IREB distinguishes system boundary, system context and scope of the system. The system boundary separates the system from its environment. The system context is the relevant part of the environment needed to understand the system and its requirements. The scope describes what can be influenced or shaped during development-the range of aspects we intend to design or modify. Some elements inside the scope may lie outside the final system boundary (e.g., organizational processes); likewise not everything inside the boundary must be in scope. Hence the correct definition is option B.

#### **NEW QUESTION # 55**

Choose the right sentence regarding glossaries.

- A. **All the other options are wrong.**
- B. The usage of a glossary should be elective.
- C. The glossary should be managed and maintained in a decentralised manner.
- D. A good glossary should contain all items relevant for the system, but not everyday terms.

#### **Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The handbook advises that a glossary be centrally managed by an identified owner or small team to ensure consistency and controlled updates; decentralised ownership easily leads to divergence, so A is wrong. To realize its benefits, glossary use must be mandatory-documents should be checked against it-so B is incorrect. Everyday words that receive a special meaning in the project (e.g., "customer", "case") must be included, so C also fails. Therefore, the only correct choice is that all other statements are wrong.

#### **NEW QUESTION # 56**

Requirements conflict resolution is considered to be part of which major RE task?

- A. Documentation

- B. Validation
- C. Elicitation
- D. Management

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to the CPRE syllabus, Requirements Engineering comprises four major tasks: elicitation, documentation, validation and management. Elicitation is not just "collecting" requirements; it also includes dealing with conflicts that emerge when different stakeholders express incompatible needs, expectations or priorities. Conflict analysis, negotiation and resolution are therefore components of elicitation activities.

Validation focuses on checking correctness and quality of documented requirements, while management handles versioning, traceability and change control. Documentation is about representing requirements in suitable forms. Thus, conflict resolution is explicitly placed under elicitation.

#### NEW QUESTION # 57

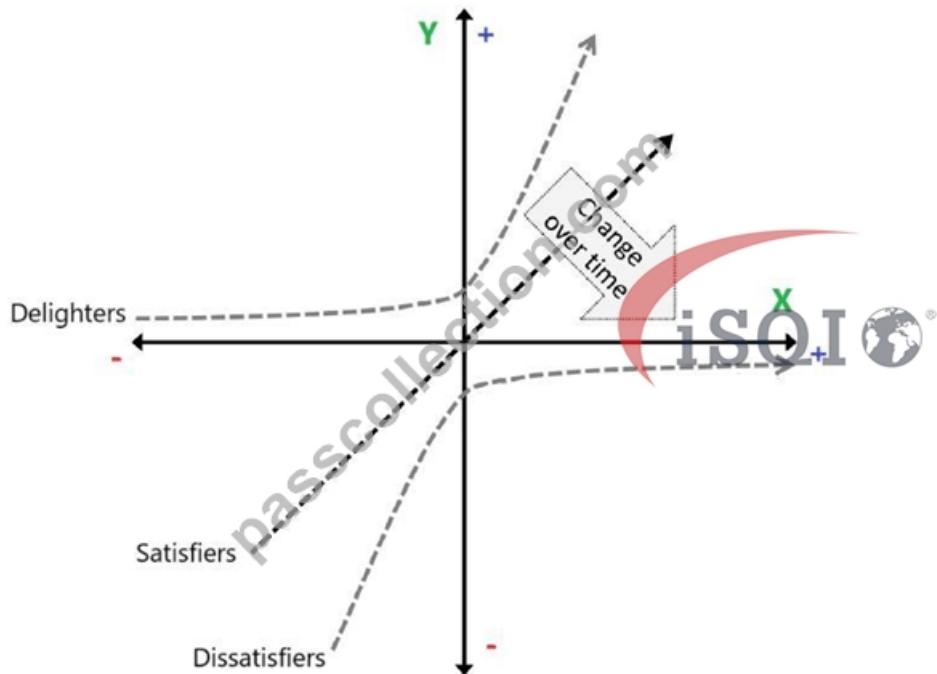

Choose the right sentence regarding the types of views:

- A. Projective views provide information on a carefully chosen subset of requirements.
- B. All the other options are wrong.
- C. An aggregating view presents summaries, totals, or averages derived from a group of requirements.
- D. A selective view presents a subset of the available data (attributes) for the requirements.

**Answer: C**

#### NEW QUESTION # 58

Consider the following representation of the Kano model (diagram).

Which option best describes what the axes Y and X represent?

- A. Y = Customer satisfaction; X = Specified requirements
- B. Y = Customer satisfaction; X = Implementation of requirements
- C. Y = Implementation of requirements; X = Happiness of stakeholders
- D. Y = Happiness of stakeholders; X = Implementation of requirements

**Answer: B**

## NEW QUESTION # 59

.....

If you want to pass the exam quickly, CPRE-FL\_Syll\_3.0 prep guide is your best choice. We know that many users do not have a large amount of time to learn. In response to this, we have scientifically set the content of the data. You can use your piecemeal time to learn, and every minute will have a good effect. In order for you to really absorb the content of CPRE-FL\_Syll\_3.0 Exam Questions, we will tailor a learning plan for you. This study plan may also have a great impact on your work and life. As long as you carefully study the CPRE-FL\_Syll\_3.0 study guide for twenty to thirty hours, you can go to the CPRE-FL\_Syll\_3.0 exam.
