WGU Web-Development-Applications Exam Questions For Greatest

Achievement [Updated 2026]

Without complex collection work and without no such long wait, you can get the latest and the most trusted Web-Development-Applications exam materials on our website. The different versions of our dumps can give you different experience. There is no doubt that each version of the Web-Development-Applications Materials is equally effective. To instantly purchase our Web-Development-Applications exam materials with the safe payment PayPal, you can immediately download it to use.

WGU Web Development Applications Sample Questions (Q122-Q127):

NEW QUESTION # 122

What is the process for JavaScript from validation?

- A. Form fields are validated after the form is submitted but before form data is sent to the server
- B. User input is sent to the server after the form is completed for validation.
- C. Form fields are validated as the user inputs data after form data is sent to the server.
- D. User input is sent to the server as fields are completed for validation.

Answer: A

Explanation:

JavaScript form validation typically occurs after the form is submitted but before the form data is sent to the server. This allows the client-side script to check the input data and prevent the form from being submitted if the data is invalid.

* Client-Side Validation:

* Before Form Submission: JavaScript validates the form fields after the user attempts to submit the form

* Prevent Default Submission: If the validation fails, JavaScript can prevent the form from being submitted and display appropriate error messages.

* Usage Example:

```
document.getElementById("myForm").addEventListener("submit", function(event) { var isValid = true;  
// Perform validation checks  
if (!isValid) {  
event.preventDefault(); // Prevent form submission  
alert("Please correct the errors.");  
}  
});
```

This example prevents form submission if the validation fails.

NEW QUESTION # 123

What allows a scripting language to manipulate elements on a web page?

- A. DOM
- B. XML
- C. CSS
- D. HTML

Answer: A

Explanation:

The Document Object Model (DOM) is an API for HTML and XML documents that defines the logical structure of documents and the way a document is accessed and manipulated.

* DOM Explanation:

* The DOM represents the page so that programs can change the document structure, style, and content.

* It provides a way for scripts to update the content, structure, and style of a document while it is being viewed.

* Explanation:

* Option A: CSS is incorrect because it is used for styling web pages.

* Option B: XML is incorrect because it is a markup language, not an API for manipulating web page elements.

* Option C: HTML is incorrect because it is the markup language used to create web pages, not an API for manipulation.

* Option D: DOM is correct because it allows a scripting language to manipulate elements on a web page.

W3Schools - JavaScript HTML DOM

NEW QUESTION # 124

What is the used to render images dynamically?

- A. MPEG-4
- B. Ogg
- C. H.264
- D. Canvas

Answer: D

Explanation:

The `<canvas>` element in HTML5 is used to render images and graphics dynamically through JavaScript. It is a powerful feature for creating graphics, game visuals, data visualizations, and other graphical content directly in the browser.

* Canvas Element: The `<canvas>` element is an HTML tag that, with the help of JavaScript, can be used to draw and manipulate graphics on the fly.

* Usage Example:

```
<canvas id="myCanvas" width="200" height="100"></canvas>
<script>
var canvas = document.getElementById("myCanvas");
var ctx = canvas.getContext("2d");
ctx.fillStyle = "#FF0000";
ctx.fillRect(0, 0, 200, 100);
</script>
```

In this example, a red rectangle is drawn on a canvas element.

NEW QUESTION # 125

A web page has a section that contains an '`<article>`' element. The element is always 10 pixels to the right of its normal position. Which type of layout positioning should the '`<article>`' element use?

- A. Relative
- B. Absolute
- C. Fixed
- D. Static

Answer: A

Explanation:

> "Relative positioning allows an element to be positioned relative to its normal (static) position. For example, 'left: 10px' shifts the element 10 pixels to the right of its original location."

>

> "Unlike 'absolute' or 'fixed', relative positioning does not remove the element from the document flow." References:

* MDN Web Docs: `position: relative`

* CSS Positioning Module Level 3

NEW QUESTION # 126

Which application programming interface (API) should a developer use to store data on a user's local device?

- A. File system
- B. History

- C. Canvas
- D. Drag and drop

Answer: A

Explanation:

> 'The File System API allows web applications to store and retrieve data on a user's local device. It enables persistent, sandboxed access to a portion of the user's local file system.'

>

> This API is designed for local storage beyond temporary in-memory or cookie-based solutions.

References:

- * MDN Web Docs: File System API
- * W3C File API Specification

NEW QUESTION # 127

.....

Our company never sets many restrictions to the Web-Development-Applications exam question. Once you pay for our study materials, our system will automatically send you an email which includes the installation packages. You can conserve the Web-Development-Applications real exam dumps after you have downloaded on your disk or documents. Whenever it is possible, you can begin your study as long as there has a computer. All the key and difficult points of the Web-Development-Applications exam have been summarized by our experts. They have rearranged all contents, which is convenient for your practice. Perhaps you cannot grasp all crucial parts of the Web-Development-Applications Study Tool by yourself. You also can refer to other candidates' review guidance, which might give you some help. Then we can offer you a variety of learning styles. Our printable Web-Development-Applications real exam dumps, online engine and windows software are popular among candidates. So you will never feel bored when studying on our Web-Development-Applications study tool.
