

2026 Trustable Real AZ-700 Torrent | 100% Free Demo AZ-700 Test

What's more, part of that PassExamDumps AZ-700 dumps now are free: <https://drive.google.com/open?id=14pVMfqySgxzJS0ijpgfV9rZh7dvrzWvm>

Our service tenet is to let the clients get the best user experiences and be satisfied. From the research, compiling, production to the sales, after-sale service, we try our best to provide the conveniences to the clients and make full use of our AZ-700 guide materials. We organize the expert team to compile the AZ-700 Practice Guide elaborately and constantly update them. To let the clients have a fundamental understanding of our AZ-700 training materials, we provide the free trials of our AZ-700 exam questions before their purchasing.

In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply believe that our AZ-700 question torrent will help you pass the exam and get your certification successfully in a short time. Maybe you cannot wait to understand our AZ-700 Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment I am willing to show our AZ-700 guide torrents to you, and I can make a bet that you will be fond of our products if you understand it.

Demo AZ-700 Test - AZ-700 Valid Test Dumps

You can absolutely assure about the high quality of our products, because the contents of AZ-700 training materials have not only been recognized by hundreds of industry experts, but also provides you with high-quality after-sales service. Before purchasing AZ-700 exam torrent, you can log in to our website for free download. Whatever where you are, whatever what time it is, just an electronic device, you can practice. With Designing and Implementing Microsoft Azure Networking Solutions study questions, you no longer have to put down the important tasks at hand in order to get to class; with AZ-700 Exam Guide, you don't have to give up an appointment for study. Our study materials can help you to solve all the problems encountered in the learning process, so that you can easily pass the exam.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q125-Q130):

NEW QUESTION # 125

You have an Azure subscription that contains a single virtual network and a virtual network gateway.

You need to ensure that administrators can use Point-to-Site (P2S) VPN connections to access resources in the virtual network.

The connections must be authenticated by Azure Active Directory (Azure AD).

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

NEW QUESTION # 126

Case Study 3 - Contoso, Ltd

Overview

Proseware, Inc. is a financial services company that has a main office in New York City and a branch office in San Francisco.

Existing Environment. Hybrid Environment

Proseware has an on-premises Active Directory Domain Services (AD DS) forest named corp.proseware.com that syncs with a Microsoft Entra tenant named proseware.com.

Proseware has an Azure subscription that is linked to proseware.com.

Proseware has an internal certification authority (CA).

Existing Environment. Network Infrastructure

The offices contain the resources shown in the following table.

NYCNet connects to Azure by using an ExpressRoute circuit.

SFONet connects to Azure by using a Site-to-Site (S2S) VPN.

Existing Environment. Azure Resources

The Azure subscription contains the virtual networks and subnets shown in the following table.

The subscription contains four virtual machines named VM1, VM2, VM3, and VM4. VM1 and VM2 host an app named App1. VM3 and VM4 host a web app named App2 that is accessed by using a FQDN of app2.proseware.com. Users access app2.proseware.com by using HTTP or HTTPS.

VM1, VM2, and VM4 are connected to SpokeVNet.

The subscription contains Application Gateway resources shown in the following table.

The subscription contains an Azure Front Door Standard profile named FD1. FD1 contains a single origin group that targets APPGW1 by using the default endpoint name.

HubVNet connects to NYCNet by using an ExpressRoute gateway named ERGW1.

Planned Changes and Requirements. Planned Changes

Proseware plans to implement the following changes:

- Deploy an Azure Private DNS Resolver named PRDNS1 to HubVNet and link PRDNS1 to SpokeVNet.
- Create a DNS forwarding ruleset named DNSRS1 and associate DNSRS1 with PRDNS1.
- Deploy Azure Virtual Network Manager and implement the following rules:
 - Allow inbound connections on TCP port 3389 from the on-premises networks to SUBNET- JUMPHOSTS.
 - Block inbound connections on TCP port 80 from the internet to SpokeVNet.
- Ensure that Azure Virtual Network Manager rules take precedence over conflicting NSG rules.
- Deploy two network virtual appliances (NVAs) named NVA1 and NVA2 to HubVNet.
- Deploy a gateway load balancer named LBGW1 to HubVNet.
- Configure LBGW1 to inspect traffic on TCP ports 443, 1433, and 1434 from LBS1 by using NVA1 and NVA2.
- Ensure that all the traffic to App2 is processed by using FD1.

Planned Changes and Requirements. Connectivity requirements

Proseware identifies the following connectivity requirements:

- Minimize the complexity of the Azure Virtual Network Manager deployment.
- Route traffic between NYCNet and SFONet via the ExpressRoute circuit and the S2S VPN.
- Ensure that remote users on Windows 11 devices can connect to HubVNet by using a Point-to-Site (P2S) VPN and their proseware.com credentials.

Planned Changes and Requirements. Security requirements

Proseware identifies the following security requirements:

- Whenever possible, use the internal CA.
- Ensure that all connections routed via APPGW1 use end-to-end encryption.
- Ensure that user connections to Azure-hosted apps use end-to-end encryption.
- Ensure that all inbound internet traffic to app2.proseware.com is routed via FD1.
- Prevent devices that connect to NYCNet from accessing Azure services that use private endpoints.
- Enable the virtual machines that connect to HubVNet and SpokeVNet to access Azure services that use private endpoints.

Planned Changes and Requirements. General requirements

Proseware identifies the following general requirements:

- Minimize the IP address space required to deploy platform-managed resources to the virtual networks.
- From SpokeVNet, resolve name resolution requests for the azure.proseware.com namespace and the corp.proseware.com namespace by using PRDNS1.
- Whenever possible, minimize administrative effort.

Hotspot Question

You need to configure connectivity between NYCNet and SFONet. The solution must meet the connectivity requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 127

Hotspot Question

Your company has 10 instances of a web service. Each instance is hosted in a different Azure region and is accessible through a public endpoint.

The development department at the company is creating an application named App1. Every 10 minutes, App1 will use a list of endpoints and connect to the first available endpoint.

You plan to use Azure Traffic Manager to maintain the list of endpoints.

You need to configure a Traffic Manager profile that will minimize the impact of DNS caching.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

A traffic manager Multivalue profile can have only endpoints of type "External" Multivalue traffic-routing method The Multivalue traffic-routing method allows you to get multiple healthy endpoints in a single DNS query response. This configuration enables the caller to do client-side retries with other endpoints in case a returned endpoint being unresponsive. This pattern can increase the availability of a service and reduce the latency associated with a new DNS query to obtain a healthy endpoint.

Multivalue routing method works only if all the endpoints of type 'External' and are specified as IPv4 or IPv6 addresses. When a query is received for this profile, all healthy endpoints are returned and are subject to a configurable maximum return count.

<https://docs.microsoft.com/en-us/azure/traffic-manager/traffic-manager-routing-methods#multivalue>

NEW QUESTION # 128

You have an Azure subscription that contains the resources shown in the following table.

The virtual network topology is shown in the following exhibit.

Firewall1 is configured as shown in following exhibit.

FirewallPolicy1 contains the following rules:

* Allow outbound traffic from Vnet1 and Vnet2 to the internet.

* Allow any traffic between Vnet1 and Vnet2.

No custom private endpoints, service endpoints, routing tables, or network security groups (NSGs) were created. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE:

Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 129

SIMULATION

Username and password

Use the following login credentials as needed:

- To enter your username, place your cursor in the Sign in box and click on the username below.

- To enter your password, place your cursor in the Enter password box and click on the password below.

- Azure Username: User-12345678@cloudslice.onmicrosoft.com

- Azure Password: xxxxxxxxxx

- If the Azure portal does not load successfully in the browser, press CTRL-K to reload the portal in a new browser tab.
The following information is for technical support purposes only:
- Lab Instance: 12345678
You need to ensure that connections to the storage12345678 storage account can be made by using an IP address in the 10.1.1.0/24 range and the name storage12345678.privatelink.blob.core.windows.net.
To complete this task, sign in to the Azure portal.

Answer:

Explanation:

NEW QUESTION # 130

.....

The second step: fill in with your email and make sure it is correct, because we send our Designing and Implementing Microsoft Azure Networking Solutions learn tool to you through the email. Later, if there is an update, our system will automatically send you the latest Designing and Implementing Microsoft Azure Networking Solutions version. At the same time, choose the appropriate payment method, such as SWREG, DHPay, etc. Next, enter the payment page, it is noteworthy that we only support credit card payment, do not support debit card. Generally, the system will send the AZ-700 Certification material to your mailbox within 10 minutes. If you don't receive it please contact our after-sale service timely.
