## Salesforce Certified Platform Strategy Designer 認定 Plat-UX-102 試験問題

## (Q125-Q130):

### 質問 # 125

Cloud Kicks (CX) has spent several months working to align the entire company around a vision based on inclusivity in the digital age. Because this project will span several years, the design team is concerned the vision will eventually be lost. What should CK do to maintain the vision and create transformative change?

- A. Realize the vision must be driven by business goals.
- B. Align the vision to current industry trends.
- C. Continuously align business goals to the vision.

正解: C

解説:

CK should continuously align business goals to the vision to maintain the vision and create transformative change. Business goals are the specific and measurable objectives that support the vision. By aligning business goals to the vision, CK can ensure that every decision and action is consistent with the desired future state, and that the vision is not diluted or distorted over time. Aligning the vision to current industry trends may not be relevant or sustainable for CK's unique value proposition. Realizing that the vision must be driven by business goals may undermine the purpose and direction of the vision.

### 質問 # 126

A strategy designer and a UX team have recently workshopped and developed a plan around the team's purpose and how they will align with the rest of the organization's goals and objectives. Which alignment and accountability document should be used after this workshop to bring the plan to reality?

- A. V2MOM
- B. UX vision
- C. RACI

正解: A

解説:

V2MOM stands for Vision, Values, Methods, Obstacles, and Measures. It is a tool that helps align teams around common goals and objectives, and track progress and results. It is used by Salesforce to bring plans to reality after workshops and ideation sessions. <https://trailhead.salesforce.com/en/content/learn/modules/align-your-team-with-v2mom> V2MOM is an acronym that stands for Vision, Values, Methods, Obstacles, and Measures. It is a tool used by Salesforce and recommended in their strategy design processes to align teams and bring strategic plans to fruition. After a workshop where a strategy designer and UX team develop a plan around the team's purpose and organizational alignment, using V2MOM helps to articulate the Vision of what they want to achieve, the Values that are most important to them, the Methods they will use to get there, the Obstacles they anticipate, and the Measures they will use to know whether they are successful. This framework ensures clarity and alignment, making it the ideal document to transition from planning to execution.

### 質問 # 127

A design team is working on the challenge: "How might we provide tools to enable customers to resolve service issues by themselves rather than escalating to human representatives?" Which bot metrics should the strategy designer suggest to assess the impact of their work?

- A. Customer satisfaction rate
- B. Total conversations
- C. Human takeover rate

正解: A

解説:

The customer satisfaction rate is a critical metric for assessing the effectiveness of self-service tools in resolving issues. It measures users' satisfaction with their interactions and outcomes, providing insight into the bot's impact on improving the self-service experience and reducing the need for escalation.

### 質問 # 128

During requirements discovery for a new mobile app for Cloud Kicks, different business units are proposing conflicting requirements for some of the key use cases. Which methodology should be used to resolve conflicts and promote consensus?

- A. Journey Mapping
- **B. Prioritization Matrix**
- C. SWOT Analysis

正解: B

解説:

The methodology that should be used to resolve conflicts and promote consensus among different business units is a prioritization matrix. A prioritization matrix is a tool to evaluate and compare requirements based on two or more criteria, such as impact, effort, urgency, or importance. Requirements that score high on the chosen criteria are usually prioritized, while requirements that score low are usually deprioritized or eliminated. A prioritization matrix can help different business units reach a common understanding and agreement on the most critical and valuable requirements for the key use cases. A journey map or a SWOT analysis may not be effective for resolving conflicts or promoting consensus, as they do not provide a clear and objective way to rank requirements.

### 質問 # 129

An insurance company has a calc banding process that involves multiple team members, different departments, and many disparate systems. Which Salesforce automation tool should a strategy designer recommend to improve business process efficiency?

- **A. MuleSoft**
- B. Services Cloud
- C. Financial

正解: A

解説:

The best Salesforce automation tool to recommend to improve business process efficiency for an insurance company that has a complex underwriting process is MuleSoft, as this helps integrate and orchestrate data and applications across different systems and platforms. Financial Services Cloud or Service Cloud may not be able to automate the underwriting process effectively.

### 質問 # 130
