C-BCBAI-2502퍼펙트 덤프 최신자료, C-BCBAI-2502인증시험 덤프문제

KoreaDumps는SAP C-BCBAI-2502시험을 패스할 수 있는 아주 좋은 사이트입니다. KoreaDumps은 아주 알맞게 최고의SAP C-BCBAI-2502시험문제와 답 내용을 만들어 냅니다. 덤프는 기존의 시험문제와 답과 시험문제분석 등입니다. KoreaDumps에서 제공하는SAP C-BCBAI-2502시험자료의 문제와 답은 실제시험의 문제와 답과 아주 비슷합니다.

최신 SAP Certified Associate C-BCBAI-2502 무료샘플문제 (Q49-Q54):

질문 # 49

Which SAP AI solution enables companies to analyze and predict employee attrition rates? Please choose the correct answer.

- A. SAP Predictive Maintenance
- B. SAP Intelligent RPA
- C. SAP Conversational AI

- D. SAP SuccessFactors AI

정답: D

설명:

SAP SuccessFactors AI is the primary solution for analyzing and predicting employee attrition rates, leveraging AI to enhance HR processes. The correct answer is SAP SuccessFactors AI, as it is specifically designed to provide predictive workforce analytics and talent management insights.

SAP documentation highlights: "AI in human resources involves using artificial intelligence to streamline and enhance HR processes such as recruitment, employee engagement, and performance management. It automates repetitive tasks, analyzes large volumes of data for better decision-making, and offers personalized experiences for employees." Within SAP SuccessFactors AI, predictive analytics are used to "predict employee attrition rates" by analyzing factors like engagement, performance, and career progression. The solution's "talent intelligence hub" enables organizations to identify at-risk employees and implement retention strategies. FC Bayern's use of SAP SuccessFactors AI illustrates how it elevates HR processes by predicting talent needs and improving employee retention.

The incorrect options are not relevant to employee attrition prediction. SAP Intelligent RPA focuses on automating repetitive tasks, not HR analytics. SAP Conversational AI handles natural language interactions, such as chatbots, not attrition analysis. SAP Predictive Maintenance is designed for equipment maintenance in manufacturing, not HR. SAP SuccessFactors AI is the clear choice based on its documented HR-specific AI capabilities.

질문 # 50

Which SAP solution helps companies ensure compliance with environmental regulations? Please choose the correct answer.

- A. SAP Environment, Health, and Safety (EHS)
- B. SAP SuccessFactors
- C. SAP Business Warehouse
- D. SAP Extended Warehouse Management

정답: A

설명:

SAP Environment, Health, and Safety (EHS) is the dedicated solution for ensuring compliance with environmental regulations, supporting organizations in managing environmental, health, and safety requirements. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing environmental compliance, workplace safety, and sustainability initiatives. It helps organizations comply with global environmental regulations, track emissions, and implement sustainable practices." SAP EHS enables companies to monitor regulatory requirements, manage permits, and report on environmental performance, ensuring adherence to standards like carbon emissions and waste management regulations. For example, it supports "tracking and reporting environmental data" to meet compliance obligations, as seen in SAP's sustainability-focused solutions.

The incorrect options are unrelated to environmental compliance. SAP Business Warehouse is a data storage and analytics platform, not focused on regulatory compliance. SAP SuccessFactors addresses HR processes, such as recruitment and talent management. SAP Extended Warehouse Management handles logistics and inventory, not environmental regulations. SAP EHS is the only solution aligned with environmental compliance objectives.

질문 # 51

(What are some characteristics of trustworthy business AI? Note: There are 3 correct answers to this question.)

- A. Resourcefulness
- B. Relevance
- C. Responsibility
- D. Reusability
- E. Reliability

정답: B,C,E

설명:

Comprehensive and Detailed Explanation From Exact Extract: Characteristics of trustworthy business AI include responsibility through ethical governance and accountability, reliability via accurate and secure operations, and relevance by grounding in business

data and contexts. These ensure AI is human-centered, transparent, and beneficial for enterprise use.

Exact extracts supporting this:

"These three 'R's' - relevance, reliability, responsibility - are the cornerstones of trustworthy AI for the business world."news.sap.com Responsibility: "SAP Business AI is... responsible."learning.sap.com Reliability: "Reliable: built on best technology and partnerships."news.sap.com Relevance: "Relevant: grounded in business data."news.sap.com Other options are incorrect because:

Option B: Resourcefulness is not a defined characteristic; focus is on the three R's.

Option C: Reusability may apply to models but is not a core trustworthiness trait; emphasis is on ethics and accuracy.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP News "Trustworthy AI Can Reinvent Companies" and SAP Learning "Introducing SAP Business Artificial Intelligence," which define trustworthy AI via relevance, reliability, and responsibility, aligned with C_BCBAI_2502 certification.

질문 # 52

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI-powered solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP AI Business Service
- B. SAP Predictive Analytics
- C. SAP Cloud ERP
- D. SAP Digital Manufacturing Cloud
- E. SAP BusinessObjects Planning

정답: A,B,D

질문 # 53

Which component of SAP AI is responsible for automating routine business tasks?

Please choose the correct answer.

Response:

- A. SAP Intelligent RPA
- B. SAP Conversational AI
- C. SAP AI Core
- D. SAP S/4HANA Cloud

정답: A

질문 # 54
