Name (Profile)	Security	Access Type	Traffic forwarding mode	Network Enabled
secure_wireless	wpa3-wpa2-psk-256	Role Based	Bridge	Yes
open_wireless	open/psk/802.11n	Unrestricted	Bridge	Yes

While making revisions and modifications to the HP HPE7-A11 practice exam, our team takes reports from over 90,000 professionals worldwide to make the HPE Network Campus Access Professional Architect Exam exam questions foolproof. To make you capable of preparing for the HP HPE7-A11 Exam smoothly, we provide actual HP HPE7-A11 exam dumps.

TorrentExam is a professional website. It focuses on the most advanced HP HPE7-A11 for the majority of candidates. With TorrentExam, you no longer need to worry about the HP HPE7-A11 exam. TorrentExam exam questions have good quality and good service. As long as you choose TorrentExam, TorrentExam will be able to help you pass the exam, and allow you to achieve a high level of efficiency in a short time.

## Updated HPE7-A11 Test Cram | Exam HPE7-A11 Online

Desktop-based HPE7-A11 practice exam software is the first format that TorrentExam provides to its customers. It helps track the progress of the candidate from beginning to end and provides a progress report that is easily accessible. This HP HPE7-A11 Practice Questions is customizable and mimics the real HPE7-A11 exam, with the same format, and is easy to use on Windows-based computers. The product support staff is available to assist with any issues that may arise.

## HPE Network Campus Access Professional Architect Exam Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Manufacturing ABC is an international, mid-sized company specializing in producing industrial equipment. They have been in the market for over two decades and have established themselves as a reputable player in their industry. However, due to rapid technological advancements, their current network infrastructure is outdated and struggling to keep up with the demands of modern manufacturing processes.

Manufacturing ABC's network is a mix of multi-vendor legacy wired and wireless components, causing frequent downtime and hampering their production efficiency. The aging equipment leads to slow data transfer rates, unreliable connectivity, and increased vulnerability to cyber threats.

Fiber Cabling should be also upgraded as mostly OM2 is being used.

Compounding the network issues, the recent departure of the CTO has left the company without a clear direction for the network refresh project. There is a lack of consensus among the management team regarding the scope, budget, and timeline for the upgrade. The primary objectives of the manufacturing customer are as follows:

- Improve network performance and reliability to enhance production processes and minimize downtime
  - Enhance network security to protect sensitive data and intellectual property
  - Streamline communication and collaboration among different departments within the organization
  - Ensure scalability to accommodate future growth and technology advancements
- Manufacturing ABC seeks a comprehensive network refresh that includes the following components:
- Upgrading the wired infrastructure to high-speed Ethernet switches to support increased data transfer rates and reduce latency
  - Implementing a robust wireless solution with enterprise-grade access points to provide seamless connectivity across the manufacturing facility
  - Centralized network management tools to simplify administration and monitoring of the network

Expectations:  
The customer expects the network refresh project to be handled efficiently, with minimal disruption to their ongoing operations. They are looking for a reliable and experienced network solutions provider who can understand their unique manufacturing requirements and deliver a customized solution that aligns with their budget constraints. The manufacturing customer is keen on receiving clear project proposals and support in decision-making, given the recent change of the CTO.

Your role as a network solutions provider is to address their concerns, offer expert guidance, and present a well-defined plan to

meet their objectives effectively.

Manufacturing ABC needs to regulate various traffic types with QoS and the architect decided to use DWRR instead of SP queuing. Which switches support DWRR? (Choose two.)

- A. CX 6200
- B. CX 6100
- C. CX 8360
- D. CX 4100

**Answer: A,C**

Explanation:

The CX 8360 and CX 6200 platforms support DWRR (Deficit Weighted Round Robin) queuing, which allows weighted scheduling across multiple traffic classes - ideal for QoS designs in environments requiring fine-grained traffic regulation like manufacturing networks.

#### NEW QUESTION # 14

ACME retail has 38 locations spread out across five US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HQ with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location. The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores. The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store. Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current PBX system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would be to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDFs located on floors one and two. The MDF is in the basement, and you have multiple WAN circuits for the HQ links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

Based on the scenario, where would you look to add additional items to the BOM to aid the company goals? (Choose three.)

- A. Marketing
- B. Sales Management
- C. Customer Experience Officer
- D. Security Team/CISO
- E. Finance Team
- F. Building Facilities

**Answer: C,D,F**

Explanation:

Security Team/CISO

In light of increasing connectivity (to vendors, employees, guests, and contractors), ensuring network security is paramount. The Security Team can provide insights into the necessary security infrastructure, such as firewalls, intrusion detection/prevention systems, and secure access controls, which are crucial for protecting sensitive data and maintaining compliance.

Building Facilities

Engaging with the Building Facilities team can help identify any infrastructure needs that might be necessary for physical installations, such as AP placement, power supply for equipment, and cabling requirements. This collaboration ensures that the network design aligns with the physical layout and operational needs of the building.

## Customer Experience Officer

The Customer Experience Officer (CXO) would focus on enhancing customer interactions through technology. This could lead to investments in tools that support interactive kiosks, real-time inventory systems, and enhanced guest Wi-Fi experiences, all of which contribute to improved customer satisfaction and engagement in the retail environment.

### NEW QUESTION # 15

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location. The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores. The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store. Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half. The office has an MDF and two IDF's located on floors one and two.

The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue. The customer has budget concerns but does want something that could last 7+ years. Based on the best practices and customer requirements, what is the correct WLAN approach?

- A. Aruba OS8 campus deployment
- B. Aruba OS10 AP only deployment
- C. Instant OS 8 deployment
- D. Aruba OS10 AP and gateway deployment

**Answer: C**

Explanation:

For ACME Retail, which has multiple locations and a mix of environments including high-ceiling warehouses and retail spaces, an Aruba Instant OS 8 deployment is a suitable WLAN approach.

Aruba Instant OS provides a controller-less architecture, which simplifies the deployment and management of the wireless network, especially across multiple sites. This approach enables ACME Retail to manage their entire wireless network from a single interface without the need for dedicated hardware controllers, reducing costs and complexity. Instant OS also supports advanced features like Adaptive Radio Management and ClientMatch to ensure optimal performance in diverse environments, making it an effective solution for ACME's varied locations and requirements.

### NEW QUESTION # 16

Which HPE tool is best suited for managing the configuration of Aruba wireless access points?

- A. Aruba Central
- B. HPE Smart Network Configuration
- C. Aruba ClearPass
- D. Aruba AirWave

**Answer: D**

Explanation:

Aruba AirWave is a network management tool that provides visibility and management of both wired and wireless network

infrastructures. It allows the configuration, monitoring, and troubleshooting of Aruba wireless access points.

#### NEW QUESTION # 17

A global cruise line company needs to refresh its current fleet. They will refresh the 'insides' of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests.

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (980 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft).

Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN infrastructure is based on the 200/300 series indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because internet connection is guaranteed.

Based on the best practices, what should you recommend as the most cost-effective switch model for the cabins?

- A. HPE Aruba Networking 6100 24G Class4 PoE 4SFP+
- B. HPE Aruba Networking 6000 12G Class4 PoE 2G/2SFP
- C. HPE Aruba Networking 6200F 12G Class4 PoE 2G/2SFP+
- **D. HPE Aruba Networking 6100 12G Class4 PoE 2G/2SFP+**

**Answer: D**

#### NEW QUESTION # 18

.....

Finding 60 exam preparation material that suits your learning preferences, timetable, and objectives is essential to prepare successfully for the test. You can prepare for the HP HPE7-A11 test in a short time and attain the HPE Network Campus Access Professional Architect Exam certification exam with the aid of our updated and valid exam questions. We emphasize quality over quantity, so we provide you with HP HPE7-A11 Actual Exam questions to help you succeed without overwhelming you.

**Updated HPE7-A11 Test Cram:** <https://www.torrentexam.com/HPE7-A11-exam-latest-torrent.html>

The latest HP HPE7-A11 exam dumps are the right option for you to prepare for the HP HPE7-A11 certification test at home, Achieve Definite Success In HP HPE7-A11 Certification Exam, The TorrentExam is a reliable platform that is committed to making your preparation for the HP HPE7-A11 examination easier and more effective, Some people worry that if they buy our HPE7-A11 exam questions they may fail in the exam and the procedure of the refund is complicated.

Store log files on a standalone system, Also, Exam HPE7-A11 Online the state unemployment systems are not set up to provide benefits to the self-employed. This means it's likely it will take several weeks HPE7-A11 or more for some states to process independent worker applications and send out the checks.

### **Quiz 2026 HP HPE7-A11: Valid HPE Network Campus Access Professional Architect Exam Reliable Dumps Questions**

The latest HP HPE7-A11 Exam Dumps are the right option for you to prepare for the HP HPE7-A11 certification test at home, Achieve Definite Success In HP HPE7-A11 Certification Exam!
