## Pass Guaranteed Microsoft - AI-900 High Hit-Rate Reasonable Exam Price

We will be happy to assist you with any questions regarding our products. Our Microsoft Azure AI Fundamentals (AI-900) practice exam software helps to prepare applicants to practice time management, problem-solving, and all other tasks on the standardized exam and lets them check their scores. The Microsoft AI-900 Practice Test results help students to evaluate their performance and determine their readiness without difficulty.

### Microsoft Azure AI Fundamentals Sample Questions (Q87-Q92):

#### NEW QUESTION # 87

To complete the sentence, select the appropriate option in the answer area.

Assigning classes to images before training a classification model is an example of

	▼
evaluation.	
feature engineering	
hyperparameter tuning.	
labeling.	

4engine Microsoft

Answer:

Explanation:

Assigning classes to images before training a classification model is an example of

- evaluation.
- feature engineering
- hyperparameter tuning.
- labeling.

Explanation:

Text Description automatically generated

Assigning classes to images before training a classification model is an example of

- evaluation.
- feature engineering
- hyperparameter tuning.
- labeling.

**NEW QUESTION # 88**

To complete the sentence, select the appropriate option in the answer area.

Returning a bounding box that indicates the location of a vehicle in an image is an example of

- image classification.
- object detection.
- optical character recognition (OCR).
- facial detection.

Answer:

Explanation:

Returning a bounding box that indicates the location of a vehicle in an image is an example of

- image classification.
- object detection.
- optical character recognition (OCR).
- facial detection.

Explanation:

Returning a bounding box that indicates the location of a vehicle in an image is an example of

- object detection.

**NEW QUESTION # 89**

Match the types of natural languages processing workloads to the appropriate scenarios.

To answer, drag the appropriate workload type from the column on the left to its scenario on the right. Each workload type may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

### Workloads Types

- Entity recognition
- Key phrase extraction
- Language modeling
- Sentiment analysis
- Natural language processing
- Translation
- Speech recognition and speech synthesis

### Answer Area

- Workload Type: Extracts persons, locations, and organizations from the text
- Workload Type: Evaluates text along a positive-negative scale
- Workload Type: Returns text translated to the specified target language

**Answer:**

**Explanation:**

Workloads Types	Answer Area
Entity recognition	Entity recognition: Extracts persons, locations, and organizations from the text
Key phrase extraction	Sentiment analysis: Evaluates text along a positive-negative scale
Language modeling	Translation: Returns text translated to the specified target language
Sentiment analysis	
Natural language processing	
Translation	
Speech recognition and speech synthesis	

**Explanation**

**Box 1: Entity recognition**

Classify a broad range of entities in text, such as people, places, organisations, date/time and percentages, using named entity recognition. Whereas:- Get a list of relevant phrases that best describe the subject of each record using key phrase extraction.

**Box 2: Sentiment analysis**

Sentiment Analysis is the process of determining whether a piece of writing is positive, negative or neutral.

**Box 3: Translation**

Using Microsoft's Translator text API

This versatile API from Microsoft can be used for the following:

- Translate text from one language to another.
- Transliterate text from one script to another.
- Detecting language of the input text.
- Find alternate translations to specific text.
- Determine the sentence length.

### NEW QUESTION # 90

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Providing an explanation of the outcome of a credit loan application is an example of the Microsoft transparency principle for responsible AI.	<input type="radio"/>	<input type="radio"/>
A triage bot that prioritizes insurance claims based on injuries is an example of the Microsoft reliability and safety principle for responsible AI.	<input type="radio"/>	<input type="radio"/>
An AI solution that is offered at different prices for different sales territories is an example of the Microsoft inclusiveness principle for responsible AI.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Statements	Yes	No
Providing an explanation of the outcome of a credit loan application is an example of the Microsoft transparency principle for responsible AI.	<input checked="" type="radio"/>	<input type="radio"/>
A triage bot that prioritizes insurance claims based on injuries is an example of the Microsoft reliability and safety principle for responsible AI.	<input type="radio"/>	<input checked="" type="radio"/>
An AI solution that is offered at different prices for different sales territories is an example of the Microsoft inclusiveness principle for responsible AI.	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION # 91

You need to create a training dataset and validation dataset from an existing dataset. Which module in the Azure Machine Learning designer should you use?

- A. Select Columns in Dataset
- **B. Split Data**
- C. Join Data
- D. Add Rows

**Answer: B**

**Explanation:**

A common way of evaluating a model is to divide the data into a training and test set by using Split Data, and then validate the model on the training data.

Use the Split Data module to divide a dataset into two distinct sets. The studio currently supports training/validation data splits
