Most people find it difficult to find excellent Splunk SPLK-1005 exam dumps that can help them prepare for the actual Splunk SPLK-1005 exam.

Splunk Cloud Certified Admin Sample Questions (Q93-Q98):

NEW QUESTION # 93

In case of a Change Request, which of the following should submit a support case for Splunk Support?

- A. Any person with the appropriate entitlement
- B. The party requesting the change.
- C. Splunk infrastructure owner.
- D. Certified Splunk Cloud administrator.

Answer: A

Explanation:

In Splunk Cloud, when there is a need for a change request that might involve modifying settings, upgrading, or other actions requiring Splunk Support, the process typically requires submitting a support case.

* D. Any person with the appropriate entitlement. This is the correct answer. Any individual who has the necessary permissions or entitlements within the Splunk environment can submit a support case.

This includes administrators or users who have been granted the ability to engage with Splunk Support.

The request does not necessarily have to come from a Certified SplunkCloud Administrator or the infrastructure owner; rather, it can be submitted by anyone with the correct level of access.

Splunk Documentation References:

- * Submitting a Splunk Support Case
- * Managing User Roles and Entitlements

NEW QUESTION # 94

Windows Input types are collected in Splunk via a script which is configurable using the GUI. What is this type of input called?

- A. Scripted
- B. Batch
- C. Modular
- D. Front-end

Answer: C

Explanation:

Windows inputs in Splunk, particularly those that involve more advanced data collection capabilities beyond simple file monitoring, can utilize scripts or custom inputs. These are typically referred to as Modular Inputs.

* C. Modular: This is the correct answer. Modular Inputs are designed to be configurable via the Splunk Web UI and can collect data using custom or predefined scripts, handling more complex data collection tasks. This is the type of input that is used for collecting Windows-specific data such as Event Logs, Performance Monitoring, and other similar inputs.

Splunk Documentation References:

- * Modular Inputs
- * Windows Data Collection

NEW QUESTION # 95

Where does the regex replacement processor run?

- A. Merging pipeline
- B. Index pipeline
- C. Typing pipeline
- D. Parsing pipeline

Answer: D

Explanation:

The regex replacement processor is part of the parsing stage in Splunk's data ingestion pipeline. This stage is responsible for handling data transformations, which include applying regex replacements.

* D. Parsing pipeline is the correct answer. The parsing pipeline is where initial data transformations, including regex replacement, occur before the data is indexed. This stage processes events as they are parsed from raw data, including applying any regex-based modifications.

Splunk Documentation References:

- * Data Processing Pipelines in Splunk

NEW QUESTION # 96

Which command can be used to install the Splunk universal forwarder credentials package on the universal forwarder machine?

- A. `splunk install app <path_to_credentials_package>`
- B. `splunk install forwarder-credentials <path_to_credentials_package>`
- C. `splunk add app <path_to_credentials_package>`
- D. `splunk add forwarder-credentials <path_to_credentials_package>`

Answer: A

NEW QUESTION # 97

Which type of forwarder can act as an intermediate forwarder to receive data from other forwarders and send it to the indexer?

- A. Universal forwarder
- B. Any type of forwarder
- C. Light forwarder
- **D. Heavy forwarder**

Answer: D
