Valid C_CPI_2506 Exam Guide, C_CPI_2506 Exam Test

Under the instruction of our C_CPI_2506 exam torrent, you can finish the preparing period in a very short time and even pass the exam successful, thus helping you save lot of time and energy and be more productive with our SAP Certified Associate - Integration Developer prep torrent. In fact the reason why we guarantee the high-efficient preparing time for you to make progress is mainly attributed to our marvelous organization of the content and layout which can make our customers well-focused and targeted during the learning process with our C_CPI_2506 Test Braindumps.

SAP Certified Associate - Integration Developer Sample Questions (Q42-Q47):

NEW QUESTION # 42
What does the "Open Integration" principle of the SAP Integration Suite mean?

- A. SAP Integration Suite by default supports third-party software integration.
- B. SAP Integration Suite allows SAP-to-SAP integrations.
- C. SAP Integration Suite by default supports integrations to other SAP software.

Answer: A

Explanation:
The "Open Integration" principle of SAP Integration Suite emphasizes openness beyond SAP-to-SAP integrations.
SAP provides pre-built content and adapters for SAP solutions (S/4HANA, SuccessFactors, Ariba, Concur, etc.).
Additionally, it supports third-party applications and ecosystems through:
Open Connectors (over 160+ third-party apps like Salesforce, HubSpot, Workday).
Open APIs and standards (REST, OData, SOAP, JMS, AMQP, etc.).
Thus, the principle ensures SAP + non-SAP integration scenarios are fully supported by default.

NEW QUESTION # 43
Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Use a Java connector
- B. Use an external REST API
- C. Run a Groovy script
- D. Employ a Mule Expression component

Answer: C

Explanation:
For executing custom logic inside an integration flow:
Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.
External REST APIs can enrich data but are not for embedded custom logic execution.
Mule components are not part of SAP CPI.
Java connectors are not directly supported in SAP CPI runtime.
Thus, the best suited for executing custom logic is Groovy script.

NEW QUESTION # 44
Which part of the proxy URL is provided by the initial configuration step of the API Management?

- A. Name of the API management
- B. Version
- C. Virtual host
- D. Service name

Answer: C

Explanation:
To set up the API Management capability within SAP Integration Suite, you must provide a virtual host as part of the initial configuration step. The virtual host is a host alias that identifies your organization and is used as the base URL of your API proxies.
For example, if your virtual host is myorg, your API proxy URL will look like this:
https://myorg.apimanagement.hana.ondemand.com/<api-name>. The virtual host can be changed later in the API portal settings.
Reference: Setting Up API Management Capability | SAP Help Portal, Virtual Hosts | SAP Help Portal

NEW QUESTION # 45
Which Clean Core Approach principle promotes the isolation of cutom code from standard SAP functionality?

- A. Enforce consistent coding standards.
- B. Maintain separation of concerns.
- C. Promote modular design.

- D. Prioritize code reusability.

Answer: B

Explanation:
The Clean Core Approach emphasizes keeping the SAP digital core free from modifications and isolating custom code:
Separation of Concerns # Custom logic/extensions are isolated from SAP standard functionality, ensuring upgrades and innovations are not disrupted.
Other principles (modular design, coding standards, reusability) are good practices but not specifically tied to Clean Core's goal of isolating custom code.
Thus, the correct principle is Maintain separation of concerns.

NEW QUESTION # 46
What minimum user permission is required to create a queue within the emis-s4hana message client?

- A. Eemis-s4hana message client administrators group membership
- B. Administrator privileges on the Event Mesh
- C. Sufficient authorization within the emis-s4hana system
- D. Role collections for Event Mesh

Answer: D

Explanation:
In SAP Integration Suite, Event Mesh (EMIS), queue creation and management requires specific role collections assigned to the user in SAP BTP:
EventMeshAdmin # Provides full administration rights (create, delete, configure queues, topics, subscriptions).
EventMeshDeveloper # Allows development tasks, including working with queues and topic subscriptions.
Other options are not correct:
Message client administrators group membership # Not a BTP role collection concept.
Administrator privileges on Event Mesh # Too generic; the system enforces access through role collections.
Sufficient authorization within emis-s4hana system # S/4HANA authorizations do not govern Event Mesh capabilities.
Thus, the minimum permission required is assignment of the Event Mesh role collections in BTP.

NEW QUESTION # 47
......

Our company is a multinational company with sales and after-sale service of C_CPI_2506 exam torrent compiling departments throughout the world. In addition, our company has become the top-notch one in the fields, therefore, if you are preparing for the exam in order to get the related C_CPI_2506 certification, then the C_CPI_2506 Exam Question compiled by our company is your solid choice. All employees worldwide in our company operate under a common mission: to be the best global supplier of electronic C_CPI_2506 exam torrent for our customers to pass the C_CPI_2506 exam.

Valid C_CPI_2506 Exam Guide: https://www.exam-killer.com/C_CPI_2506-valid-questions.html

In addition, C_CPI_2506 exam dumps are high-quality, and they can ensure you pass the exam just one time, The APP version of C_CPI_2506 dumps VCE is more convenient for your exam preparation and once it is first downloaded and used, C_CPI_2506 latest dumps can be used without Internet next time if you don't clear the cache, After our worthy customers get a C_CPI_2506 certificate, they now have more job opportunities.
